An Engraved Landscape: Rock carvings in the Wadi al-Ajal, Libya Tertina Barnett, 2023-02-23 An Engraved Landscape is a contextual analysis of a substantial new corpus of engravings from the Wadi al-Ajal, situated in the Central Saharan region of south west Libya. The wadi is renowned as the heartland of the Garamantian civilization, which emerged from local mobile Pastoral communities in the 1st millennium BC, and dominated trans-Saharan trade and politics for over a thousand years. Extensive archaeological and palaeoenvironmental investigations in recent years have provided detailed insight into the later prehistory and protohistory of the wadi and surrounding areas. However, prior to the fieldwork detailed in this work, only a handful of carvings had been recorded in the wadi. This work is based on systematic survey, conducted between 2004 and 2009, which recorded around 2,500 previously unknown or unpublished engraved and inscribed rock surfaces. All forms of engraving, whether figurative or surface markings, were viewed as significant residues of human interaction with the rock surface and were recorded. The resulting database provides an opportunity to analyze the engravings in relation to their changing physical and cultural contexts, and the discussion offers a fresh interpretation of Saharan rock art based on this substantial new evidence. An Engraved Landscape also captures in detail a unique heritage resource that is currently inaccessible and threatened. This record of the fragile engravings provides an important source of information for researchers and students.

Windows 10: The Missing Manual David Pogue, 2015-09-17 With Windows 8, Microsoft completely reimagined the graphical user interface for its operating system, which now runs on both desktop PCs and tablets, but the overhaul was not without hitches and its dueling UIs (one designed for touch, the other for keyboards and mice) created significant confusion for users. Windows 10 (a free update to users of Windows 8 or Windows 7) fixes a number of the problems introduced by the revolution in Windows 8 and offers plenty of new features, such as the new Spartan web browser, Cortana voice-activated "personal assistant," new universal apps (that run on tablet, phone, and computer), and more. But to really get the most out of the new operating system, you're going to need a guide. Thankfully, Windows 10: The Missing Manual will be there to help. Like its predecessors, this book from the founder of Yahoo Tech, previous New York Times

columnist, bestselling author, and Missing Manuals creator David Pogue illuminates its subject with technical insight, plenty of wit, and hardnosed objectivity for beginners, veteran standalone PC users, new tablet owners, and those who know their way around a network.

Design, User Experience, and Usability: Understanding Users and Contexts Aaron Marcus,Wentao Wang,2017-06-28 The three-volume set LNCS 10288, 10289, and 10290 constitutes the proceedings of the 6th International Conference on Design, User Experience, and Usability, DUXU 2017, held as part of the 19th International Conference on Human-Computer Interaction, HCII 2017, in Vancouver, BC, Canada, in July 2017, jointly with 14 other thematically similar conferences. The total of 1228 papers presented at the HCII 2017 conferences were carefully reviewed and selected from 4340 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 168 contributions included in the DUXU proceedings were carefully reviewed and selected for inclusion in this three-volume set. LNCS 10288: The 56 papers included in this volume are organized in topical sections on design thinking and design philosophy; aesthetics and perception in design; user experience evaluation methods and tools; user centered design in the software development lifecycle; DUXU education and training. LNCS 10289: The 56 papers included in this volume are organized in topical sections on persuasive and emotional design; mobile DUXU; designing the playing experience; designing the virtual, augmented and tangible experience; wearables and fashion technology. LNCS 10290: The 56 papers included in this volume are organized in topical sections on information design; understanding the user; DUXU for children and young users; DUXU for art, culture, tourism and environment; DUXU practice and case studies.

Math and Art Sasho Kalajdzievski,2021-09-26 Math and Art: An Introduction to Visual Mathematics explores the potential of mathematics to generate visually appealing objects and reveals some of the beauty of mathematics. It includes numerous illustrations, computer-generated graphics, photographs, and art reproductions to demonstrate how mathematics can inspire or generate art. Focusing on accessible, visually interesting, and

mathematically relevant topics, the text unifies mathematics subjects through their visual and conceptual beauty. Sequentially organized according to mathematical maturity level, each chapter covers a cross section of mathematics, from fundamental Euclidean geometry, tilings, and fractals to hyperbolic geometry, platonic solids, and topology. For art students, the book stresses an understanding of the mathematical background of relatively complicated yet intriguing visual objects. For science students, it presents various elegant mathematical theories and notions. Features Provides an accessible introduction to mathematics in art Supports the narrative with a self-contained mathematical theory, with complete proofs of the main results (including the classification theorem for similarities) Presents hundreds of figures, illustrations, computer-generated graphics, designs, photographs, and art reproductions, mainly presented in full color Includes 21 projects and approximately 280 exercises, about half of which are fully solved Covers Euclidean geometry, golden section, Fibonacci numbers, symmetries, tilings, similarities, fractals, cellular automata, inversion, hyperbolic geometry, perspective drawing, Platonic and Archimedean solids, and topology New to the Second Edition New exercises, projects and artworks Revised, reorganized and expanded chapters More use of color throughout

Processing for Android Andrés Colubri, 2017-11-02 Learn how to use the Processing programming language and environment to create Android applications with ease. This book covers the basics of the Processing language, allowing users to effectively program interactive graphics in 2D and 3D. It also details the application of these techniques to different types of Android devices (smartphones, tablets, wearables and smartwatches). Processing for Android walks you through the steps of taking an initial idea to a final app. With this book, you will be able to write engaging apps with interactive visuals driven by motion and location information obtained from the device's sensors; including health data from the wearer, like step count and heart rate. An advantage of Processing for Android over more complex programming environments is the ability for users to focus on the interactions and visual output of their code rather than in the implementation details of the Android platform. This book goes through a comprehensive series of hand-on projects, ranging from simple sketches to more complex projects involving sensors and integration with larger apps. It also covers important aspects such as exporting your Processing projects as signed apps are ready to upload to the Google Play store and be share with the world! What You'll Learn Write apps and live wallpapers for smartphones and tablets Design and implement interactive watch faces Create Virtual Reality experiences for Cardboard devices Integrate Processing sketches into larger apps and Android Studio Export projects as completed apps ready to distribute through Google Play Store Who This Book Is For Artists, designers, students, researchers, and hobbyists who are not necessarily Android experts, but are looking to write mobile apps that make creative use of interactive graphics, sensor data, and virtual reality.

Windows 8.1: The Missing Manual David Pogue, 2013-11-26 Windows 8.1 continues the evolution of the most radical redesign in Microsoft's history. It combines the familiar Windows desktop with a new, touchscreen-friendly world of tiles and full-screen apps. Luckily, David Pogue is back to help you make sense of it—with humor, authority, and 500 illustrations. The important stuff you need to know: What's new in 8.1. The update to 8.1 offers new apps, a universal Search, the return of the Start menu, and several zillion other nips and tucks. New features. Storage Spaces, Windows To Go, File Histories—if Microsoft wrote it, this book covers it. Security. Protect your PC from viruses, spyware, spam, sick hard drives, and out-of-control kids. The network. HomeGroups, connecting from the road, mail, Web, music streaming among PCs—this book has your network covered. The software. Media Center, Photo Gallery, Internet Explorer, speech recognition—this one

authoritative, witty guide makes it all crystal clear. It's the book that should have been in the box.

Perception R. Held, H.W. Leibowitz, H.L. Teubner, 2012-12-06 This volume was designed to focus on the problems of perception and originally was to have been solely edited by Professor Hans-Lukas Teuber who was a member of the editorial board which initiated production of the Handbook. Accordingly, he issued invitations to a number of researchers in perception asking them to contribute chapters written in a style described in his words: . . . I hope that no author will feel constrained to undertake a major search of the literature: he could invite, instead, on an area in which he has been quite active himself – and here most of the issues are immediately obvious to him. In this way, the writing of the chapter should be enjoyable rather than a chore . . . it should result in a personal account of the state of a given area rather than in an encyclopedic treatise . . . the field deserves this sort of summary review, particularly (if it is pointed toward the future and speeds the convergence of developments in sensory physiology and psychological studies of perception, With the growing burden of national and international commitments including departmental headship, Professor Teuber felt that it would be wise to share the editorial responsibilities for this volume and accordingly, asked Professors Richard Held and Herschel Leibowitz to co-edit the volume with him in the same spirit as outlined in his invitation to authors. They agreed to help in this task.

Collaborative Therapy with Multi-Stressed Families, Second Edition William C. Madsen, 2013-04-03 This text and professional resource offers an alternative approach to thinking about and working with “difficult” families. From a nonpathologizing stance, William C. Madsen demonstrates creative ways to help family members shift their relationship to longstanding problems; envision desired lives; and develop more proactive coping strategies. Anyone working with families in crisis, especially in settings where time and resources are scarce, will gain valuable insights and tools from this book.

Miscommunications Timothy Barker, Maria Korolkova, 2021-01-14 What happens when communication breaks down? Is it the condition for mistakes and errors that is characteristic of digital culture? And if mistakes and errors have a certain power, what stands behind it? To address these questions, this collection assembles a range of cutting-edge philosophical, socio-political, art historical and media theoretical inquiries that address contemporary culture as a terrain of miscommunication. If the period since the industrial revolution can be thought of as marked by the realisation of the possibilities for global communication, in terms of the telephone, telegraph, television, and finally the internet, *Miscommunications* shows that to think about the contemporary historical moment, a new history and theory of these devices needs to be written, one which illustrates the emergence of the current cultures of miscommunication and the powers of the false. The essays in the book chart the new conditions for discourse in the 21st century and collectively show how studies of communication can be refigured when we focus on the capacity for errors, accidents, mistakes, malfunctions and both intentional and non-intentional miscommunications.

Why Do Onions Make Me Cry? Jay Ingram, 2019-04-02 Discovery Channel host and acclaimed writer Jay Ingram helps you find the answers to questions you've never really settled, like “What is déjà vu?” “Why do we blink?”, “Why are yawns contagious?” and the perennial “Do we really use only 10% of our brains?” Note that this book is a combined

and abridged edition of *The Science of Why* and *The Science of Why2*. Have you ever wondered if people really do weird things during the full moon? How about whether fingernails grow faster than toenails? And do we really dream in color? Jay Ingram is here to put these and many other long-lived scientific uncertainties to rest in this whimsically illustrated guide to the science of everyday life. Combining the wit of *What If?* by Randall Munroe and the accessible science smarts of ASAP Science, this new collection features answers to common queries with part sections that address the supernatural, the human body, the animal kingdom, the natural world, and more. It includes fun facts, myth busters and line drawings, all with the end goal of delighting and surprising your inner science geek. Whether these questions have been on your mind constantly, or occasionally resurface like the myth of Loch Ness (Is it real?), whether they're silly (Why does my pee smell like asparagus?) or serious (Why does time speed up as I age?) or just plain frustrating (Why do mosquitoes love me?), Ingram will settle them once and for all.
