Since learning, teaching, and training in a mobile-saturated environment is a developing field, implications for a combined overview of these topics may be beneficial both for research and practice in the broader view of a user's lifespan. Mobile Technologies in Educational Organizations is a collection of innovative research on the methods and applications of mobile technologies in learning and training and explores best practices of mobile learning in organizations and the workplace. While highlighting topics including ethics, informal education, and virtual reality, this book is ideally designed for teachers, administrators, principals, higher education professionals, instructional designers, curriculum developers, managers, researchers, and students.

The Blind Advantage Bill Henderson, 2011-10-01 The Blind Advantage provides insight into the challenges, possibilities, and practicalities of including students with disabilities—and into the mind and heart of an inspired and determined leader. “You should get out of education.” That was the advice first-year teacher Bill Henderson received when he discovered he was gradually losing his vision. Instead, Henderson persevered and became principal of the Patrick O’Hearn Elementary School in Boston, an ethnically and economically diverse school where about a third of the students have mild, moderate, or significant disabilities. In The Blind Advantage, Henderson describes how the journey into blindness helped him develop key qualities—determination, vision, sensitivity, organization, collaboration, and humor—that made him a more effective principal. At the same time, he shows how the inclusionary policies and practices at the O’Hearn School (now renamed the William W. Henderson Inclusion Elementary School) elicited and developed these qualities in others. An audio version of this book is available for purchase. This audio version was created in collaboration with the Perkins Braille & Talking Book Library.

Long Time, No See Beth Finke, 2004-07-14 Long Time, No See is certainly an inspiring story, but Beth Finke does not aim to inspire. Eschewing reassuring platitudes and sensational pleas for sympathy, she charts her struggles with juvenile diabetes, blindness, and a host of other hardships, sharing her feelings of despair and frustration as well as her hard-won triumphs. Rejecting the label "courageous," she prefers to describe herself using the phrase her mother invoked in times of difficulty: "She did what she had to do." With unflinching candor and acerbic wit, Finke chronicles the progress of the juvenile diabetes that left her blind at the age of twenty-six as well as the seemingly endless spiral of adversity that followed. First she was

forced out of her professional job. Then she bore a multiply handicapped son. But she kept moving forward, confronting marital and financial problems and persevering through a rocky training period with a seeing-eye dog. Finke's life story and her commanding knowledge of her situation give readers a clear understanding of diabetes, blindness, and the issues faced by parents of children with significant disabilities. Because she has taken care to include accurate medical information as well as personal memoir, *Long Time, No See* serves as an excellent resource for others in similar situations and for professionals who deal with disabled adults or children.
