This classic handbook, which has literally taught more than a million people the basics of typing, can teach you too. Zoom-Type Renee R Ellison,2004-02-03 Teach yourself how to type in 5 days instead of wasting all year on it. Zoom-Type is a revolutionary breakthrough in teaching touch-typing FAST by using the right brain. 100s of quick snapshots and a musical finger march get you seeing, saying, and tapping the correct keys with the correct fingers in just 5 days (each session lasts 5 minutes). For ages 4 to 94. Totally portable-no computer necessary. This is the only right-brain typing course on the market. You'll be speed-typing while students trying other programs are still just getting started. Most computer-based programs designed to teach typing are still in the dark ages, pedagogically. The brain learns best by pictures. This typing course is unique in 3 ways: (1) Spaced repetition-five-minute lessons, several times a day! Away with hour-long drudgery! Rapid-fire quick imprints of the autonomic nervous system gets the job done. (2) Right brain-uses the picture side of the brain, not just the left side as other typing methods do. With Zoom-Type, you subconsciously learn where the letters LIVE, not just what they ARE. (3) Splintered skills-you learn each skill separately, in small increments, and then when you put them together all the brain has to do is jump the synapses between the already acquired mini-skills. The brain is tricked into thinking the whole task is super EASY. THIS VERSION IS ONLY THE PAPERBACK BOOK. IT IS POSSIBLE TO LEARN THIS PROGRAM WITH ONLY THIS BOOK, BUT USING THE AUDIO FILES IS HIGHLY RECOMMENDED. Contact Homeschool How-Tos at HOMESCHOOLHOWTOS.COM to order those MP-3 files for immediate download via WeTransfer.com after you received this book.

Journey To Empowerment: Tackling the Bullies Within Jacqueline A Hinds, 2019-09-23 The first time I realised I was actually being bullied was when I was in secondary school and, back then, the bullying stemmed more from rivalry than anything else. Even the teachers were trying to outdo each other, presenting the top student of their class and form group as 'the one' surpassing all others. Chapter 1-The School Yard Bully, Journey to Empowerment. These are the first powerful words to confront you as you begin reading Journey to Empowerment: Tackling the Bullies Within, Jacqueline A Hinds' insightful book into her own bullying, harassment and being ostracised experiences. A tapestry of her struggle on how she was treated from a young age well into her adulthood, it documents how abuse impacted her mind, dismantled her emotional state to the point of driving her into subsequent downturns and potential depression. But, with fortitude and drive, Jacqueline was able to overcome the toughest of challenges inflicted by those threatened by her talents, skill, and character.

Sapiens Yuval Noah Harari, 2015-02-10 New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity’s creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, Sapiens integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.
