The Italian Model of Management Luigi Serio,2018-04-27 This book is an essential resource for facilitators seeking to help students develop their knowledge of management practice in Italy. It presents a collection of the best case studies and accompanying teaching notes from the Italian Association for Management Development (ASFOR) competition in 2014. The cases are written by teachers across many of the members of ASFOR in Italy, leading business schools, corporate universities and academia. Knowledge gained by professionals often remains implicit and is rarely shared. By grouping together the award-winning case studies in this volume, readers can gain an important insight into how management is conducted in Italy. This collection shines a light on management practices across several industries. The Italian economy differs from others in that it is one in which small and family-run businesses dominate, and the relationship between the private sector and public life is unique. As a result, The Italian Model of Management provides the opportunity for students to enlarge the Anglo-Saxon model and perspective of management, and to offer cross-cultural learning experiences, based on the distinction of a "Made in Italy" competitive advantage. Each case provides an engaging story, plots the strategic development of the organization in question, and is supported by online teaching guidance and teaching notes.

Diffuse entrepreneurship and the very heart of «made in Italy», for fashion and luxury goods N. Giusti,2022-01-27 «Made in Italy» is a worldwide label for fashion and luxury brands. It suggests top quality as well as a sense of distinction and it is closely linked to famous brand names as well as entrepreneurs like Giorgio Armani, Miuccia Prada, Gianni Versace. Nevertheless, behind the sparkling names, made in Italy hides a set of entrepreneurial forms that are at the heart of peculiar Italian savoir-faire for fashion and luxury goods and that were, indeed, at the heart of the economic development of the country. Design, production and distribution of fashion and luxury goods in Italy have solid foundations in a diffuse network of independent enterprises that ensured economic and cultural development and innovation. The free, yet coordinated, initiative of small entrepreneurs, firmly rooted in the traditional structure of the Italian society, constitute the economic and social fabric behind the success of some of the well known large groups of the high end of the fashion and luxury system. This fabric of diffuse entrepreneurship is also actually ensuring the necessary variety of initiatives and countermeasures to face the crisis of this sector and to invent new solutions against the de-manufacturing and the fierce concurrence of the developing countries.
