Photography After Capitalism Ben Burbridge, 2020-12-15 A polemical analysis of the politics and economics of today's vernacular photographic cultures. In *Photography After Capitalism*, Benedict Burbridge makes the case for a

radically expanded conception of photography, encompassing the types of labor too often obscured by black-boxed technologies, slick platform interfaces, and the compulsion to display lives to others. His lively and polemical analysis of today's vernacular photographic cultures shines new light on the hidden work of smartphone assembly teams, digital content moderators, Street View car drivers, Google "Scan-Ops," low-paid gallery interns, homeless participant photographers, and the photo-sharing masses. Bringing together cultural criticism, social history, and political philosophy, Burbridge examines how representations of our photographic lives—in advertising, journalism, scholarship and, particularly, contemporary art—shape a sense of what photography is and the social relations that comprise it. More precisely, he focuses on how different critical and creative strategies—from the appropriation of social media imagery to performative traversals of the network, from documentaries about secretive manual labor to science fiction fantasies of future sabotage—affect our understanding of photography's interactions with political and economic systems. Drawing insight and inspiration from recent analyses of digital labour, community economies and post-capitalism, Burbridge harnesses the ubiquity of photography to cognitively map contemporary capitalism in search of its weak spots and levers, sites of resistance, and opportunities to build better worlds.

Google Searching Like a Pro Scott La Counte, 2019-09-08 There's more to a Google search than meets the eye. On the surface, there's not a lot to it. You type in what you are looking for, click search, and go through the results. If that sounds like you, then you are only scratching the surface of what Google can do for you. There are certain filters and commands you can apply to your Google search that will make finding exactly what you want a

breeze. This book will walk you through all the different kinds of searches you can perform (like images, videos, and even the lowest prices on products), and show you how to make your search even more powerful. If you are ready to become an expert Google search pro in just a few minutes, then let's get started!

Your Face Belongs to Us Kashmir Hill, 2023-09-28 *LONGLISTED FOR THE FINANCIAL TIMES BUSINESS BOOK OF THE YEAR AWARD* 'The dystopian future portrayed in some science-fiction movies is already upon us. Kashmir Hill's fascinating book brings home the scary implications of this new reality' JOHN CARREYROU, author of *Bad Blood*

When Kashmir Hill stumbled upon Clearview AI, a mysterious startup selling an app that claimed it could identify anyone using just a snapshot of their face, the implications were terrifying. The app could use the photo to find your name, your social media profiles, your friends and family – even your home address. But this was just the start of a story more shocking than she could have imagined. Launched by computer engineer Hoan Ton-That and politician Richard Schwartz, and assisted by a cast of controversial characters on the alt-right, Clearview AI would quickly rise to the top, sharing its app with billionaires and law enforcement. In this riveting feat of reporting Hill weaves the story of Clearview AI with an exploration of how facial recognition technology is reshaping our lives, from its use by governments and companies like Google and Facebook (who decided it was too radical to release) to the consequences of racial and gender biases baked into the AI. Soon it could expand the reach of policing – as it has in China and Russia – and lead us into a dystopian future. *Your Face Belongs to Us* is a gripping

true story. It illuminates our tortured relationship with technology, the way it entertains us even as it exploits us, and it presents a powerful warning that in the absence of regulation, this technology will spell the end of our anonymity.

'I loved this. A dark and gripping story, meticulously researched and stylishly told' JENNY KLEEMAN, author of *Sex Robots & Vegan Meat*

Constructivism in Practical Philosophy James Lenman, Yonatan

Shemmer, 2012-08-02 This volume presents twelve original papers on constructivism - some sympathetic, others critical - by a distinguished group of moral philosophers. 'Kantian constructivism holds that moral objectivity is to be understood in terms of a suitably constructed social point of view that all can accept. Apart from the procedure of constructing the principles of justice, there are no moral facts.' So wrote John Rawls in his highly influential 1980 Dewey lectures 'Kantian Constructivism in Moral Theory'. Since then there has been much discussion of constructivist understandings, Kantian or otherwise, both of morality and of reason more generally. Such understandings typically seek to characterize the truth conditions of propositions in their target domain in maximally metaphysically unassuming ways, frequently in terms of the outcome of certain procedures or the passing of certain tests, procedures or tests that speak to the distinctively practical concerns of deliberating human agents living together in societies. But controversy abounds over the interpretation and the scope as well as the credibility of such constructivist ideas. The essays collected here reach to the heart of this contemporary philosophical debate, and offer a range of new approaches and perspectives.
