The Comptroller and the Transformation of American Banking, 1960-1990

Eugene N. White, 1997-07 Covers the history of the oversight of the American banking industry by the Office of the Comptroller of the Currency (OCC), beginning in 1960 and continuing to 1990. It begins with a discussion of the OCC in 1960 -- regulation and supervision under the New Deal regime, and continues with an examination of the beginning of the banking revolution, 1960-72; the crisis years, 1973-75; revitalizing the OCC, 1975-80; and the challenge of the 1980s. *Bank Liquidity Creation and Financial Crises* Allen Berger, Christa Bouwman, 2015-11-24 *Bank Liquidity Creation and Financial Crises* delivers a consistent, logical presentation of bank liquidity creation and addresses questions of research and policy interest that can be easily understood by readers with no advanced or specialized industry knowledge. Authors Allen Berger and Christa Bouwman examine ways to measure bank liquidity creation, how much liquidity banks create in different countries, the effects of monetary policy (including interest rate policy, lender of last resort, and quantitative easing), the effects of capital, the effects of regulatory interventions, the effects of bailouts, and much more. They also analyze bank liquidity creation in the US over the past three decades during both normal times and financial crises. Narrowing the gap between the academic world (focused on theories) and the practitioner world (dedicated to solving real-world problems), this book is a helpful new tool for evaluating a bank's performance over time and comparing it to its peer group. Explains that bank liquidity creation is a more comprehensive measure of a bank's output than traditional measures and can also be used to measure bank liquidity Describes how high levels of bank liquidity creation may cause or predict future financial crises Addresses questions of research and policy interest related to bank liquidity creation around the world and provides links to websites with data and other materials to address these questions Includes such hot-button topics as the effects of monetary policy (including interest rate

policy, lender of last resort, and quantitative easing), the effects of capital, the effects of regulatory interventions, and the effects of bailouts

*TARP and other Bank Bailouts and Bail-Ins around the World* Allen

Berger, Raluca Roman, 2020-06-09 Financial crises are recurring phenomena that result in the financial distress of systemically important banks, making it imperative to understand how to best respond to such crises and their consequences. Two policy responses became prominent for dealing with these distressed institutions since the last Global Financial Crisis: bailouts and bail-ins. The main questions surrounding these responses touch everyone: Are bailouts or bail-ins good for the financial system and the real economy? Is it essential to save distressed financial institutions by putting taxpayer money at risk in bailouts, or is it better to use private money in bail-ins instead? Are there better options, such as first lines of defense that help prevent such distress in the first place? Can countercyclical prudential and monetary policies lessen the likelihood and severity of the financial crises that often bring about this distress? Through careful analysis, authors Berger and Roman review and critically assess the extant theoretical and empirical research on many resolution approaches and tools. Placing special emphasis on lessons learned from one of the biggest bailouts of all time, the Troubled Asset Relief Program (TARP), while also reviewing other programs and tools, *TARP and Other Bank Bailouts and Bail-Ins around the World* sheds light on how best to protect the financial system on Wall Street and the real

economy on Main Street. Presents a well-informed and rich account of bailouts, bail-ins, and other resolution approaches to resolve financially distressed banks. Uses TARP as a key case study of bailouts that has been thoroughly researched. Provides valuable research and policy guidance for dealing with future financial crises.
