Features and Processing in Agreement Simona

Mancini, 2018-10-19 How do we comprehend language? Does our brain differentiate among the different types of grammatical and conceptual information that each sentence we read and listen to contains? Are these mechanisms sensitive to cross-linguistic similarities and differences? To answer these questions, this book provides a comprehensive overview of existing experimental and theoretical studies on language processing. Special emphasis is given here to the analysis of basic building blocks of language – features – and to an approach that relies on the fruitful interaction among theoretical linguistics, psycholinguistics and neuroscience.

Right Peripheral Fragments Javier Fernández-

Sánchez, 2020-02-15 In recent years, a number of authors (De Vries 2009, Truckenbrodt 2015, Ott and de Vries 2016, inter alia) have defended that right dislocations (RD) should be treated as bisentential structures, where the “dislocated” constituent is actually a remnant of a clausal ellipsis operation licensed under identity with an antecedent clause. Although Romance RD is a fertile area of research, the consequences of the biclausal analysis remain unexplored in these languages. This monograph intends to fill this gap. Adopting this approach not only solves some issues that have always been at the core of dislocation structures in general; it also allows us to uncover novel

sets of data and to provide straightforward explanations for well-known generalizations. Further, it brings RD along with a set of phenomena which are structurally very similar, like afterthoughts or split questions, which have been independently argued to display a bisentential structure. Under alternative, monoclausal approaches to RD, the striking similarities between these phenomena must be rendered anecdotal.

Portuguese-Spanish Interfaces Patrícia Amaral,Ana Maria Carvalho,2014-10-15 Portuguese-Spanish Interfaces captures the diversity of encounters that these languages have known and explores their relevance for current linguistic theories. The book focuses on dimensions along which Portuguese and Spanish can be fruitfully compared and highlights the theoretical value of exploring points of interaction between closely related varieties. It is unprecedented in its scope and unique in bringing together leading experts in a systematic study of similarities and differences between both languages. The authors explore the common boundaries of these languages within current theoretical frameworks, in an effort to combine scholarship that analyzes Portuguese and Spanish from multiple subfields of linguistics. The volume compares structures from both synchronic and diachronic points of view, addressing a range of issues pertaining to variability, acquisition, contact, and the formation of new languages. While it provides an up-to-date resource for scholars in the field, it can also be a useful companion for advanced students.

The Semantic Structure of Spanish Larry Dawain King, 1992-01-01

In recent years, linguistics has become increasingly more willing to allow some type of representation of 'meaning' in the study of language. However, most approaches deal with sentence or utterance meaning and thereby ignore the meaning of linguistic form. Yet no description of linguistic semantics can be complete without a comprehensive account between meaning and form. This study returns to the problem of form and meaning by presenting a detailed account of certain forms in Spanish which have traditionally been called grammatical forms, or grammatical categories, and associated with grammatical meaning. It is suggested that not all linguistic forms represent the same kind of 'meaning', and that a subset of grammatical forms constitute a highly organized system that parallels phonology and syntax in its capacity to explain variation at the level of discourse. The book opens with an introductory chapter, which is followed by five chapters on the analysis of the Spanish verbal system. In Chapter 7 problems of the noun phrase (the meaning of determiners and grammatical number) are discussed. Chapter 8 offers an explanation of the meaning of the direct object *a*, and in Chapter 9 a crosslinguistic study of the semantics of Spanish and English is presented. A

summary of findings is given in Chapter 10, along with a further consideration of the goals and procedures of semantic analysis.

In the Iberian Peninsula and Beyond Maria Filomena Lopes de Barros, Lúcia Liba Mucznik, José Alberto R. Silva Tavim, 2015-09-18 This book is the result of two scientific encounters hosted by the University of Évora in 2012, with the theme “Muslims and Jews in Portugal and the Diaspora. Identities and Memories (16th–17th centuries)”, and co-financed by the Foundation for Science and Technology, and by FEDER, through “Eixo I” of the “Programa Operacional Fatores de Competitividade” (POFC) of QREN (COMPETE). Beginning with an analysis of the forced conversion of Iberian Jews and Muslims, this volume examines the effects of this on their respective diasporas, focusing on a variety of approaches, from language and culture to identity discourses and interchanges between those communities.

Patriarcas, profetas, Buda, Jesús, María, José y socios, lamas y Mahoma se disculpan con sus seguidores por el milenario engaño que han promovido. Todas las figuras religiosas se promueven parasitando sueños, provocando en el soñante escenas e imágenes favorables o desfavorables según a ellas les

convenga. Sin este recurso, ellas no hubieran podido publicitarse. Dudas como éstas del Concilio Vaticano II quizá propiciaron el biocolapso ['fallecimiento'] de Juan XXIII.
