G. Rozenberg, A. Salomaa

The Social Photo Nathan Jurgenson, 2019-04-30 A set of bold theoretical reflections on how the social photo has remade our world. With the rise of the smart phone and social media, cameras have become ubiquitous, infiltrating nearly every aspect of social life. The glowing camera screen is the lens through which many of seek to communicate our experience. But our thinking about photography has been slow to catch-up; this major fixture of everyday life is still often treated in the terms of art or journalism. In *The Social Photo*, social theorist Nathan Jurgenson develops bold new ways of understanding photography in the age of social media and the new kinds of images that have emerged: the selfie, the faux-vintage photo, the self-destructing image, the food photo. Jurgenson shows how these devices and platforms have remade the world and our understanding of ourselves within it.

The Book of L G. Rozenberg, A. Salomaa, 2012-12-06 This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here 0 stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with oh rather than zero, and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling DOL of DOL could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

The Evolution of American Educational Technology Paul Saettler, 2004-03-01 The primary purpose of this book is to trace the theoretical methodological foundations of American educational technology. It must be emphasized that this work is essentially as history of the process of educational technology rather than of products in the form of devices or media. Although media have played an important role in educational technology, the reader should not lose sight of the central process which characterizes and underlies the true historical meaning and function of educational technology. Moreover, the assumption is made that all current theory, methodology, and practice rests upon the heritage of the past. Indeed, a common problem in the field has been the failure, in many instances, to take adequate account of past history in planning for the present or the future. A related purpose of this book is to provide a selective survey of research in educational technology as it relates to the American public schools. Such research reviews are not intended to be comprehensive, but were included because of their historical importance and their relevance in understanding the process of educational technology.
