Advances in Social and Organizational Factors Peter Vink, 2020-07-19 An exploration of how ergonomics can contribute to the solution of important societal and engineering challenges, *Advances in Social and Organizational Factors* discusses the optimization of sociotechnical systems, including their organizational structures, policies, and processes. It includes coverage of communication, crew resource management, work design, design of working times, teamwork, participatory design, community ergonomics, cooperative work, new work paradigms, organizational culture, virtual organizations, telework, and quality management. The book provides research on urban infrastructures and how to shape urban spaces, including stadiums and museums. It covers warning systems in cars, voice-based interfaces, and the positive effects on manufacturing processes available from health informatics and management systems. Several chapters examine the role human factors can play in counter-terrorism efforts and in interpreting deceptive behaviors. They provide suggestions on how to improve enterprise resource planning systems and stress the importance of lifelong learning, personalized learning, and work-life balance. The book also highlights issues with special populations, detailing how to design and adapt products and work situations for these groups. In addition to exploring the challenges faced in optimizing sociotechnical systems, the book underlines themes that play a role in all the challenges and how they are linked to each other. It concludes with an exploration of emotional ergonomics and the important positive effects of making people happy and healthy. With authors from around the globe, the book supplies a broad look at current challenges and possible solutions.

Formal Education as Economic and Social Value and as an Object of the Social Sciences
Odaci Luiz Coradini, 2021-09-23 This book explores the social conditions for valuing education and the

limits of sociology in addressing this type of problem. It will appeal to readers interested in problems related to the different conditions for valuing schooling and those most directly concerned with the difficulties and limits of the social sciences. As the book argues, what is currently at stake in education is the need to specify and recognize the fundamentals and distinct logics. Its central idea is that the main limits and challenges refer to the conditions of autonomy of the social sciences in relation to the themes under study. These conditions tend to be even more challenging when dealing with themes and problems linked to higher social and cultural spheres and positions.

Routledge International Handbook of Social Justice Michael Reisch, 2014-04-03 In a world where genocide, hunger, poverty, war, and disease persist and where richer nations often fail to act to address these problems or act too late, a prerequisite to achieving even modest social justice goals is to clarify the meaning of competing discourses on the concept. Throughout history, calls for social justice have been used to rationalize the status quo, promote modest reforms, and justify revolutionary, even violent action. Ironically, as the prominence of the concept has risen, the meaning of social justice has become increasingly obscured. This authoritative volume explores different perspectives on social justice and what its attainment would involve. It addresses key issues, such as resolving fundamental questions about human nature and social relationships; the distribution of resources, power, status, rights, access, and opportunities; and the means by which decisions regarding this distribution are made. Illustrating the complexity of the topic, it presents a range of international, historical, and theoretical perspectives, and discusses the dilemmas inherent in implementing social justice concepts in policy and practice. Covering more than abstract definitions of social justice, it also includes multiple examples of how social justice might be achieved at the interpersonal, organizational, community, and societal levels. With contributions from leading scholars

around the globe, Reisch has put together a magisterial and multi-faceted overview of social justice. It is an essential reference work for all scholars with an interest in social justice from a wide range of disciplines, including social work, public policy, public health, law, criminology, sociology, and education.

Points of Disruption in the Music Education Curriculum, Volume 2 Marshall Haning,Jocelyn A. Stevens,Brian N. Weidner,2024-05-15 For decades, scholars in the field of music education have recognized the need for growth and change in our approach to teaching music, yet despite these calls for change, the music education curriculum today remains remarkably similar to that of a century ago. Points of Disruption in the Music Education Curriculum, Volume 2: Individual Changes is one of two volumes that bring together applied suggestions, analyses, and best practices for disrupting cycles of replication in the curriculum of K-12 and collegiate music education programs in the United States and beyond, considering disruption as a force for positive change. Identifying specific strategies for interrupting or reimagining traditional practices, the contributors provide music teachers and music educators with a variety of potential practical approaches to creating changes that foster a better musical education at all levels of the curriculum. This second volume focuses on changes that can be implemented by individual educators, covering topics including transcultural approaches, student-teacher power relations, methods courses, integrated music education, and administrator support of teacher agency, student-teacher power relations, and reimagining music education. Bringing together 6 thought-provoking chapters, this book offers a diverse set of concrete strategies that will be useful to a wide range of music education stakeholders, including teachers, administrators, and curriculum designers.

The Palgrave International Handbook of Women and Journalism Carolyn M. Byerly,2016-01-12

Now in paperback for the first time, the Handbook is an academic adaptation of information contained in the Global Report on the Status of Women in News Media, a study commissioned by the International Women's Media Foundation. The book's editor was the principal investigator of the original study. This text draws together the most robust data from that original study, presenting it in 29 chapters on individual nations and three additional theoretical chapters. The book is the most expansive effort to date to consider women's standing in the journalism profession across the world. Contents organize nations in relation to their progress within newsrooms, with those most advanced in gender equality representing diversity in terms of region and national development. Contributing authors are, in most cases, the original researchers for their respective nations in the Global Report study.

Handbook of Scales in Tourism and Hospitality Research Dogan Gursoy,Muzaffer Uysal,Ercan Sirakaya-Turk,Yuksel Ekinici,Seyhmus Baloglu,2014-12-18 As the field of tourism and hospitality experiences maturity and scientific sophistication, researchers need to fully understand the breadth and depth of existing scales that help explain, understand, monitor, and predict not only behaviour but also consequences of such behaviour as a function of demand and supply interactions in the field. By introducing the importance of measurement and scales and providing groupings of existing scales The Handbook of Scales in Tourism and Hospitality Research serves as the state of the art reference book in the field of tourism, hospitality and allied fields such leisure, recreation, and services management .

Sustainable Logistics and Supply Chains Meng Lu,Joost De Bock,2015-09-04 This book addresses the main challenges affecting modern logistics and supply chains and is organized according to five main themes: supply chain strategy and management, information and communication technology

(ICT) for logistics and related business models, vertical and horizontal collaboration, intelligent hubs (e.g. ports and cities) and policy for sustainable logistics. The key findings presented are based on both extensive research and on business cases. The book examines logistics from a comprehensive viewpoint embracing the entire supply chain. The overarching advanced logistics and supply chain concept at the heart of this book endeavors to contribute to a sustainable intelligent transport system by making it more efficient, cost-effective, safe, reliable and competitive. Specifically, the book focuses on the need for a variety of supply chain, logistics and transport options, on the potential offered by technological developments, infrastructural and organizational aspects, information flows, the financial and legal domain, harmonization and the complexity of implementation. In closing, the book presents new approaches to the coordination of sound business and governance models.

The Mathematics Teacher Education Partnership W. Gary Martin, Brian R. Lawler, Alyson E. Lischka, Wendy M. Smith, 2020-01-01 This book provides an overview of a body of work conducted over the past seven years related to the preparation of secondary mathematics teachers by the Mathematics Teacher Education Partnership (MTE-Partnership), a national consortium of more than 90

universities and 100 school systems. The MTE-Partnership is organized as a Networked Improvement Community (NIC), which combines the disciplined inquiry of improvement science with the power of networking to accelerate improvement by engaging a broad set of participants. The MTE-Partnership is addressing key challenges in secondary mathematics teacher preparation, including: • Supporting the development of content knowledge relevant to teaching secondary mathematics; • Providing effective clinical experiences to teacher candidates; • Recruiting secondary mathematics teacher candidates, ensuring program completion and their subsequent retention in the field as early career teachers; • Supporting overall transformation of secondary mathematics teacher preparation in alignment with these challenges; • Ensuring a focus on equity and social justice in secondary mathematics teacher recruitment, preparation, and induction. This book outlines existing knowledge related to each of these key challenges, as well as the work of Research Action Clusters (RACs) formed to address the challenges. Each RAC includes participants from multiple institutions who work collaboratively to iteratively develop, test, and refine processes and products that can help programs more effectively prepare secondary mathematics teacher candidates. The book describes promising approaches to improving aspects of secondary mathematics teacher preparation developed by the RACs, including specific products that have been developed, which will inform the work of others involved in secondary mathematics teacher preparation. In addition, reflections on the use of the NIC model provides insights for others considering this research design. Particular references to the Standards for Preparing Teachers of Mathematics (Association of Mathematics Teacher Educators, 2017) are included throughout the book.

Heavy Metal Contamination of Soils Irena Sherameti,Ajit Varma,2015-04-06 Following a description of the various sources and factors influencing the contents of heavy metal pollution in

post-catastrophic and agricultural soils, subsequent chapters examine soil enzymes and eggs as bio-monitors, lead adsorption, the effects of arsenic on microbial diversity, and the effects of Mediterranean grasslands on abandoned mines. A third section focuses on the adaptation strategies used by plants and bacteria, such as *Pinus sylvestris* in industrial areas, and the rhizosphere in contaminated tropical soils and soil treated with sewage sludge. Further topics addressed include strategies of bioremediation, e.g. using transgenic plants as tools for soil remediation. This new volume on heavy metals in soil will be of interest to researchers and scholars in microbial and plant biotechnology, agriculture, the environmental sciences and soil ecology.

Nature Conservation in Europe Graham Tucker, 2023-05-25 European ecosystems and species remain under pressure from intensive agriculture and forestry, fishing, pollution, urban sprawl, invasive species and climate change. This book provides a detailed description and critical analysis of nature conservation responses, achievements and failures, motivated by the concerning state of nature and missed biodiversity targets. It summarises Europe's nature and the impact of human activities, and then gives an overview of relevant international biodiversity treaties and the EU nature conservation policy and legislative framework. The core of the book comprises chapters written by national experts, which cover the UK and twenty-five EU Member States, providing comparative case studies from which valuable lessons are drawn. Covering wide-ranging topics such as biodiversity pressures, legislation and governance, biodiversity strategies, species protection, protected areas, habitat management, and funding, this book is of interest to a wide audience, including academics and professionals involved in nature conservation and related environmental fields.

Large-Scale Ecology: Model Systems to Global Perspectives, 2016-10-05 Advances in Ecological Research is one of the most successful series in the highly competitive field of ecology.

This thematic volume focuses on large scale ecology, publishing important reviews that contribute to our understanding of the field. Presents the most updated information on the field of large scale ecology, publishing topical and important reviews Provides all information that relates to a thorough understanding of the field Includes data on physiology, populations, and communities of plants and animals

Introduction to Population Ecology Larry L. Rockwood, 2015-03-23 Introduction to Population Ecology, 2nd Edition is a comprehensive textbook covering all aspects of population ecology. It uses a wide variety of field and laboratory examples, botanical to zoological, from the tropics to the tundra, to illustrate the fundamental laws of population ecology. Controversies in population ecology are brought fully up to date in this edition, with many brand new and revised examples and data. Each chapter provides an overview of how population theory has developed, followed by descriptions of laboratory and field studies that have been inspired by the theory. Topics explored include single-species population growth and self-limitation, life histories, metapopulations and a wide range of interspecific interactions including competition, mutualism, parasite-host, predator-prey and plant-herbivore. An additional final chapter, new for the second edition, considers multi-trophic and other complex interactions among species. Throughout the book, the mathematics involved is explained with a step-by-step approach, and graphs and other visual aids are used to present a clear illustration of how the models work. Such features make this an accessible introduction to population ecology; essential reading for undergraduate and graduate students taking courses in population ecology, applied ecology, conservation ecology, and conservation biology, including those with little mathematical experience.

The Learning and Development of Mathematics Teacher Educators Merrilyn Goos, Kim

Beswick,2021-04-07 Research in mathematics teacher education as a distinctive field of inquiry has grown substantially over the past 10-15 years. Within this field there is emerging interest in how mathematics teacher educators (MTEs) themselves learn and develop. Until recently there were few published studies on this topic, and the processes by which mathematics teacher educators learn, and the forms of knowledge they require for effective practice, had not been systematically investigated. However, researchers in mathematics education are now beginning to investigate the development of MTE expertise and associated issues. This volume draws on the latest research and thinking in this area is therefore timely to stimulate future development and directions. It will survey the emerging field of inquiry in mathematics education, combining the work of established scholars with perspectives of newcomers to the field, with the aim of influencing development of the field, invite cross-cultural comparisons in becoming a mathematics teacher educator by highlighting issues in the development of MTEs in different countries, and examine the roles of both mathematics educators and mathematicians in preparing future teachers of mathematics. The primary audience will be university-based mathematics teacher educators and MTE researchers, and postgraduate research students who are seeking academic careers as MTEs. Additional interest may come from teacher educators in disciplines other than mathematics, and education policy makers responsible for accreditation and quality control of initial teacher education programs.

Heritage, Culture and Society Salleh Mohd Radzi, Mohd Hafiz Mohd Hanafiah, Norzuwana Sumarjan, Zurinawati Mohi, Didi Sukyadi, Karim Suryadi, Pupung Purnawarman, 2016-10-26 Heritage, Culture and Society contains the papers presented at the 3rd International Hospitality and Tourism Conference (IHTC2016) & 2nd International Seminar on Tourism (ISOT 2016), Bandung, Indonesia, 10—12 October 2016). The book covers 7 themes: i) Hospitality and tourism management ii)

Hospitality and tourism marketing iii) Current trends in hospitality and tourism management iv) Technology and innovation in hospitality and tourism v) Sustainable tourism vi) Gastronomy, foodservice and food safety, and vii) Relevant areas in hospitality and tourism Heritage, Culture and Society is a significant contribution to the literature on Hospitality and Tourism, and will be of interest to professionals and academia in both areas.

World Heritage, Place Making and Sustainable Tourism Kurt Luger, Matthias Ripp, 2020-12-10 The management of World Heritage Cities and sites is a challenging task. Getting visitor flows and the enormous traffic under control and implementing urban development projects in ways that preserve the integrity and authenticity of cultural heritage requires a high level of expertise, backed by the support of civil society and politics. This book is the result of the 2018 Conference of the Organization of World Heritage Cities, held by the Regional Secretariat for Northwest Europe and North America in Amsterdam, with the theme Heritage & Tourism: Local Communities and Visitors – Sharing Responsibilities. The contributing expert authors – from Africa, the Americas, Asia, and Europe – draw on a range of disciplines to offer wider perspectives, stimulating dialogue among the spheres of heritage, sustainable tourism, and spatial planning. An updated chapter offers perspectives on sustainable tourism also after the COVID-19 pandemic.

Designing Sustainability for All Carlo Vezzoli, Brenda Garcia Parra, Cindy Kohtala, 2021-04-21 This open access book introduces design for Sustainable Product-Service Systems (S.PSS) and for Sustainable Distributed Economies (S.DE). These are introduced as technical and operative tools for the development of a new generation of designers, responsible and capable of designing environmentally, socially and economically sustainable solutions, accessible to all. The book provides a comprehensive framework and also practical tools to support the system design for sustainability

process. It overviews methodologies, tools and strategies for Sustainable PSS design applied to Distributed Economies (DE) and provides strategies and design guidelines. All of these are highlighted and expanded upon with international case studies.

The Palgrave Handbook of Ageing and Physical Activity Promotion Samuel R.

Nyman, Anna Barker, Terry Haines, Khim Horton, Charles Musselwhite, Geeske Peeters, Christina R. Victor, Julia Katharina Wolff, 2018-03-31 The ageing of our population is a key societal issue across the globe. Although people are living longer, they need to be living longer in good health to continue to enjoy quality of life and independence and to prevent rises in health and social care costs. This timely and ground-breaking volume will provide an up-to-date overview of the factors that promote physical activity in later life. Despite advances in the fields of gerontology and geriatrics, sports and exercise science, sociology, health psychology, and public health, knowledge is largely contained within disciplines as reflected in the current provision of academic texts on this subject. To truly address the present and substantial societal challenges of population ageing, a multidisciplinary and collaborative approach is required. This handbook will inform researchers, students, and practitioners on the current evidence base for what physical activities need to be promoted among older people and how they can be implemented to maximise engagement. This handbook will be an invaluable resource for researchers, practitioners, policy makers, and students across the social sciences.

Understanding and Teaching Primary History James Percival, 2020-03-09 Primary history is one of the richest areas of teaching and learning, but in order to teach it well you need a strong understanding of key historical concepts and the content of the national curriculum. Combining a detailed focus on the core skills and principles underpinning good history teaching, this book will help you to:

- appreciate the key concepts that underpin historical understanding
- engage deeply with the

programmes of study for Key Stage 1 and 2 · understand the links between historical reasoning and constructivist accounts of how children learn · apply a cross-curricular approach to your teaching · assess children's historical understanding

Routledge Handbook of Wine Tourism Saurabh Kumar Dixit, 2022-11-25 Wine tourism or enotourism or oenotourism or winery tourism or vinitourism is a special interest tourism that empowers local culture and spawns business opportunities for the local community. The comprehensive Routledge Handbook of Wine Tourism offers a thorough inquiry into both regular and emerging issues of wine tourism. Modern wine tourism extends beyond the mere cultivation of grapes and the production and selling of wine. The Routledge Handbook of Wine Tourism examines the complex interplay of market profiling, sustainable regional development, and innovative experiential marketing constructs which, when successful, contribute to the growth and sustainable evolution of global wine tourism. This handbook examines how the success of various enotourism events such as vineyard visits, winery tours, wine festivals and wine trails can stimulate the development of wine-producing regions and territories. Incorporating the latest philosophies and research themes, this handbook will be an essential reference for students, researchers, academics and industry practitioners of hospitality and tourism, gastronomy, management, marketing, cultural studies, development studies, international business and for encouraging dialogue across disciplinary boundaries.
