Teacher Evaluation in Music Cara Faith Bernard, Joseph Michael Abramo, 2019-01-04 *Teacher Evaluation in Music: A Guide for Music Teachers in the U. S.* aims to help music teachers navigate the controversial terrain of teacher evaluation. Rather than entering the debate on policy divorced from practice, this book is intended as a pragmatic approach to help music teachers to thrive within teacher evaluation systems and as a way to improve practice. Using Shulman's concept of content knowledge, general pedagogical knowledge, and pedagogical content knowledge, this book strives to help music teachers find a balance between advocating for themselves and their programs and for using teacher evaluation to improve their teaching. The book covers history of policy and law of teacher evaluation and the competing uses of teacher evaluation to rate teachers or as a professional development tool. The descriptions of policies, laws, and competing uses are approached in a way to help music teachers use teacher evaluation for their benefit to grow as professionals. This book has chapters devoted to giving detailed and specific strategies in key areas that research has suggested music teachers struggle to implement: questioning, literacy, differentiated instruction, and assessment. Complimenting these key areas are sample lesson plans which apply the strategies of questioning, differentiation, literacy, and assessment discussed in each chapter. These lessons serve as a resource and guide for teachers to develop their own lessons and improve their practice. The final chapter gives guidance on how music teachers may talk to administrators and evaluators to make teacher evaluation productive. Through these detailed descriptions of understanding teacher evaluation, talking to evaluators, and improving practice, music teachers may not just survive but thrive in these systems of accountability.

Ideas, Strategies, and Scenarios in Music Information Literacy Kathleen A. Abromeit, 2018-01-01 *Ideas, Strategies, and Scenarios in Music Information Literacy* offers expert guidance on planning and implementing information literacy instruction programs in a wide range of instructional situations and theoretical frameworks. The result is an exploration of various structures for engaging music students as reflective and engaged participants in today's complex

information environments. This rich time of change brings renewed interest in information literacy instruction and developing new skill sets for the shifting paradigms in librarianship, as recent educational reform movement shifts information literacy away from competency standards to a more complex set of core concepts associated with metaliteracy and cognition. This transformed world requires library environments to be inclusive with the resulting cultural evolution prompting a re-examination of how best to serve a population that represents diversity of all kinds: sexual, political, disabilities, national origin, socioeconomic, religion, linguistic, body size, age, and other dimensions. As music and performing arts librarians revisit information literacy instruction, this essential book serves as a guide to creating and maintaining quality instruction programs. Music Information Literacy includes a bibliography of a critical articles, books, association documents, and government data on information literacy in academic library instruction, intended to supplement the chapters on instructional theories and techniques, instructional modes, and building relationships and collaborations presented in this book.

What is Music Literacy? Paul Broomhead, 2018-06-27 What is Music Literacy? attempts to redefine music literacy with a more expansive meaning than is commonly in use, and to articulate the potential impact of these ideas on music teaching practice. The notion of music literacy has involved the ability to read and write music scores. However, this understanding does not extend theory to identify all music texts, nor to offer a thorough treatment of what impact an expanded notion of music literacy might have on music instruction in the classroom and in ensembles. This book provides a formal, expansive redefinition of music literacy. The author offers practical ideas for attending more effectively to music literacy in classroom instruction. The book highlights common elements in the music classroom: the music score, the conductor, surrounding ensemble members, the musical model, the musical instrument, and presentations/recordings. It also describes four orientations that correspond to the National Core Music Standards (2014) and that characterize humans' interactions with music: creator, performer, responder, and connector. What is Music Literacy? uses these orientations, along with a focus on authentic music texts and literacies, to present literacy-based guidelines for music education along with numerous vignettes that describe actual literacy instructional events.

Music and Social Justice Cathy Benedict,2020-12-18 In this book author Cathy Benedict challenges and reframes traditional ways of addressing many of the topics we have come to think of as social justice. Offering practical suggestions for helping both teachers and students think philosophically (and thus critically) about the world around them, each chapter engages with important themes through music making and learning as it presents scenarios, examples of dialogue with students, unit ideas and lesson plans geared toward elementary students (ages 6-14). Taken-for-granted subjects often considered beyond the understanding of elementary students such as friendship, racism, poverty, religion, and class are addressed and interrogated in such a way that honours the voice and critical thinking of the elementary student. Suggestions are given that help both teachers and students to pause, reflect and redirect dialogue with questions that uncover bias, misinformation and misunderstandings that too often stand in the way of coming to know and embracing difference. Guiding questions, which anchor many curricular mandates, are used throughout in order to scaffold critical and reflective thinking beginning in the earliest grades of elementary music education. Where does social justice reside? Whose voice is being heard and whose is being silenced? How do we come to think of and construct poverty? How is it that musics become used the way they are used? What happens to songs initially intended for socially driven purposes when their significance is undermined? These questions and more are explored encouraging music teachers to embrace a path toward socially just engagements at the elementary and middle school levels.
