The Responsive Museum Caroline Lang, John Reeve, 2016-02-24 What is the relationship today between museums, galleries and learning? The Responsive Museum interrogates the thinking, policies and practices that underpin the educational role of the museum. It unravels the complex relationship of museums with their publics, and discusses today's challenges and the debates that have resulted. The highly experienced team of writers, including museum educators and directors, share their different experiences and views, and review recent research and examples of best practice. They analyse the implications of audience development and broadening public access, particularly in relation to special groups, minority communities and disabled people, and for individual self-development and different learning styles; they explore issues of public accountability and funding; discuss the merits of different evaluation tools and methodologies for measuring audience impact and needs; and assess the role of architects, designers and artists in shaping the visitor experience. The latter part of this book reviews practical management and staffing issues, and training and skills needs for the future. This book is for students, museum staff, especially those involved in education and interpretation, and senior management and policy-makers. This is a much-needed review of the relationship between museums and galleries and their users. It also offers a wealth of information and expertise to guide future strategy and practice.
