The App That Killed Todd Rhoda,2021-09-15 A Fast Read Cozy Mystery Professor Miles Banford is famous (and infamous) app developer and youngest adjunct professor of his university. As a new school year starts, one of his female students disappears and the police are intrigued by her last email to him and he's held for questioning. Getting a hand from an unknown hacker, he's quickly released, but his troubles don't end. As he begins a search for the missing student, his high-profile mother asks him to do an app for her. Professor Banford has wealth beyond his dreams made through hard work as an app developer, but he has a past with countless indiscretions--many of them front-page tabloid news. The indiscretions are always as they are always refracted through his mother's career. As he involves himself more with the project, the search for the girl, and now the beautiful tech-nerd assigned to him from his mother's staff, stranger and more deadly outcomes begin to look more probable. Why would someone want him dead? Fueled by a surprise ending, Professor Banford fights many forces to save his reputation.....and his own life. This spine-chilling tech thriller is one of the best cozy mysteries if you're looking for a quick-read, interesting, and romantic story.
