*Non-Consensus Investing* Rupal J. Bhansali,2019-10-01 At a time when many proclaim the death of active investing, Rupal J. Bhansali, global contrarian, makes a clarion call for its renaissance. Non-consensus thinking has resulted in breakthrough successes in science, sports, and Silicon Valley. Bhansali shows how to apply it to the world of investing to improve one's odds of achieving above-average returns with below-average risks. Her upside-down investment approach focuses on avoiding losers instead of picking the winners, asking the right questions instead of knowing the right answers, and scoring upset victories to achieve the greatest bang for one's research buck. Through a series of counterintuitive concepts and contemporary case studies from her firsthand experience of investing in fifty markets around the globe, Bhansali describes how to perform differentiated fundamental research to uncover mispriced stocks. She candidly shares her failures and mistakes as well as her successes and triumphs. She also weaves in her personal journey, recounting how she overcame the odds to succeed in a male-dominated profession and offering advice on breaking the glass ceiling. *Non-Consensus Investing* is a must-read for anyone who seeks to understand why active investing disappointed and how it can succeed—analysts and amateurs, fiduciaries and financial advisors, aspiring and practicing money managers, as well as students or investment enthusiasts.

*Growing Brands Through Sponsorship* Philip Gross,2014-11-07 Philip Gross addresses a new opportunity for growing brands that may reside within a sponsorship alliance. Typically, brands vie for image transfer from an event or other property when entering a sponsorship engagement. Yet this practice leaves a valuable part of a sponsorship alliance unexploited. Specifically, the author infers from theories of social and cognitive psychology to propose and test a research model that accounts for a sponsor to also gain from brand attitude and personality traits innately tied to a co-sponsor of the same event. The results provide evidence for direct image transfer between two sponsor brands. Hence, pairing with a co-sponsor might fortify or dilute a sponsor brand's image depending on the expediency of the image conveyed by that ally.

**Harnessing Novel Forms of Work Organization: Design Knowledge on Crowdfunding Platform Systems** Volkmar Mrass,2021-01-01 The digitalization is currently fundamentally changing our world of work. One important trend in this context is the "platform economy", with crowdfunding platforms as an increasingly relevant platform type. Many of these crowdfunding platforms and their surrounding work systems including participants, information, technologies, as well as processes and activities, are comparatively new and often designed incrementally. What is currently still lacking is systematic knowledge about the efficient design of such crowdfunding platform systems (CWPS). This dissertation provides such design knowledge in the form of a nascent design theory. One important focus lies on the question how such CWPS should be designed to also use this novel form of work organization for more complex work. This dissertation furthermore shows how a close interlinking of external crowds and internal employees of an organization helps to harness the advantages of crowdfunding while at the same time mitigates its disadvantages.

*The Agile Marketer* Roland Smart,2016-02-12 The marketer's guide to modernizing platforms and practices Marketing in the digital era is a whole new game: it's fundamentally about competing on the customer experience. Marketers must integrate a complex set of technologies to capture the customer's digital body language—and thereby deliver the right experiences, at the right times, via the right channels. This approach represents a formidable technological and practical challenge that few marketers have experience with. The methods that enable marketers to meet this challenge are emerging from an unexpected place: the world of software development. The Agile methodologies

that once revolutionized software development are now revolutionizing marketing. Agile provides the foundation for alignment between the marketing and product management sides. It can unleash a whole array of new marketing opportunities for growth hacking as well as for baking marketing directly into your products or services. Beyond that, as a discipline it can serve as a bridge to strategic alignment, positioning the chief marketing officer alongside the chief product officer as the two primary drivers of the business. Written by a premier practitioner of modern marketing, this book will provide you with: Insights on the evolution of product development and management in the organization—and why marketing must partner with them in the new era An understanding of Agile methods and their application to marketing A plan for integrating Agile with your traditional methods Tactics to drive alignment with product management A pathway to becoming the steward of customer experience Rich with examples, case studies, illustrations, and exercises drawn from the author's wide-ranging experience (from startups to a top global technology company), *The Agile Marketer* will help you transform marketing in your organization, in spirit and practice—and help realize its critical roles in product management and the customer experience.

*Schooling in the Workplace* Nancy Hoffman, 2011-11-01 Which non-American education systems best prepare young people for fulfilling jobs and successful adult lives? And what can the United States—where far too many young people currently enter adulthood without adequate preparation for the twenty-first-century job market—learn, adopt, and adapt from these other systems? In *Schooling in the Workplace*, Nancy Hoffman addresses these questions head on, arguing that “the smartest and quickest route to a wide variety of occupations for the majority of young people in the successful countries—not a default for failing students—is a vocational program that integrates work and learning.” As she notes, the programs that successfully integrate work and learning all share a fundamental commitment to helping young people find successful careers: “The purpose is not ‘college for all,’ as in the United States today, but rather to provide the education and training young people need to prepare for a career or calling.” *Schooling in the Workplace* explores the vocational education programs in a wide range of countries, focusing in rich and useful detail on six in particular: Australia, Austria, Germany, the Netherlands, Norway, and Switzerland. Framing these discussions, however, is a persistent focus on American circumstances and challenges. Far more than a survey of six “foreign” programs, this is a book prompted by and organized around the policy and practical challenges facing the United States.

*Stream Processing with Apache Spark* Gerard Maas, Francois Garillot, 2019-06-05 Before you can build analytics tools to gain quick insights, you first need to know how to process data in real time. With this practical guide, developers familiar with Apache Spark will learn how to put this in-memory framework to use for streaming data. Authors Gerard Maas and François Garillot help you explore the theoretical underpinnings of Apache Spark. This comprehensive guide features two sections that compare and contrast the streaming APIs Spark now supports: the original Spark Streaming library and the newer Structured Streaming API. Learn fundamental stream processing concepts and examine different streaming architectures Explore Structured Streaming through practical examples; learn different aspects of stream processing in detail Create and operate streaming jobs and applications with Spark Streaming; integrate Spark Streaming with other Spark APIs Learn advanced Spark Streaming techniques, including approximation algorithms and machine learning algorithms Compare Apache Spark to other stream processing projects, including Apache Storm, Apache Flink, and Apache Kafka Streams

**Towards a Secure and User Friendly Authentication Method for Public Wireless Networks** Carolin Latze, 2010 The goal of this thesis was to develop a secure and user friendly authentication scheme for public wireless networks (PWLANS). In contrast to private wireless networks, public wireless networks need a proper authentication scheme for several reasons. First of all, the network operator must be able to identify a user in case an incident happens. Furthermore, such networks are usually controlled by a commercial operator who will hardly allow access for free. This leads to the need for a secure and reliable authentication method. However, the authentication method must be userfriendly too in order to be acceptable. The only wireless networks users know so far are cellular networks, which are very easy to use. Users do therefore ask for a comparable experience in public wireless networks. This thesis evaluates the Trusted Platform Module (TPM) as an authentication device. The TPM is a small cryptographic module built into almost every new computer. This thesis shows how to use the TPM as an authentication device in EAPTLS. Furthermore, this thesis shows theoretical and real world evaluations of EAPTLS with the TPM. It will be shown that this authentication method provides a good level of security as well as good usability.

**Intimacy at Work** Stefana Broadbent, 2016-07 According to some social critics, the digital age involves a retreat into the isolation of intelligent machines. Acclaimed scholar Stefana Broadbent takes another view, that digital technologies allow people to bring their private lives into the often alienating world of work. Through ethnographic evidence and data gathered from large samples in Europe and the U.S., Intimacy at Work looks at a paradox in modern life: Although human beings today spend so much of their waking hours working, they remain increasingly connected to family and friends—because of digital and social media. This book -shows how portable communications sustain personal networks offering a sense of identity, comfort, support, and enjoyment in the workplace;- demonstrates through numerous case studies that digital technologies provide a kind of “safety net” in times of economic crisis, softening the precariousness of existence;- is a revised edition of a volume published in French (L'Intimité au Travail, 2011), which won the prestigious AFCI Prize for books on business communications.

**GUI Design** Shan ben tu shu, 2015 As technology has rapidly advanced, so too has the way we use and interact with it. Gone are the days of flat black backgrounds dotted with blocky green text; now, users expect a massive range of colors, layouts, and fonts to be

used to entertain and assist them in their daily lives. GUI Design assembles the best of recent graphic user interface for a collection that provides practical encouragement for those new to the world as well as inspiration for experienced designers. The book gathers Twitters Vine video creation app for Windows phones, the vulgar-yetamusing Authentic Weather app, an application designed to help tourists follow the physical and ideological path of the Iron Curtain, and more to showcase programs that balance information flow with user experiences and highlight the creativity, inspiration, and expressive techniques used in their design. The projects within demonstrate the increasingly significant role of user interfaces in both design and our everyday lives in the modern world.

**Someone Comes to Town, Someone Leaves Town** Cory Doctorow, 2018-05-22 The repackaged trade paperback of Cory Doctorow's miraculous novel of family history, Internet connectivity, and magical secrets—now with a new cover! Alan is a middle-aged entrepreneur who moves to a bohemian neighborhood of Toronto. Living next door is a young woman who reveals to him that she has wings—which grow back after each attempt to cut them off. Alan understands. He himself has a secret or two. His father is a mountain, his mother is a washing machine, and among his brothers are sets of Russian nesting dolls. Now two of the three dolls are on his doorstep, starving, because their innermost member has vanished. It appears that Davey, another brother who Alan and his siblings killed years ago, may have returned, bent on revenge. Under the circumstances it seems only reasonable for Alan to join a scheme to blanket Toronto with free wireless Internet, spearheaded by a brilliant technopunk who builds miracles from scavenged parts. But Alan's past won't leave him alone—and Davey isn't the only one gunning for him and his friends. Whipsawing between the preposterous, the amazing, and the deeply felt,

Someone Comes to Town, Someone Leaves Town is unlike any novel you have ever read.

Innovating the API Economy. Towards a validated human-centered workshop design

Tobias Blum, 2019-05-21 Diploma Thesis from the year 2016 in the subject Business economics - Information Management, grade: 5.25 (CHE-System), University of St. Gallen (Business Information Systems), language: English, abstract: The present thesis examines how a human-centered workshop design for finding use-cases for companies in the API economy could look like. For that aim the author used a qualitative exploration process and conducted interviews with 9 experts who have practical experiences in executing workshops and a theoretical background in the field of human-centered innovation to elaborate a first draft. The draft was then tested in four case studies to validate the methods. Based on the analysis of the workshop results and the participants' feedback a final proposal towards a validated workshop design is presented. The thesis proposes that the best results are reached by implementing two workshop modules. The first module is focusing on the data, services and potential services of a company, connecting it with stakeholders. The second module elaborates the specific requirements of the use-case by discovering the needs directly with a potential client (inside out approach). In the first module the main methods are brainstorming activities, progression curves and the stakeholder map; in the second the central elements are an adapted customer journey (API Service Blueprint) and prototyping. As a result, the technical term "API" is transformed to an approachable topic in a human-centered workshop by getting to know the own company, the API consumer, the end-user and using prototyping to visualize APIs in interfaces the user interacts with. The findings are tailored into a workshop proposal which considers not only the specific methods but also further success factors to provide a complete guideline for a human-centered workshop design.

*Align Client and Provider Perspectives* Lionel Haas, 2018-08-11 This book develops a common understanding between the client and the provider in each of the four stages of strategic outsourcing. These stages range from discovery, where the parties envision their future collaboration; planning, where they lay the ground work for the contract and the project; building, where they effectively carry out the work; and lastly to running, where they orchestrate the relationship on a daily basis to ensure that the new, enlarged company achieves the results sought. In a simple yet direct style, it highlights the dos and don'ts the parties should bear in mind at each stage of the process and combines both the client's and the provider's perspectives by comparing their respective involvement at each stage of the process and considering, equally, their obligations in establishing a balanced relationship. The book is primarily intended for those in the private sector with experience of dealing with complex outsourcing situations and who are looking for the small or bigger differentiators that will support their decisions and actions. The target audiences include, on the client side: CCOs, CIOs, lawyers, procurement managers, outsourcing consultants and IT Service managers and, on the provider side: account managers, bid managers, outsourcing project managers, operation managers and service managers. However, it is also useful for anybody involved in outsourcing who is seeking to develop a global understanding of the main processes and roles upstream and downstream in the chain.
