Take Control of macOS Media Apps Kirk McElhearn,2024-04-12 Discover Apple's Music, TV, Podcasts, and Books apps Version 1.9, updated April 12, 2024 Are you bewildered with the apps that replaced iTunes in macOS? Befuddled by Apple Music? Do you want to customize the Music app sidebar? Wish you could organize your podcasts? Wondering what the difference is between loves and stars? In this book, Kirk McElhearn (author of three previous Take Control titles on iTunes, going back to 2010) explains not only how Apple's media apps work, but also how normal people can make the Music, TV, Podcasts, and Books apps do what they want. Starting in macOS 10.15 Catalina, Apple finally did away with iTunes. In its place are three new apps—Music, TV, and Podcasts—with audiobooks now handled by the Books app and syncing of mobile devices handled by the Finder. Where once iTunes was an all-purpose media hub, now you may use up to five apps to accomplish the same things. The new apps also add more features (while, sadly, removing a few things too). Take Control of macOS Media Apps is your guide to the post-iTunes world. Kirk McElhearn, whose earlier books on iTunes 10, 11, and 12 collectively sold nearly 14,000 copies, is back with a new book that shows you how to manage your music, videos, podcasts, and audiobooks in Catalina and later. Whether you just want to play your media, or you want to go deeper with special features like Genius, Shuffle, Playing Next, Apple Music, and iTunes Match, this comprehensive guide has the answers you need. Kirk also looks at various ways of bringing audio and video into Apple's media apps, tagging songs and videos so you can find them more easily later, creating playlists, sharing your library over a home network, and syncing media with your iPhone, iPad, or iPod. The book covers how to: • Play Music: Learn the basics of playing audio (and even music videos) in the Music app. You'll also find tips on making quick playlists with Genius and Playing Next, learn the best ways to search for the music you want to hear, stream music to other devices in your home, and view lyrics while tunes play. • Stream Music: Use Apple Music, a paid service, to listen to any of 100 million tracks. Or listen to live broadcasts from Apple Music Radio (including Apple Music 1). • View Your Music and Other Content: Learn how to use the sidebar, view your music library, and work with contextual menus in the Music app. • Store Your Music Library in the Cloud: What are the pros and cons of using the Sync Library setting to store your music in the cloud? How do Music and iTunes Match figure out whether to upload your music when that setting is enabled? You'll get answers to these questions and more. • Use the iTunes Store: iTunes may be gone, but the iTunes Store is still open for business! Find tips on shopping in the iTunes Store, and get advice on sharing your purchases with family members and among your various Apple devices. • Tag Your Music: Tags are bits of information (also known as "metadata") that can describe your media. Learn which tags to bother changing, the best ways to add lyrics and album art, how to rate songs with stars, loves, or both, and more. • Organize Your Music: Make a simple playlist of romantic songs, workout songs, or whatever theme you like. You'll learn how to create smart playlists that, for example, comprise only your 5-star faves or only tunes you haven't heard recently, and how to transfer playlists to the Apple Watch. You'll also find help with operational issues like eliminating duplicates from your music library. • Manage and Share Media Files: Whether you want to casually share a playlist from your laptop when visiting a friend or you want to make all your media available on all your home's computers, you'll find out how Media Sharing and Home Sharing make sharing possible. You'll also learn how to manage massive media libraries and store media files on external drives. • Listen to Audiobooks: Discover how to download and play audiobooks in the Books app, and how to manage your audiobook library. • View Movies and TV Shows: Use the TV app (with or without the forthcoming Apple TV+ service) to watch videos, including those purchased or rented from the iTunes Store and those you add yourself. • Listen to and Watch Podcasts: You'll be sampling and subscribing to podcasts in no time with Kirk's advice, plus you'll pick a method of syncing podcast episodes to your iPhone or iPad and even learn about creating your own podcast station. • Sync Media: You've put all your media on your Mac...now, how do you transfer it to a mobile Apple device such as an iPhone, an iPad, an old-school iPod, or an Apple Watch? And how do you use an Apple TV to enjoy the media on your Mac? Learn the best approach for your situation. • Rip, Burn, and Print: Add content to your media apps with Kirk's detailed steps for "ripping" music CDs and audiobooks. Also learn how to burn music from Music onto a CD, and get directions for printing a song list—for example, to include in the jewel case of said CD. • Extend with AppleScript: Mac users can make the Music and TV apps do more with AppleScript. Learn about key AppleScripts that you can download to make your media apps jump through even more hoops.

Show Networks and Control Systems, Second Edition John Huntington,2017-11-02 Show Networks and Control Systems, the industry standard since 1994, is both a learning guide for beginners and a reference for experienced technicians. With its unique combined focus on computers, networks, and control systems, the book covers the art and practice of using these tools for live shows such as concerts, theatre productions, theme park attractions, themed-retail installations, cruise ship shows, museum exhibits, interactive media projects, and traditional performing arts. The book offers an in-depth examination of the technology used behind the scenes in lighting, lasers, audio, video, stage machinery, animatronics, special effects, and pyrotechnics and show control, the technique used to interconnect and synchronize two or more show systems. In this extensively revised and updated second edition (after three editions with the previous title, Control Systems for Live Entertainment), Huntington draws on more than three decades of experience in the field and classroom to clearly explain what goes on behind the scenes and inside the machines that bring bold performances to life in real-world settings.

Digital Music Wars Patrick Burkart,Tom McCourt,2006 With the rising popularity of online music, the nature of the music industry is rapidly changing. Rather than buying albums, tapes, or CDs, music shoppers can purchase just one song at a time. It's akin to putting a coin into a diner jukebox--except the jukebox is out in cyberspace. But has increasing copyright protection gone too far in keeping the music from the masses? The authors show how the online music industry will establish the model for digital distribution, cultural access, and consumer privacy. Digital Music Wars explores the far-reaching implications of downloading music in an in-depth and insightful way.

AUTOMATIC FINGER CONTROL U.S. SCHOOL OF MUSIC,2023-06-19 There are fifty-nine muscles in each arm, including the hand, which the Musician is called upon to use in his playing. If each of these are trained to the proper degree, the heaviest part of the task is accomplished, for not only does the control thus derived perfect technic and touch, it also helps to overcome nervousness, develops a velvety touch, becomes an invaluable aid to sight reading, and assists the student in gaining the power to accompany sympathetically and accurately at sight. It is not necessary to exercise each of these muscles separately. By careful study, the method of AUTOMATIC FINGER CONTROL has been reduced to twenty-four weeks' work. The exercises should be practiced the required number of times twice daily, preferably upon arising in the morning, and again in the evening. Each movement must be brisk, and as complete a contraction of the muscles involved as possible. Perform the work with one hand at a time rather

than trying to use both hands at once. Close mental attention to the movement involved will increase the benefits derived, especially in the case of those exercises which require that you set one muscle working in opposition to another. Do not, in your enthusiasm, practice these exercises more than directed, nor should you do them just before your work at the instrument. This Course comprises 31 exercises. As you will see from the lessons, it is not enough that each exercise be practiced a single week. Sometimes you will be required to work on a single exercise for two weeks in succession and from time to time the exercises will be reviewed. The 31 exercises have been collected and placed in numerical order at the back of the manuscript. The lessons are found in order at the front. At the bottom of each lesson page the exercises for the week are delegated. After you have studied your lesson sheet, turn to the exercises required, for the week's work, study them carefully and practice faithfully. Do not, under any circumstance, run ahead of your course. To get quick results, you must practice the exercises in the order given, devoting at least a week's time to each lesson. If you are just starting to learn your instrument, complete the first two lessons in AUTOMATIC FINGER CONTROL before you take up the practice on the instrument. Then take up the first instrumental lesson and do it in conjunction with Lesson Three of AUTOMATIC FINGER CONTROL. Always bear in mind that the main idea of this course is not the strength of the fingers, nor even their suppleness. The main idea is coordination between brain and muscle, training the muscles so as to overcome the tendency of the fingers to move more slowly than the mind. Therefore, give your entire thought and undivided attention to what you are doing as you practice the daily exercises. If you will do this, your progress will be rapid and sure
