48 Tips Everyone Should Know Gregory D. Evans, 2013-02 48 Tips Everyone Should Know: When It Comes To Protecting Your Computer Did you know that according to the FBI, 57% of computer crimes come from stolen computers? Today we keep our lives on a computer. From email, pictures, movies, music, finances, business plans, employee information to even the kids' book reports. What would you do if this information fell into the wrong hands? Every 6 seconds a personal computer is hacked into. Most consumers as well as businesses do not even know that they are being hacked. Think about it, if you have a virus or spyware on your computer, your anti-virus/spyware will pop up and alert you. If you are being hacked 99% of the firewall software installed on computers will not give you a pop up letting you know you are being hacked. 48 Tips Everyone Should Know, are simple layman tips every computer geek may already know but a non-computer geek may not.
