Opening Doors: Orchestras, Opera Companies and Community Engagement Emily Dollman,2023-06-30 What is the role of classical music in the 21st century? How will classical musicians maintain their relevance and purpose? This book follows the working activities of professional orchestral musicians and opera singers as they move off stage into schools, community centres, prisons, libraries, and corporations, engaging with their communities in new, rich ways through education and community engagement programmes. Key examples of collaborative partnerships between orchestras, opera companies, schools and music services in the delivery of music education are investigated, with a focus on the UK's Music Hub system. The impact of these partnerships is examined, both in terms of how they inspire and foster the next generation of musicians as well as the extent to which they broaden access to quality music education. Detailed case studies are provided on the impact of classical music education programmes on social cohesion, health and wellbeing, and the education outcomes for students from low socio-economic communities. The implications for the future training of classical musicians are analysed, as are the new career paths for orchestral musicians and composers straddling performance and education. Opening Doors: Orchestras, Opera Companies and Community Engagement investigates the ways in which the classical music industry is reinventing its sense of purpose, never a more important or urgent pursuit than in the present decade.

Community Music at the Boundaries Lee Willingham,2021-04-06 Music lives where people live. Historically, music study has centred on the conservatory, which privileges the study of the Western European canon and Western European practice . The Eurocentric way music has been studied has excluded communities that are considered to be marginalized in one or more ways despite that the majority of human experiences with music is found outside of that realm. Community music has emerged as a counter-narrative to the hegemonic music canon: it seeks to increase the participation of those living on the boundaries. Community Music at the Boundaries explores music and music-making on those edges. "The real power of community music," writes Roger Mantie in the foreword, "lies not in the fiction of trying to eliminate boundaries (or pretending they don't exist), but in embracing the challenge of 'walking' them." Contributions from scholars and researchers, music practitioners, and administrators examine the intersection of music and communities in a variety of music-making forms: ensembles, university and police choirs, bands, prison performing groups, youth music groups, instrument classes, symphonies, drum circles, and musical direction and performance. Some of the topics explored in the volume include education and change, music and Indigenous communities, health and wellness, music by incarcerated persons, and cultural identity. By shining a light on boundaries, this volume provides a wealth of international perspectives and knowledge about the ways that music enhances lives.

Technovedanta Antonin Tuynman, 2016-09-09 Will the internet one day awaken as a conscious entity? Or do we need to design a structured architecture in order to impart the quality of consciousness to the web? In the present book *Technovedanta* an architecture for the internet as AwwwareNet is proposed based on stratifications derived from the Indian philosophy of Vedanta to create a functional mimic of consciousness, quasi-consciousness. The deep exploration in Nature's fundamental primacy of consciousness led me to the hypothesis of a panpsychic theory of everything. Welcome to a journey into the unfathomable realm of fantasy, the chaotic soup from which successful strategies are searched, pruned and concretised to fulfil the cosmo-semiotic imperative of ever increasing complexity and meta-variegation. Welcome to this book of books, a modern clavicula to engender the eschatological apotheosis of Vedantic Singularity. Welcome to the unusual marriage between Technology and Vedanta.

Musical Gentrification Petter Dyndahl, Sidsel Karlsen, Ruth Wright, 2020-09-02 *Musical Gentrification* is an exploration of the role of popular music in processes of socio-cultural inclusion and exclusion in a variety of contexts. Twelve chapters by international scholars reveal how cultural objects of relatively lower status, in this case popular musics, are made objects of acquisition by subjects or institutions of higher social status, thereby playing an important role in social elevation, mobility and distinction. The phenomenon of musical gentrification is approached from a variety of angles: theoretically, methodologically and with reference to a number of key issues in popular music, from class, gender and ethnicity to cultural consumption, activism, hegemony and musical agency. Drawing on a wide range of case studies, empirical examples and ethnographic data, this is a valuable study for scholars and researchers of Music Education, Ethnomusicology, Cultural Studies and Cultural Sociology. The Open Access version of this book, available at <http://www.taylorfrancis.com>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

Is Intelligence an Algorithm? Antonin Tuynman, 2018-01-26 How do we understand the world around us? How do we solve problems? Often the answer to these questions follows a certain pattern, an algorithm if you wish. This is the case when our analytical left-brain side is at work. However, there are also elements in our behaviour where intelligence appears to follow a more elusive path, which cannot easily be characterised as a specific sequence of steps. *Is Intelligence an Algorithm?* offers an insight into intelligence as it functions in nature, like human or animal intelligence, but also sheds light on modern developments in the field of artificial intelligence, proposing further architectural solutions for the creation of a so-called global Webmind.

Popular Culture, Pedagogy and Teacher Education Phil Benson, Alice Chik, 2014-01-10 The integration of popular culture into education is a pervasive theme at all educational levels and in all subject areas. *Popular Culture, Pedagogy and Teacher Education* explores how 'popular culture' and 'education' come together and interact in research and practice from an interdisciplinary perspective. The international case studies in this edited volume address issues related to: how popular culture 'teaches' our students and what they learn from it outside the classroom how popular culture connects education to students' lives how teachers 'use' popular culture in educational settings how far teachers should shape what students learn from engagement with popular culture in school how teacher educators can help teachers integrate popular culture into their teaching Providing vivid accounts of students, teachers and teacher educators, and drawing out the pedagogical implications of their work, this book will appeal to teachers and teacher educators who are searching for practical answers to the questions that the integration of popular culture into education poses for their work.

Aural and the University Music Undergraduate Colin R. Wright, 2016-12-14 Research indicates that aural skills are vital in developing musical expertise, yet the precise nature of those skills and the emphasis placed upon them in educational contexts merit closer attention and exploration. This book assesses the relevance of aural in a university music degree and as a preparation for the professional career of a classical musician. By way of the discussion of four empirical studies, two main areas are investigated: firstly, the relationship between university music students' aural ability and their overall success on a music degree programme, and, secondly, the views of music students and professional musicians about aural and its relevance to their career are analysed. The subject is investigated particularly in the light of the current socio-educational background of the past fifty years, which has greatly influenced the participation of music and the study and development of musicianship. Many related issues are touched upon as part of the research for this project, and these emerge as relevant topics in the discussion of aural. Apart from students' and musicians' views on training and singing, aspects considered include the role of improvisation, memorisation and notation, examinations, absolute pitch and the affinity with language, all of which have a part to play in the debate about the importance of aural.

Counterpoint: A Memoir of Bach and Mourning Philip Kennicott, 2020-02-18 A Pulitzer Prize-winning critic's "lyrical and haunting" (Alex Ross, *The New Yorker*) reflection on the meaning and emotional impact of a Bach masterwork. As his mother was dying, Philip Kennicott began to listen to the music of Bach obsessively. It was the only music that didn't seem trivial or irrelevant, and it enabled him to both experience her death and remove himself from it. For him, Bach's music held the elements of both joy and despair, life and its inevitable end. He spent the next five years trying to learn one of the composer's greatest keyboard masterpieces, the Goldberg Variations. In *Counterpoint*, he recounts his efforts to rise to the challenge, and to fight through his grief by coming to terms with his memories of a difficult, complicated childhood. He describes the joys of mastering some of the piano pieces, the frustrations that plague his understanding of others, the technical challenges they pose, and the surpassing beauty of the melodies, harmonies, and counterpoint that distinguish them. While exploring Bach's compositions he sketches a cultural history of playing the piano in the twentieth century. And he raises two questions that become increasingly interrelated, not unlike a contrapuntal passage in one of the variations itself: What does it mean to know a piece of music? What does it mean to know another human being?

Contexts for Music Learning and Participation Andrea Creech, Maria Varvarigou, Susan Hallam, 2020-07-27 This book sets out a contemporary perspective on music education, highlighting complex intersections between informal, non-formal and formal practices and contexts. At a time when the boundaries between music learning and participation are increasingly blurred, this volume is distinctive in challenging a 'siloed' approach to understanding the diverse international music education landscape. Instead, the book proposes a multi-layered continuum of practices that can be applied across a range of formal, informal or non-formal concepts to support the development of musical possible selves. It challenges existing conceptions of learning in music education in part by drawing on research in adult learning, but also by considering the contexts in which learning takes place, and the extent to which this learning can be classified as formal, informal or non-formal.

The Bloomsbury Handbook of Popular Music and Social Class Ian Peddie, 2020-02-06 The Bloomsbury Handbook of Popular Music and Social Class is the first extensive analysis of the most important themes and concepts in this field. Encompassing contemporary research in ethnomusicology, sociology, cultural studies, history, and race studies, the volume explores the intersections between music and class, and how the meanings of class are asserted and denied, confused and clarified, through music. With chapters on key genres, traditions, and subcultures, as well as fresh and engaging directions for future scholarship, the volume considers how music has thought about and articulated social class. It consists entirely of original contributions written by internationally renowned scholars, and provides an essential reference point for scholars interested in the relationship between popular music and social class.

The Death and Life of the Music Industry in the Digital Age Jim Rogers, 2013-05-09 Challenges the conventional wisdom that the internet is 'killing' the music industry.

The Great Music City Andrea Baker, 2019-03-01 In the 1960s, as gentrification took hold of New York City, Jane Jacobs predicted that the city would become the true player in the global system. Indeed, in the 21st century more meaningful comparisons can be made between cities than between nations and states. Based on case studies of Melbourne, Austin and Berlin, this book is the first in-depth study to combine academic and industry analysis of the music cities phenomenon. Using four distinctly defined algorithms as benchmarks, it interrogates Richard Florida's creative cities thesis and applies a much-needed synergy of urban sociology and musicology to the concept, mediated by a journalism lens. Building on seminal work by Robert Park, Lewis Mumford and Jane Jacobs, it argues that journalists are the cultural branders and street theorists whose ethnographic approach offers critical insights into the urban sociability of music activity.
