Adult Neurogenesis Gerd Kempermann,2006 The discovery of adult neurogenesis and of stem cells in the brain has changed our view of the mature brain. Though we now know that the adult brain can make new neurons, it normally does so only in two privileged regions, the olfactory bulb and the hippocampus. Yet stem cells, which have the potential to produce new neurons, can be found throughout the adult brain. So why does the brain not make wider use of its potential for neurogenesis? And what is the function of new neurons and of neural stem cells in areas where they occur? After all, the brain regenerates poorly and many neurological and psychiatric disorders are chronic because cell replacement has not taken place. This is the first comprehensive, integrated account of one of the most exciting areas of neuroscience. It begins with the historical background and discusses theories of adult neurogenesis and neural stem cell biology in the context of learning and memory processes as well as structural plasticity. It describes in detail neurogenesis in the adult hippocampus and olfactory system and then surveys the regulatory, functional, and comparative aspects, concluding with a chapter on the provocative hypotheses that link failing adult neurogenesis with such diseases as temporal lobe epilepsy, major depression, brain tumors, and dementias. For graduate students, investigators, and clinicians in the neurosciences, developmental biology, and stem cell research, this book is a unique resource that sifts through the evidence for exciting scientific ideas and fosters a realistic view of the therapeutic possibilities for the use of stem cells in the adult brain.

Fictions of Authority Susan Sniader Lanser,1992 Annotation Writing from positions of cultural exclusion, women have faced constraints not only upon the content of fiction but upon the act of narration itself. Narrative voice thus becomes a matter not simply of technique but of social authority: how to speak publicly, to whom, and in whose name. Susan Sniader Lanser here explores patterns of narration in a wide range of novels by women of England, France, and the United States from the 1740s to the present. Drawing upon narratological and feminist theory, Lanser sheds new light on the history of voice as a narrative strategy and as a means of attaining social power.

Angry Public Rhetorics Celeste Michelle Condit,2018-08-07 In *Angry Public Rhetorics*, Celeste Condit explores emotions as motivators and organizers of collective action—a theory that treats humans as “symbol-using animals” to understand the patterns of leadership in global affairs—to account for the way in which anger produced similar rhetorics in three ideologically diverse voices surrounding 9/11: Osama bin Laden, President George W. Bush, and Susan Sontag. These voices show that anger is more effective for producing some collective actions, such as rallying supporters, reifying existing worldviews, motivating attack, enforcing shared norms, or threatening from positions of power; and less effective for others, like broadening thought, attracting new allies, adjudicating justice across cultural norms, or threatening from positions of weakness. Because social anger requires shared norms, collectivized anger cannot serve social justice. In order for anger to be a force for global justice, the world’s peoples must develop shared norms to direct discussion of international relations. *Angry Public Rhetorics* provides guidance for such public forums.

Moral Creativity John Wall,2005-08-11 Wall argues that moral life is inherently creative. In arguing his case, he places the work of Paul Ricoeur in the larger context of historical & contemporary conversations about moral transformation, drawing connections between sin & tragedy, ethics & poetics,

& between the moral life & religious mythology.
