UWB Communication Systems Maria-Gabriella Di Benedetto,2006 Ultrawideband (UWB) communication systems offer an unprecedented opportunity to impact the future communication world. The enormous available bandwidth, the wide scope of the data rate / range trade-off, as well as the potential for very low-cost operation leading to pervasive usage, all present a unique opportunity for UWB systems to impact the way people and intelligent machines communicate and interact with their environment. The aim of this book is to provide an overview of the state of the art of UWB systems from theory to applications. Due to the rapid progress of multidisciplinary UWB research, such an overview can only be achieved by combining the areas of expertise of several scientists in the field. More than 30 leading UWB researchers and practitioners have contributed to this book covering the major topics relevant to UWB. These topics include UWB signal processing, UWB channel measurement and modeling, higher-layer protocol issues, spatial aspects of UWB signaling, UWB regulation and standardization, implementation issues, and UWB applications as well as positioning. The book is targeted at advanced academic researchers, wireless designers, and graduate students wishing to greatly enhance their knowledge of all aspects of UWB systems

Information Technologies in the Development Strategies of Asia William R. Boulton,1999

Distance and Blended Learning in Asia Colin Latchem,Insung Jung,2009-07-15 Distance and Blended Learning in Asia is a unique and comprehensive overview of open, distance learning (ODL) and information and communication technology (ICT) in Asian education and training. Broad in coverage, this book critically examines ODL and ICT experiences from Japan to Turkey and from Sri Lanka to Mongolia – drawing conclusions from the successes and failures, and recommending ways in which planning, management and practice may be developed for the world's largest concentration of adult open and distance learners. This pioneering book draws on Asian theory, research and practice to identify the strengths, weaknesses and challenges in all sectors of Asian education and training. It critically and insightfully discusses the ideas, skills and practices that are necessary to advance knowledge in leadership and management, professional development, innovation and quality assurance and research and diffusion. Distance and Blended Learning in Asia provides an insightful, informative and critical review of ODL / ICT developments in schools, open schooling, colleges, universities, workplace training, professional development and non-formal adult and community education. The book is an invaluable reference for ODL / ICT professionals, educators and students anywhere in the world, and is essential reading for all of those involved in ODL / ICT in Asia.

Visualizing Information Using SVG and X3D Vladimir Geroimenko,Chaomei Chen,2005-12-06 Correcting the Great Mistake People often mistake one thing for another. That's human nature. However, one would expect the leaders in a particular field of endeavour to have superior abilities to discriminate among the developments within that field. That is why it is so perplexing that the technology elite – supposedly savvy folk such as software developers, marketers and businessmen – have continually mistaken Web-based graphics for something it is not. The first great graphics technology for the Web,VRML,has been mistaken for something else since its inception. Viewed variously as a game system,a format for architectural walkthroughs,a platform for multi-user chat and an augmentation of reality,VRML may qualify as the least understood invention in the history of information technology. Perhaps it is so because when VRML was originally introduced it was touted as a tool for putting the shopping malls of the world online,at once prosaic and horrifyingly mundane to those of us who were developing it. Perhaps those first two initials,“VR”,created expectations of sprawling,photorealistic fantasy landscapes for exploration and play across the Web. Or perhaps the magnitude of the invention was simply too great to be understood at the time by the many, ironically even by those spending the money to underwrite its development. Regardless of the reasons,VRML suffered in the mainstream as it was twisted to meet unintended ends and stretched far beyond its limitations.

Pediatric Amplification Ryan W. McCreery, Elizabeth A. Walker,2017-06-30 Pediatric Amplification: Enhancing Auditory Access is a comprehensive resource that focuses specifically on the process of fitting children with hearing aids, a population that is underrepresented in the scientific and clinical literature. The text is based on a theoretical framework that posits that well-fit, consistently worn hearing aids can optimize the auditory access of children with hearing loss. This theoretical framework serves as the basis for providing clinical care to children with hearing aids and their families. The content is organized around using best practices to provide aided audibility, promote consistent hearing aid use, and engage in high-quality linguistic input for children who wear hearing aids. The text is unique in its focus on the clinical management of amplification in the pediatric population using cutting-edge research based on the needs of children who are hard of hearing. It includes chapters dedicated to hearing assistance technology and case studies to illustrate the concepts presented. Pediatric Amplification is a professional resource for clinicians and audiologists who serve children who wear hearing aids and their families and can also be used in graduate courses for students in audiology, deaf education, and speech-language pathology.

Multimedia Networking Bohdan O. Szuprowicz,1995 An introduction to one of the most complex and hottest computer topics--the networking of multimedia systems. Cyber Law in Hong Kong Yun Zhao,2019-06-12 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical guide to cyber law – the law affecting information and communication

technology (ICT) – in Hong Kong covers every aspect of the subject, including intellectual property rights in the ICT sector, relevant competition rules, drafting and negotiating ICT-related contracts, electronic transactions, privacy issues, and computer crime. Lawyers who handle transnational matters will appreciate the detailed explanation of specific characteristics of practice and procedure. Following a general introduction, the book assembles its information and guidance in seven main areas of practice: the regulatory framework of the electronic communications market; software protection, legal protection of databases or chips, and other intellectual property matters; contracts with regard to software licensing and network services, with special attention to case law in this area; rules with regard to electronic evidence, regulation of electronic signatures, electronic banking, and electronic commerce; specific laws and regulations with respect to the liability of network operators and service providers and related product liability; protection of individual persons in the context of the processing of personal data and confidentiality; and the application of substantive criminal law in the area of ICT. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in Hong Kong will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative law in this relatively new and challenging field.

Production Networks in Southeast Asia Lili Yan Ing,Fukunari Kimura,2017-02-03 This book answers the recently topical questions of how China’s processed trade affects the trade of Southeast Asia. What is Southeast Asia’s role in Factory Asia, the region’s complex of cross-border supply chains? What is Southeast Asia’s involvement in building or joining production networks in the region? And, most important, how can Southeast Asia increase the value added of its products and improve its competitiveness? This book provides rigorous analysis of how trade policy affects value added, highly disaggregated at the firm and product level, of the six Southeast Asian countries – Indonesia, Malaysia, the Philippines, Singapore and Viet Nam – and combines this with thorough examinations of their trade, industrial and labour policies.

LatinX Voices Katie Coronado,Erica Kight,2018-07-16 LatinX Voices is the first undergraduate textbook that includes an overview of Hispanic/LatinX Media in the U.S. and gives readers an understanding of how media in the United States has transformed around this audience. Based on the authors’ professional and research experience, and teaching broadcast media courses in the classroom, this text covers the evolving industry and offers perspective on topics related to Latin-American areas of interest. With professional testimonials from those who have left their mark in print, radio, television, film and new media, this collection of chapters brings together expert voices in Hispanic/LatinX media from across the U.S., and explains the impact of this population on the media industry today.

Cities, Transport and Communications H. Dick,P. Rimmer,2003-08-01 This book shows the impact of globalization on Southeast Asia, which over a few decades has evolved from a loose set of war-torn ex-colonies to being a centre of global manufacturing. Focusing on cities, the authors explain the emergence of modern Southeast Asia and its increasing integration into the world economy by showing how technological change, economic development and politics have transformed the flows of goods, people and information.
