Pragmatic Markers and Sociolinguistic Variation Gisle Andersen,2001 This book combines theoretical work in linguistic pragmatics and sociolinguistics with empirical work based on a corpus of London adolescent conversation. It makes a general contribution to the study of pragmatic markers, as it proposes an analytical model that involves notions such as subjectivity, interactional and textual capacity, and the distinction between contextual alignment/divergence. These notions are defined according to how information contained in an utterance interacts with the cognitive environment of the hearer. Moreover, the model captures the diachronic development of markers from lexical items via processes of grammaticalisation, arguing that markerhood may be viewed as a gradient phenomenon. The empirical work concerns the use of like as a marker, as well as a characteristic use of two originally interrogative forms, innit and is it, which are used as attitudinal markers throughout the inflectional paradigm, despite the fact that they contain a third person singular neuter pronoun. The author provides an in-depth analysis of these features in terms of pragmatic functions, diachronic development and sociolinguistic variation, thus adding support to the hypothesis that adolescents play an important role in language variation and change.

Pragmatic Markers and Propositional Attitude Gisle Andersen,Thorstein Fretheim,2000-07-15 In interactive discourse we not only express propositions, but we also express different attitudes to them. That is, we communicate how our mind entertains those propositions that we express. A speaker is able to express an attitude of belief, desire, hope, doubt, fear, regret or pretence that a given proposition represents a true state of affairs. This collection of papers explores the contribution of particles and other uninflected mood-indicating function words to the expression of propositional attitude in the broad sense. Some languages employ this type of attitude-marking device extensively, even for the expression of basic moods and basic speech act categories, other languages use such markers sparsely and always in interaction with syntactic form. Both types of language are examined in this volume, which includes studies of attitudinal markers in Amharic, English, Gascon, Occitan, German, Greek, Hausa, Hungarian, Japanese, Norwegian and Swahili. The theoretical emphasis is on issues such as interpretive vs. descriptive use of utterances or utterance parts, procedural semantics, linguistic underdetermination of the proposition expressed and the speaker's communicated attitude to it, higher-level explicatures in the relevance-theoretic sense, the explicit – implicit distinction, as well as processes of grammaticalization and negotiation of propositional attitude in spoken interaction.
