How Stock Investors Can Evaluate Portfolio Performance Titus Oniyilo,2016-03 The primary objective of this book is to delve into how institutional and individual stock investors can evaluate portfolio performance through a typical assessment of the endowment fund of the University of Ibadan, Nigeria's premier university, as an institutional investor, over an evaluation period of five years, relative to a benchmark portfolio. This is in line with the modern portfolio theory of Harry Markowitz (1952), a Nobel Prize winner in 1990. The book begins with an introduction in chapter one. Chapter two is a synthesis of what constitutes the modern portfolio theory as well as of empirical evidence on the applications of the theory and the alternative theories subsequently developed. Chapter three reveals the techniques for evaluating portfolio performance while chapter four discusses about endowment funds in general. Chapter five presents the results of the application of the evaluation techniques. In conclusion, chapter six rounds up with the summary, recommendations and bibliography.

Recent Advances in Microbiology Dana M. Santos,2011-12-15 Microbiology is the study of microorganisms (or microbes), which include bacteria, viruses, fungi, parasites, and even prions. In short, microbiology refers to the study of life and organisms that are too small to be seen with the naked eye. Microorganisms are found in almost every habitat present in nature and are vital to humans and the environment. While some microbes are harmful, causing diseases that harm and kill people, animals, and plants, they are exploited by researchers. They have uses in food, water treatment, science and medicine, energy, warfare, and much more. This new book presents a collection of new research and studies covering advances in microbiology dealing with medicine, agriculture, and more.
