Ennio Morricone Alessandro De Rosa,2019-02-01 Master composer Ennio Morricone's scores go hand-in-hand with the idea of the Western film. Often considered the world's greatest living film composer, and most widely known for his innovative scores to The Good, the Bad, and the Ugly and the other Sergio Leone's movies, The Mission, Cinema Paradiso and more recently, The Hateful Eight, Morricone has spent the past 60 years reinventing the sound of cinema. In Ennio Morricone: In His

Own Words, composers Ennio Morricone and Alessandro De Rosa present a years-long discussion of life, music, and the marvelous and unpredictable ways that the two come into contact with and influence each other. The result is what Morricone himself defines: beyond a shadow of a doubt the best book ever written about me, the most authentic, the most detailed and well curated. The truest. Opening for the first time the door of his creative laboratory, Morricone offers an exhaustive and rich account of his life, from his early years of study to genre-defining collaborations with the most important Italian and international directors, including Leone, Bertolucci, Pasolini, Argento, Tornatore, Malick, Carpenter, Stone, Nichols, De Palma, Beatty, Levinson, Almodóvar, Polanski and Tarantino. In the process, Morricone unveils the curious relationship that links music and images in cinema, as well as the creative urgency at the foundation of his experimentations with absolute music. Throughout these conversations with De Rosa, Morricone dispenses invaluable insights not only on composing but also on the broader process of adaptation and what it means to be human. As he reminds us, Coming into contact with memories doesn't only entail the melancholy of something that slips away with time,

but also looking forward, understanding who I am now. And who knows what else may still happen.

Sonic the Hedgehog 30th Anniversary Special Ian Flynn, Gale Galligan, Justin McElroy, Travis McElroy, Griffin McElroy, 2021-06-23 After 30 years of going fast, it's time for fans to celebrate the speediest hedgehog of all time! It's an unbelievable birthday celebration for Sonic the Hedgehog with his first Classic Sonic special! First, in "Seasons of Chaos" by longtime Sonic scribe Ian Flynn and artists Aaron Hammerstrom & Reggie Graham, Sonic goes on an adventure from pleasant spring valleys to wintry wonderlands in search of the Chaos Emeralds. But Sonic's not alone, with a little help from his friends Miles "Tails" Prower, Knuckles the Echidna, Amy Rose, Mighty the Armadillo, and Ray the Flying Squirrel, they'll race, fight, and fly their way to victory against the baddest of baddies! Then, in "Dr. Eggman's Birthday," the vile, villainous Dr. Eggman takes center stage in a story written

by New York Times bestseller Gale Galligan (The Babysitters Club)! And how does the bad doctor celebrate the occasion? Only his Badniks know for sure... Finally, in Sonic Learns to Drive, Sonic's up against a tough challenge: Driving! When the fastest thing alive can outrun any car, will Sonic have the patience to learn... or will he finally get left in the dust? Written by the hosts of My Brother, My Brother, and Me, The Adventure Zone, and New York Times bestsellers, the McElroy Brothers! Grab a slice of chili dog cake and don't get left in the dust on the most way past cool book of the year!

From Snapshots to Social Media - The Changing Picture of Domestic Photography Risto

Sarvas, David M. Frohlich, 2011-02-09 From Snapshots to Social Media describes the history and future of domestic photography as mediated by technological change. Domestic photography refers to the culture of ordinary people capturing, sharing and using photographs, and is in a particular state of flux today as photos go digital. The book argues that this digital era is the third major chapter in the 170 year history of the area; following the portrait and Kodak eras of the past. History shows that despite

huge changes in photographic technology and the way it has been sold, people continue to use photographs to improve memory, support communication and reinforce identity. The future will involve a shift in the balance of these core activities and a replacement of the family album with various multimedia archives for individuals, families and communities. This raises a number of issues that should be taken into account when designing new technologies and business services in this area, including: the ownership and privacy of content, multimedia standards, home ICT infrastructure, and younger and older users of images. The book is a must for designers and engineers of imaging technology and social media who want a better understanding of the history of domestic photography in order to shape its future. It will also be of value to students and researchers in science and technology studies and visual culture, as a fascinating case study of the evolving use of photographs and photographic technology in Western society.

The Fractalist Benoit Mandelbrot, 2014-01-14 Here is the remarkable life story of Benoit Mandelbrot, the creator of fractal geometry, and his unparalleled contributions to science mathematics,

the financial world, and the arts. Mandelbrot recounts his early years in Warsaw and in Paris, where he was mentored by an eminent mathematician uncle, through his days evading the Nazis in occupied France, to his education at Caltech, Princeton, and MIT, and his illustrious career at the IBM Thomas J. Watson Research Center. An outside to mainstream scientific research, he managed to do what others had thought impossible: develop a new geometry that combines revelatory beauty with a radical way of unfolding formerly hidden scientific laws. In the process he was able to use geometry to solve fresh, real-world problems. With exuberance and an eloquent fluency, Benoit Mandelbrot recounts the high points of his fascinating life, offering us a glimpse into the evolution of his extraordinary mind. With full-color inserts and black-and-white photographs throughout.

Unpacking Duchamp Dalia Judovitz,1998-04-28 Transit, transitional, transition: Dalia Judovitz catches Marcel Duchamp on the run with his art in a suitcase and his thought all boxed and ready to go. . . . She demonstrates how the theme of transition, reappearing from work to work, makes each piece reproduce some other piece, while all continue to exemplify an original which can no longer be found and which has no creator.—Jean-François Lyotard

Beauty and the Beak Deborah Lee Rose,Jane Veltkamp,2019-03-27 Beauty and the Beak is a nonfiction picture book about Beauty, the wild bald eagle that made world news when she was illegally shot, rescued, and received a pioneering, 3D-printed prosthetic beak. Beauty and the Beak follows Beauty close up from the moment she uses her baby beak to emerge from her egg, through her hunt when she uses her powerful adult beak to feed herself, to the day her beak is shot off, leaving her helpless. This brave and uplifting story continues through her rescue, into the months of engineering her 3D-printed prosthetic beak and intense hours of her beak surgery, to the moment she takes the

first drink of water by herself with her new beak. Beauty and the Beak captures the spirit and courage of this amazing bird and America's national symbol--whose species was nearly wiped out by human activity, only to be restored and thriving because of environmental conservation and human compassion. This book will resonate with those who have their own stories of other animals endangered or in need, and humans, from young children to military veterans, in need of prosthetic limbs, who are being given new lives with state-of-the-art devices. The book includes expanded information about bald eagles as a top predator species, their near extinction in most of the U.S., their successful reintroduction back into the wild, and efforts to conserve this critical raptor species today.
