**Warhol-isms** Andy Warhol,2022-05-10 A unique collection of brilliant quotations from the legendary Pop artist One of the most influential artists of his time and ours, Andy Warhol is nearly as renowned for what he said as for what he did. Indeed, he is so quotable that things he never said are endlessly and plausibly attributed to him, including, fittingly, the most celebrated fake Warhol saying—"In the future, everyone will be world-famous for 15 minutes." Warhol-isms separates legend from fact to present a unique and comprehensive collection of authentic quotations from the Pop artist. Gathered from interviews and other primary sources, these deadpan, droll, ironic, and sincere gems—in which a superficial embrace of superficiality often disguises provocative, unconventional ideas—provide compelling insights into the life and work of an artist who has left an indelible mark on art and popular culture. Select quotations from the book: I think an artist is anybody who does something well.I went to [a psychiatrist] once, and he never called me back.They always say that time changes things, but you actually have to change them yourself.I've never met a person I couldn't call a beauty.New things are always better than old things.I'm still a commercial artist. I was always a commercial artist.

*M-libraries* Mohamed Ally,Gill Needham,2008 Mobile Phone Ownership is considerably more ubiquitous than internet access via personal computers: more and more people around the world are carrying a tiny mobile device of some kind in their pocket or handbag. The environment in which people find and use information is changing - we are busier, we are constantly on the move and whether we are shopping, booking a holiday or looking for train times we expect instant results. What does all this mean for libraries? The development of networked technologies opened up huge opportunities for libraries to make their resources and services accessible to their users regardless of distance. The opportunity to deliver these to users via their mobile phones, PDAs and other handheld devices will be as significant a challenge. Indeed, if libraries choose to ignore this challenge, they are in danger of being left behind in an increasingly competitive world of information provision and services. This authoritative collection of contributions from experts in the field, based on the First International M-Libraries Conference, explores the technical and social context for m-libraries, describes a range

of global initiatives with lessons learned, and discusses the potential for future development.--BOOK JACKET.
