Soo,2003-05-15 PRIMA 2000 was the third in the series of Pacific Rim International Workshops on Multi-Agents. It was held on August 28-29, 2000, in Melbourne, Australia in conjunction with the Pacific Rim International Conference on Artificial Intelligence 2000. PRIMA is the main forum for the agent or multi-agent researchers in Pacific Rim countries to exchange and discuss their research results. This volume contains selected papers from PRIMA 2000. It covers theory, design, and applications of intelligent agents. The specific aspects include coordination, negotiation, learning, architecture, specification, allocation, and application of intelligent agents. All papers are of high quality because each of them was reviewed and recommended by at least two international renowned program committee members. Many people contributed to this volume. We would like to thank all the authors who submitted papers to the workshop. Many thanks also to the members of the program committee who diligently reviewed all the papers. Finally, we thank the editorial staff of Springer-Verlag for publishing this volume in the Lecture Notes in Artificial Intelligence series.

Rheubert,Dustin S. Siegel,Stanley E. Trauth,2014-12-19 Reproductive Biology and Phylogeny of Lizards and Tuatara is a remarkable compendium of chapters written by the world's leading experts from over four continents. The book begins with a chapter recounting historical discoveries in reproductive biology and a review of phylogenetics and up-to-date hypotheses concerning evolutionary relationships among lizards. Following these chapters are detailed reviews with additional new data concerning chemical communication, sexual selection, reproductive cues, female reproductive anatomy, female reproductive cycles, oogenesis, parthenogenesis, male reproductive anatomy, male reproductive cycles, spermatogenesis, reproductive investment, viviparity and placentation, multiple paternity, and parental care. The book culminates in two chapters on tuatara reproduction giving unique insight into evolutionary patterns in reproductive biology in squamates and tuatara. This is an essential resource for anyone studying reproduction in reptiles and/or

vertebrates and offers a fascinating read for those interested in reproductive biology.

**Hungry Roots** Ashli Quesinberry Stokes, Wendy Atkins-Sayre, 2024-04-25 A journey through Southern Appalachia to explore the complex messages food communicates about the region. Depictions of Appalachian food culture and practices often romanticize people in the region as good, simple, and, often, white. These stereotypes are harmful to the actual people they are meant to describe as well as to those they exclude. In *Hungry Roots: How Food Communicates Appalachia's Search for Resilience*, Ashli Quesinberry Stokes and Wendy Atkins-Sayre tell a more complicated story. The authors embark on a cultural tour through food and drinking establishments to investigate regional resilience in and through the plurality of traditions and communities that form the foodways of Southern Appalachia.

**WHO consolidated guidelines on tuberculosis. Module 4** World Health Organization, 2022-04-30 Between 2011 and 2019, WHO has developed and issued evidence-based policy recommendations on the treatment and care of patients with DR-TB. These policy recommendations have been presented in several WHO documents and their associated annexes, including the WHO Consolidated Guidelines on Drug Resistant Tuberculosis Treatment, issued by WHO in March 2019. The policy recommendations in each of these guidelines have been developed by WHO-convened Guideline Development Groups, using the GRADE (Grading of Recommendations, Assessment, Development and Evaluation) approach to summarize the evidence, and formulate policy recommendations and accompanying remarks. The present WHO Consolidated Guidelines on Tuberculosis, Module 4: Treatment - Drug-Resistant Tuberculosis Treatment includes a comprehensive set of WHO recommendations for the treatment and care of DR-TB. The document includes two new recommendations, one on the composition of shorter regimens and one on the use of the BPaL regimen (i.e. bedaquiline, pretomanid and linezolid). In addition, the consolidated guidelines include existing recommendations on treatment regimens for isoniazid-resistant TB and MDR/RR-TB, including longer regimens, culture monitoring of patients on treatment, the timing of antiretroviral therapy (ART) in MDR/RR-TB patients infected with the human immunodeficiency virus (HIV), the use of surgery for patients receiving MDR-TB treatment, and

optimal models of patient support and care. The guidelines are to be used primarily in national TB programmes, or their equivalents in Ministries of Health, and for other policy-makers and technical organizations working on TB and infectious diseases in public and private sectors and in the community.

Conversational structures of Alto Perené (Arawak) of Peru Elena Mihas, 2017-01-19 Drawing on extensive fieldwork in the research community, the book is a focused exploration of discourse patterns of Alto Perené Arawak, with emphasis on conversational structures. The book's methodological scaffold is based on proposals and insights from multiple research fields, such as comparative conversation analysis, sociology, interactional linguistics, documentary linguistics, anthropological linguistics, and prosodic typology. The interactional patterns of a small Arawak language of Peru are shown to share the common infrastructure reported in the organization of conversation across other languages and cultures. Yet the analysis demonstrates a variety of unique nuances in the organization of interactional behavior of Alto Perené Arawak participants. The peculiarities observed are attributed to the language-specific semiotic resources and

participants' orientation to the local cultural norms. The book's structured examination of conversational data of a small indigenous language of South America is anticipated to be of utility to linguistic research on understudied non-Western languages.
