**The Last Tortilla** Sergio Troncoso,2015-03-18 She asked me if I liked them. And what could I say? They were wonderful. From the very beginning of Sergio Troncoso's celebrated story *Angie Luna*, we know we are in the hands of a gifted storyteller. Born of Mexican immigrants, raised in El Paso, and now living in New York City, Troncoso has a rare knack for celebrating life. Writing in a straightforward, light-handed style reminiscent of Grace Paley and Raymond Carver, he spins charming tales that reflect his experiences in two worlds. Troncoso's *El Paso* is a normal town where common people who happen to be Mexican eat, sleep, fall in love, and undergo epiphanies just like everyone else. His tales are coming-of-age stories from the Mexican-American border, stories of the working class, stories of those coping with the trials of growing old in a rapidly changing society. He also explores New York with vignettes of life in the big city, capturing its loneliness and danger. Beginning with Troncoso's widely acclaimed story *Angie Luna*, the tale of a feverish love affair in which a young man rediscovers his Mexican heritage and learns how much love can hurt, these stories delve into the many dimensions of the human condition. We watch boys playing a game that begins innocently but takes a dangerous turn. We see an old Anglo woman befriending her Mexican gardener because both are lonely. We witness a man terrorized in his New York apartment, taking solace in memories of lost love. Two new stories will be welcomed by Troncoso's readers. *My Life in the City* relates a transplanted Texan's yearning for companionship in New York, while *The Last Tortilla* returns to the Southwest to explore family strains after a mother's death—and the secret behind that death. Each reflects an insight about the human heart that has already established the author's work in literary circles. Troncoso sets aside the polemics about social discomfort sometimes found in contemporary Chicano writing and focuses instead on the moral and intellectual lives of his characters. The twelve stories gathered here form a richly textured tapestry that adds to our understanding of what it is to be human.

**Practical Common Lisp** Peter Seibel,2006-11-01 \* Treats LISP as a language for commercial applications, not a language for academic AI concerns. This could be considered to be a secondary text for the Lisp course that most schools teach . This would appeal to students who sat through a LISP course in college without quite getting it - so a nostalgia approach, as in wow-lisp can be practical... \* Discusses the Lisp programming model and environment. Contains an introduction to the language and gives a thorough overview of all of Common Lisp's main features. \* Designed for experienced programmers no matter what languages they may be coming from and written for a modern audience—programmers who are familiar with languages like Java, Python, and Perl. \* Includes several examples of working code that actually does something useful like Web programming and database access.

**Machine Learning and Knowledge Discovery in Databases** José L. Balcázar,Francesco Bonchi,Aristides Gionis,Michèle Sebag,2010-08-17 The European Conference on Machine Learning and Principles and Practice of Knowledge Discovery in Databases, ECML PKDD 2010, was held in Barcelona, September 20–24, 2010, consolidating the long junction between the European Conference on Machine Learning (of which the first instance as European workshop dates back to 1986) and Principles and Practice of Knowledge Discovery in Data Bases (of which the first instance dates back to 1997). Since the two conferences were first collocated in 2001, both machine learning and data mining communities have realized how each discipline benefits from the advances, and participates to defining the challenges, of the sister discipline. Accordingly, a single ECML PKDD Steering Committee gathering senior members of both communities was appointed in 2008. In 2010, as in previous years, ECML PKDD lasted from Monday to Friday. It involved six plenary invited talks, by Christos Faloutsos, Jiawei Han, Hod Lipson, Leslie Pack Kaelbling, Tomaso Poggio, and Jürgen Schmidhuber, respectively. Monday and Friday were devoted to workshops and tutorials, organized and selected by Colin de la Higuera and Gemma Garriga. Continuing from ECML PKDD 2009, an industrial session managed by Taneli Mielikainen and Hugo Zaragoza welcomed distinguished speakers from the ML and DM industry: Rakesh Agrawal, Mayank Bawa, Ignasi Belda, Michael Berthold, José Luis Flórez, Thore Graepel, and Alejandro Jaimes. The conference also featured a discovery challenge, organized by András Benczur, Carlos Castillo, Zoltán Gyöngyi, and Julien Masezan.

López Rivero,2022-08-27 This book provides a forum for experts to present their latest research in disruptive technologies, promoting knowledge transfer. It is, therefore, a problem that needs to be addressed from an academic and multidisciplinary point of view, where experts in ethics and behavior work together with experts in new and disruptive technologies.
