Pervasive Computing Handbook Uwe Hansmann,Lothar Merk,Martin S. Nicklous,Thomas Stober,2013-04-17 This book is a guide for the world of Pervasive Computing. It describes a new class of computing devices which are becoming omnipresent in every day life. They make information access and processing easily available for everyone from anywhere at any time. Mobility, wireless connectivity, diversity, and ease-of-use are the magic keywords of Pervasive Computing. The book covers these front-end devices as well as their operating systems and the back-end infrastructure which integrate these pervasive components into a seamless IT world. A strong emphasis is placed on the underlying technologies and standards applied when building up pervasive solutions. These fundamental topics include commonly used terms such as XML, WAP, UMTS, GPRS, Bluetooth, Jini, transcoding, and cryptography, to mention just a few. Besides a comprehensive state-of-the-art description of the Pervasive Computing technology itself, this book gives an overview of today's real-life applications and accompanying service offerings. M-Commerce, e-Business, networked home, travel, and finance are exciting examples of applied Pervasive Computing.

The Future of Television Pamela Douglas,2015 The book's journey into the future of television begins with "You Are Here," delving into "The Great Convergence" of television and Internet and the vortex of change we all inhabit now. Then, glancing back,

we explore “The Old World” of broadcast television to understand how we got to this moment of transition. Next, traveling “Between Worlds,” we visit cable television and see how the boundaries between network, cable, and Internet are mutating. After that, we enter “The New World” that ranges from empires like Netflix and Amazon down to Kickstarter-funded web series, and all the creative expressions that abound. Finally, we look ahead to the “Far Frontier” of interactivity and transmedia and a distant, fantastic future. All these experiences are focused on how a writer, producer, director, or entrepreneur can use the emerging possibilities to create original television now and in the coming decade.
