Passive Cooling of Buildings D.

Asimakopoulou, 2013-10-31 Energy use in buildings in the EU represents about 40% of the total annual energy consumption. With greater awareness of the need to reduce energy consumption comes a growth of interest in passive cooling, particularly as an alternative to air-conditioning. This book describes the fundamentals of passive cooling together with the principles and formulae necessary for its successful implementation. The material is comprised largely of information and results compiled under the SAVE European Research Programme.

Transactions on High-Performance Embedded Architectures and Compilers IV Per

Stenström, 2011-11-22 Transactions on HiPEAC aims at the timely dissemination of research contributions in computer architecture and compilation methods for high-performance embedded computer systems. Recognizing the convergence of embedded and general-purpose computer systems, this journal publishes original research on systems targeted at specific computing tasks as well as systems with broad application bases. The scope of the journal therefore covers all aspects of computer architecture, code generation and compiler optimization methods of interest to researchers and practitioners designing future embedded systems. This 4th issue contains 21 papers carefully reviewed and selected out of numerous submissions and is divided in four sections. The first section contains five regular papers. The second section consists of the top four papers from the 4th International Conference on High-Performance Embedded Architectures and

Compilers, HiPEAC 2009, held in Paphos, Cyprus, in January 2009. The third section contains a set of six papers providing a snap-shot from the Workshop on Software and Hardware Challenges of Manycore Platforms, SHCMP 2008 held in Beijing, China, in June 2008. The fourth section consists of six papers from the 8th IEEE International Symposium on Systems, Architectures, Modeling and Simulation, SAMOS VIII (2008) held in Samos, Greece, in July 2008.

Expert Advisor Programming for Beginners Wayne Walker,2017-04-21 You will discover step by step along with clear visuals on how to profit with MT4 programming. Automated trading is often shrouded in mystery along with many misconceptions about who it can benefit. We peel away the layers of this misunderstood world in the book. The book covers the following topics and much more: •Gives an overview of trading the financial markets •Understanding of how quant trading works •Understanding of basic of the programming language - declare variables •Understanding of the script •Make a script •Create an indicator •Make building blocks of different functions •Check for trade (trade open rule) •Check for trade (close rule) •Check for breakeven •Check for trailing stop •How to design a trading system (from a to z)

Available about Forex trading in Russia Oleg Papkov,2021-01-25 The book popularly tells about trading in the Forex currency market. An overview is given about the MT4 trading platform. About using indicators and Expert Advisors. Simple trading strategies are considered. Many trading mechanisms are explained. The internal characteristics of the account and the selected currency pair are considered. An example of writing an indicator in the MQL4 language is given.All the material in the book is of a recommendatory nature.

Analysis and Simulation of Electrical and Computer Systems Damian Mazur,Marek Gołębiowski,Mariusz Korkosz,2017-10-20 This book addresses selected topics in electrical engineering, electronics and mechatronics that have posed serious challenges for both the scientific and engineering communities in recent years. The topics covered range from mathematical models of electrical and electronic components and systems, to simulation tools implemented for their analysis and further developments; and from multidisciplinary optimization, signal processing methods and numerical results, to control and diagnostic techniques. By bridging theory and practice in the modeling, design and optimization of electrical, electromechanical and electronic

systems, and by adopting a multidisciplinary perspective, the book provides researchers and practitioners with timely and extensive information on the state of the art in the field – and a source of new, exciting ideas for further developments and collaborations. The book presents selected results of the XIII Scientific Conference on Selected Issues of Electrical Engineering and Electronics (WZEE 2016), held on May 04-08, 2016, in Rzeszów, Poland. The Conference was organized by the Rzeszów Division of Polish Association of Theoretical and Applied Electrical Engineering (PTETiS) in cooperation with the Faculty of Electrical and Computer Engineering of the Rzeszów University of Technology.

MT4/MT5 & Trading View High Probability Forex Trading Method Jim Brown, 2020-08-14 All of Jim Brown's Forex books are consistently ranked 'Best Sellers' on Amazon! Here is why... At no extra cost, or on-costs, Jim shares with his readers: · His custom indicators for the MT4/MT5 MetaTrader platforms, and more recently TradingView, as a download package at the end of the book. · An invitation to join his Facebook and Telegram Groups which have around 6,000 new as well as experienced Forex Traders contributing, including daily interaction with Jim. · Jim calls his trades live, shares his results and records weekly trade analysis videos on his YouTube channel. · Contact with Jim should you require any clarification on this trading method. Jim, from Queensland Australia, is a full-time Forex Trader and currently resides in Vietnam. This particular book provides a reliable and robust trading method which Jim has refined over many months on both demo and live trading. Jim uses the popular MetaTrader platforms to trade. These are more commonly referred to as MT4 or MT5, and there are

many reputable brokers who offer these platforms. As mentioned above, the method is now also available to be traded on the very popular web-based TradingView platform. Although Jim concentrates solely on Forex trading, there is no reason why you could not trade this method on other financial instruments offered by many brokers. These may include: · Oil · Precious metals · Commodities · Stock indices · Individual stocks · Cryptocurrencies You may not wish to conduct your actual trading off the Metatrader or TradingView platforms, however, as this method relies on the use of Jim's custom indicators which he had specifically built for Metatrader and TradingView, you will need to at least download a free MT4/MT5 or TV demonstration platform to enable you to conduct your trade analysis, and then place your actual trades on your preferred Broker's platform. A grammar of Fwe Hilde Gunnink, 2022-07-06 This book provides a first-ever comprehensive overview of the grammatical structure of Fwe. Fwe is a Bantu language spoken on the border between Zambia and Namibia, by some 20,000 people. Very little previous documentation exists on the language, and the current description of Fwe is based exclusively on newly collected field data. It includes an analysis of the grammatical structure of Fwe, followed by basic cultural information on greetings, a Fwe narrative with its English translation, and a lexicon comprising some 2200 Fwe lexemes with their English translation. This book is intended as a resource for linguists,

whether interested in African languages, Bantu languages, language typology, or general linguistics.
