Visual Global Politics Roland Bleiker, 2018-02-13 We live in a visual age. Images and visual artefacts shape international events and our understanding of them. Photographs, film and television influence how we view and approach phenomena as diverse as war, diplomacy, financial crises and election campaigns. Other visual fields, from art and cartoons to maps, monuments and videogames, frame how politics is perceived and enacted. Drones, satellites and surveillance cameras watch us around the clock and deliver images that are then put to political use. Add to this that new technologies now allow for a rapid distribution of still and moving images around

the world. Digital media platforms, such as Twitter, YouTube, Facebook and Instagram, play an important role across the political spectrum, from terrorist recruitment drives to social justice campaigns. This book offers the first comprehensive engagement with visual global politics. Written by leading experts in numerous scholarly disciplines and presented in accessible and engaging language, Visual Global Politics is a one-stop source for students, scholars and practitioners interested in understanding the crucial and persistent role of images in today's world.

Making Room for People Lei Qu, Evert Hasselaar, 2011 Making Room for People elaborates on preferences in housing. It explores how users, occupants, and citizens can express their needs, searching for the enhancement of individual choice and control over their residential

environment, and the predicted positive spin-offs for urban collectives. The central question is: What are the conditions under which an increase of peoples choice and voice over the places they inhabit contribute to more liveable urban areas? The options to make choices and to have a say in urban design and housing matters are used as a conceptual framework. Choice and voice are the main concepts that structure the empirical material.

Civil-Military Change in China Elites, Institutes, and Ideas after the 16th Party Congress Larry

Wortzel, 2004 In November 2002, the Chinese Communist Party held its 16th Congress and formally initiated a sweeping turnover of senior leaders in both the Party and the People's Liberation Army (PLA). The meeting heralded not merely a new set of personalities in positions of political and military power, but also the emergence of a new generation of leaders. Who are these individuals, and what does their rise mean for the future of China and its military? The group of China specialists who have written this book have applied their research talents, intelligence, and hands-on experience to clarify and explain the most important issues of the day in China. China obviously matters to the United States because of its size, its spectacular patterns of growth, its profound problems linked to rapid growth, and its military intentions. These specialists have avoided the

diseases of bias, demagoguery, predispositions, and showmanship, which infect so many of the analyses of China. Rather, they have examined the facts and the trends to explain the divisions and cohesions in the Chinese leadership and their potential significance to the United States and the rest of the world. These annual conferences have a long continuity stretching back to the early 1990s. Hence, there is a common database for the books produced each year. The writers revisit major problems in China's development, particularly in the military sphere. They also examine how Chinese policies have evolved over the years, and how important the United States has been in influencing China's strategy. What, for instance, will the emerging leadership with its factious differences do about Taiwan and North Korea? The conference took place at the Carlisle Barracks in September 19- 21, 2003, and was sponsored by the American Enterprise Institute, the Heritage Foundation and the Army War College. The exchanges were frank, the atmosphere was filled with camaraderie and tension.

Military Threats Branslav L. Slantchev, 2011-02-03 Is military power central in determining which states get their voice heard? Must states run a high risk of war to communicate credible intent? In this book, Slantchev shows that states can often obtain concessions without incurring higher risks when they use military threats. Unlike diplomatic forms of communication, physical military moves improve a state's expected performance in war. If the opponent believes the threat, it will be more likely to back down. Military moves are also inherently costly, so only resolved states are willing to pay these costs. Slantchev argues that powerful states can secure better peaceful outcomes and lower the risk of war, but the likelihood of war depends on the extent to which a state is prepared to

use military threats to deter challenges to peace and compel concessions without fighting. The price of peace may therefore be large: states invest in military forces that are both costly and unused.

But something goes inexplicably wrong when many patients wind up dead, with two well-known operators as the prime suspects: Harley Quinn and Booster Gold! It's up to the DC Trinity of Superman, Wonder Woman and Batman to investigate-but can they get the job done in the face of overwhelming opposition? This collected edition features the entire nine-issue miniseries!

Cinematic Urban Geographies François Penz, Richard Koeck, 2017-07-12 This book proposes new methodological tools and approaches in order to tease out and elicit the

different facets of urban fragmentation through the medium of cinema and the moving image, as a contribution to our understanding of cities and their topographies. In doing so it makes a significant contribution to the literature in the growing field of cartographic cinema and urban cinematics, by charting the many trajectories and points of contact between film and its topographical context. Under the influence of new technologies, the opening and the availability of previously unexplored archives but also the contribution of new scholars with novel approaches in addition to new work by experienced academics, Cinematic Urban Geographies demonstrates how we can reread the cinematic past with a view to construct the urban present and anticipate its future.
