National Aeronautics and Space Administration (NASA)

A Dictionary of the Space Age Paul Dickson, 2009-04-14 The launch of Sputnik 1 in 1957 ushered in an exciting era of scientific and technological advancement. As television news anchors, radio hosts, and journalists reported the happenings of the American and the Soviet space programs to millions of captivated citizens, words that belonged to the worlds of science, aviation, and science fiction suddenly became part of the colloquial language. What's more, NASA used a litany of acronyms in much of its official correspondence in an effort to transmit as much information in as little time as possible. To translate this peculiar vocabulary, Paul Dickson has compiled the curious lingo and mystifying acronyms of NASA in an accessible dictionary of the names, words, and phrases of the Space Age. This dictionary captures a broader foundation for the language of the Space Age based on the historical principles employed by the Oxford English Dictionary and Webster's Third New International Dictionary. Word histories for major terms are detailed in a conversational tone, and technical terms are deciphered for the interested student and lay reader. This is a must-own reference for space history buffs. --Book Jacket.

A Dictionary of Space Exploration Stephen O'Meara, E. Julius Dasch, 2018-06-21 With over 2,300 entries, this fascinating and expansive dictionary covers all aspects of space exploration, from A-Train to Zvezda. This jargon-free new edition has been fully revised and updated to take into account the new developments in space exploration on an international scale over the last thirteen years, with new entries such as Hitomi, Space X Dragon, and Ariane 5 Rocket. All entries are fully cross-referenced for ease of use, and are supported by over 75 photographs, illustrations, and diagrams. In addition to the main definitions, this new edition also contains links to over 250 space-related websites. This authoritative, comprehensive, and clear dictionary is essential reading for anyone with an interest in astronomy and space travel.

NASA Thesaurus. Volume 3 National Aeronautics and Space Administration (NASA), 2018-07-18 Publication of NASA Thesaurus definitions began with Supplement 1 to the 1985 NASA Thesaurus. The definitions given here represent the complete file of over 3,200 definitions, complimented by nearly 1,000 use references. Definitions of more common or general scientific terms are given a NASA slant if one exists. Certain terms are not defined as a matter of policy: common names, chemical elements, specific models of computers, and nontechnical terms. The NASA Thesaurus predates by a number of years the systematic effort to define terms, therefore not all Thesaurus terms have been defined. Nevertheless, definitions of older terms are continually being added. The following data are provided for each entry: term in uppercase/lowercase form, definition, source, and year the term (not the definition) was added to the NASA Thesaurus. The NASA History Office is the authority for capitalization in satellite and spacecraft names. Definitions with no source given were constructed by lexicographers at the NASA Scientific and Technical Information (STI) Facility who rely on the following sources for their information: experts in the field, literature searches from the NASA STI database, and specialized references. Dictionary of Space Technology Joseph Angelo,2013-10-31 Originally published in 1981, the completely revised and updated second edition of the Dictionary of Space Technology illustrates the advances of the last 20 years and makes accessible nearly every word, concept, and event relating to this branch of science. It guides lay persons and professionals alike through humankind's activities in space, the beginnings of our extraterrestrial society, and the increasingly important role of space sciences in everyday life. Defines more than 1,500 terms, including: science basics; historic events; defence and armed forces terminology; and planetary sciences. Enhanced by more than 175 photographs and drawings, this Dictionary covers the past, the present and the future of space, space flight, and space technology.

Lexique de la station spatiale Canada. Spatial Terminology Standardization Committee,1992 The terminology used to describe the space station and its outer space mission relates to a wide range of modern disciplines and sciences, from aerodynamics to the composition of materials, including such fields as informatics, electronics, thermodynamics, wave propagation, and medicine. This glossary contains 900 terms limited to terminology associated with the space station itself, in particular with its physical components, space laboratories, and the experiments to be conducted in them, as well as with the robot arm and its various modules and systems. The glossary does not include the terminology of satellites, facilities, systems, and military programs. Also included are the official designations of Canadian, European, and NASA experiments and programs.

Basics of Space Flight Glossary , Presents a glossary of terms related to space flight, provided by the National Aeronautics and Space Administration (NASA) Jet Propulsion Laboratory (JPL). Defines terms such as ascending node, barycenter, centrifugal force, comets, ecliptic, gamma rays, gravity waves, inferior planet, light year, light speed, and many other terms. Allows users to search by alphabetical letter.
