*Urban Street Design & Planning* A. Pratelli, 2013-12-04

This second book of the series on Transport Systems and Traffic Engineering addresses operational, safety, costs, benefits, control and geometrical aspects associated with street design and roadway network planning in urban areas. The design features and planning goals consider urban-sensitive solutions for coping with motorized traffic, pedestrians and public transport passengers. Great emphasis is placed on the critical interactions involved with traffic safety problems. The included papers offer a variety of sample studies and developed projects and provide useful references to academics and traffic engineers. One of the most noteworthy characteristics of this book is that the reported experiences come from different national policies and standard requirements as well as local guidelines. As such it provides a well-structured and consistent book that will be of great interest to those working in this field.

*The Minard System* Sandra Rendgen, 2018-11-13 If you have any interest in information graphics, maps, or history, you know of the seminal flow map of Napoleon's 1812 march into Russia by Charles-Joseph Minard, made famous by Edward Tufte, and considered to be one of the most magnificent data graphics ever produced. The Minard System explores the nineteenth-century civil engineer's career and the story behind this masterpiece of multivariate data, as well as sixty of Minard's other statistical graphics reflecting social and economic changes of the Industrial Revolution in Europe and around the world. These stunning drawings are from the collection of the École Nationale des Ponts et Chaussées in Paris and have never before been published in their entirety.

**World War II Map by Map** DK,2019-09-03 Trace the epic history of World War II across the globe with more than 100 detailed maps. In this stunning visual history book, custom maps tell the story of the Second World War from the rise of the Axis powers to the dropping of the atom bomb on Hiroshima and Nagasaki. Each map is rich with detail and graphics, helping you to chart the progress of key events of World War II on land, sea, and air, such as the Dunkirk evacuation, the attack on Pearl Harbor, the D-Day landings, and the siege of Stalingrad. Historical maps from both Allied and Axis countries also offer unique insights into the events. There are timelines to help you follow the story as it unfolds, while narrative overviews explain the social, economic, political, and technical developments at the time. Fascinating, large-scale pictures introduce topics such as the Holocaust, blitzkrieg, kamikaze warfare, and code-breaking. Written by a team of historians in consultation with Richard Overy, *World War II Map by Map* examines how the deadliest conflict in history changed the face of our world. It is perfect for students, general readers, and military history enthusiasts.
