Space Mission Analysis and Design Wiley J. Larson, A.V. Wertz, 2013-10-05 With the second edition of Space Mission Analysis and Design, two changes have been introduced in the Space Technology Library. Foremost among these is the introduction of the Space Technology Series as a part of the Space Technology Library. Dr. Wiley Larson of the US Air Force Academy and University of Colorado, Colorado Springs, will serve as Managing Editor for the Space Technology Series. This series is a cooperative effort of the Department of Defense, National Aeronautics and Space Administration, Department of Energy, and European Space Agency, coordinated by the US Air Force Academy. The sponsors intend to bring a number of books into the series to improve the literature base in the

fundamentals of space technology, beginning with the current volume. Books which are not a part of the Space Technology Series, but which also represent a substantial contribution to the space technology literature, will still be published in the Space Technology Library. As always, we welcome suggestions and contributions from the aerospace community.

The NASA Kepler Mission Steve B.. Howell, 2020-09-15 This book covers the numerous, paradigm changing scientific discoveries in exoplanets and other areas of astrophysics made possible by the NASA Kepler and K2 Missions. It is suitable for the interested layperson, pupils of science and space missions, and advanced science students and researchers.

Organizational Learning at NASA Julianne G. Mahler, 2009-03-27 Just after 9:00 a.m. on February 1, 2003, the space shuttle Columbia broke apart and was lost over Texas. This tragic event led, as the Challenger accident had 17 years earlier, to an intensive government investigation of the technological and organizational causes of the accident. The investigation found chilling similarities between the two accidents, leading the Columbia Accident Investigation Board to conclude that NASA failed to learn from its earlier tragedy. Despite the frequency with which organizations are encouraged to adopt learning practices, organizational learning—especially in public organizations—is not well understood and deserves to be studied in more detail. This book fills that gap with a thorough examination of NASA's loss of the two shuttles. After offering an account of the processes that constitute organizational learning, Julianne G. Mahler focuses on what NASA did to address problems revealed by Challenger and its uneven efforts to institutionalize its own findings. She also suggests factors overlooked by both accident commissions and proposes broadly applicable hypotheses about learning in public organizations.

Human Health and Performance Risks of Space Exploration Missions Jancy C. McPhee, John B.

Charles, United States. National Aeronautics and Space Administration, 2009

Thanks, NASA! Tom Greve, 2012-08-01 This Book Explores The Tremendous Contribution That NASA Has Made Over The Last Half Century. Grading NASA's Solar System Exploration Program National Research Council, Division on Engineering and Physical Sciences, Space Studies Board, Committee on Assessing the Solar System Exploration Program, 2008-04-25 The NASA Authorization Act of 2005 directed the agency to ask the NRC to assess the performance of each division in the NASA Science directorate at five-year intervals. In this connection, NASA requested the NRC to review the progress the Planetary Exploration Division has made in implementing recommendations from previous, relevant NRC studies. This book provides an assessment of NASA's progress in fulfilling those recommendations including an evaluation how well it is doing and of current trends. The book covers key science questions, flight missions, Mars exploration, research and analysis, and enabling technologies. Recommendations are provided for those areas in particular need of improvement.

NASA Mathematician Katherine Johnson Heather E. Schwartz, 2018-08-01 Audisee® eBooks with Audio combine professional narration and sentence highlighting for an engaging read aloud experience! What do you want to be when you grow up? When Katherine Johnson was young, women weren't expected to go into the math and science fields. Johnson loved math, but she never thought she could be a mathematician. After studying math in school and teaching for a few years, she learned that the organization that would later become NASA was hiring women to complete mathematical equations. As an African American woman, Johnson had to work hard to earn the

respect of her coworkers, but they soon came to rely on her brilliant calculations. Her contributions to the US space program helped send astronauts to the moon. Learn how Johnson broke barriers as a female African American mathematician.

The Mars Project Wernher Von Braun,1953 This classic on space travel was first published in 1953, when interplanetary space flight was considered science fiction by most of those who considered it at all. Here the German-born scientist Wernher von Braun detailed what he believed were the problems and possibilities inherent in a projected expedition to Mars. Today von Braun is recognized as the person most responsible for laying the groundwork for public acceptance of America's space program. When President Bush directed NASA in 1989 to prepare plans for an orbiting space station, lunar research bases, and human exploration of Mars, he was largely echoing what von Braun proposed in *The Mars Project*.

Hidden Human Computers: The Black Women of NASA Sue Bradford Edwards,Duchess Harris, JD, PhD,2017-01-01 Hidden Human Computers discusses how in the 1950s, black women made critical contributions to NASA by performing calculations that made it possible for the nation's astronauts to fly into space and return safely to Earth. Aligned to Common Core Standards and correlated to state standards. Essential Library is an imprint of Abdo Publishing, a division of ABDO.

How We Got to the Moon John Rocco,2020-10-06 LONGLISTED FOR THE NATIONAL BOOK AWARD •
YALSA EXCELLENCE IN NONFICTION FINALIST • A ROBERT F. SIBERT HONOR BOOK This beautifully
illustrated, oversized guide to the people and technology of the moon landing by award-winning
author/illustrator John Rocco (illustrator of the Percy Jackson series) is a must-have for space fans,
classrooms, and tech geeks. Everyone knows of Neil Armstrong's famous first steps on the moon. But
what did it really take to get us there? The Moon landing is one of the most ambitious, thrilling, and
dangerous ventures in human history. This exquisitely researched and illustrated book tells the stories
of the 400,000 unsung heroes--the engineers, mathematicians, seamstresses, welders, and factory
workers--and their innovations and life-changing technological leaps forward that allowed NASA to
achieve this unparalleled accomplishment. From the shocking launch of the Russian satellite Sputnik
to the triumphant splashdown of Apollo 11, Caldecott Honor winner John Rocco answers every
possible question about this world-altering mission. Each challenging step in the space race is
revealed, examined, and displayed through stunning diagrams, experiments, moments of crisis, and
unforgettable human stories. Explorers of all ages will want to pore over every page in this
comprehensive chronicle detailing the grandest human adventure of all time!

Pluto & the Dwarf Planets Nathan Sommer,2019-01-01 In 2006, Pluto was reclassified as a dwarf

planet. Small, rocky dwarf planets make their home on the outer edges of the solar system. Scientists use telescopes to study Pluto and the dwarf planets as they orbit the Sun. Their fascinating findings are on display in this informative title about some of the solar system's most far-away objects!

Spinoff 2012 Daniel Coleman, Lisa Rademakers, Samson Reiny, 2013-02-06 NP 2012-11-912-HQ. Provides an in-depth look at how NASA's initiatives in aeronautics and space exploration have resulted in beneficial commercial technologies in the fields of health and medicine, transportation, public safety, consumer goods, environmental protection, computer technology and industrial productivity

Cosmic Queries Neil deGrasse Tyson, 2021-03-02 In this thought-provoking follow-up to his acclaimed StarTalk book, uber astrophysicist Neil deGrasse Tyson tackles the world's most important philosophical questions about the universe with wit, wisdom, and cutting-edge science.
