Pedagogy of Hope for Global Social Justice Douglas Bourn, Massimiliano Tarozzi, 2023-10-19 Following Paulo Freire and his concept of pedagogy of hope, this open access book explores the educational role of hope as an approach to learning about global issues in different areas of the world. Climate change, racism, and the COVID-19 pandemic have shown more than ever the need for a global shift in education policy and practice. This book provides a conceptual framework of global education and learning and the role it can play in addressing these social and environmental challenges. Written by scholars based in Australia, Brazil, Canada, China, Ghana, India, Italy, Portugal South Africa, Spain, the UK and the USA, the book addresses a range of local and global issues from global citizenship education in Latin America to training teachers in global education. The ebook editions of this book are available open access under a CC BY-NC-ND 4.0 licence on bloomsburycollections.com. Open access was funded by Knowledge Unlatched.

Handbook of Systems and Complexity in Health Joachim P Sturmberg, Carmel Martin, 2013-01-09 This book is an introduction to health care as a complex adaptive system, a system that feeds back on itself. The first section introduces systems and complexity theory from a science, historical, epistemological, and technical perspective, describing the principles and mathematics. Subsequent sections build on the health applications of systems science theory, from human physiology to medical decision making, population health and health services research. The aim of the book is to introduce and expand on important population health issues from a systems and complexity perspective, highlight current research developments and their implications for health care delivery, consider their ethical implications, and to

suggest directions for and potential pitfalls in the future.

Natural Hazard Uncertainty Assessment Karin Riley, Peter Webley, Matthew Thompson, 2016-12-12
Uncertainties are pervasive in natural hazards, and it is crucial to develop robust and meaningful approaches to characterize and communicate uncertainties to inform modeling efforts. In this monograph we provide a broad, cross-disciplinary overview of issues relating to uncertainties faced in natural hazard and risk assessment. We introduce some basic tenets of uncertainty analysis, discuss issues related to communication and decision support, and offer numerous examples of analyses and modeling approaches that vary by context and scope. Contributors include scientists from across the full breath of the natural hazard scientific community, from those in real-time analysis of natural hazards to those in the research community from academia and government. Key themes and highlights include: Substantial breadth and depth of analysis in terms of the types of natural hazards addressed, the disciplinary perspectives represented, and the number of studies included Targeted, application-centered analyses with a focus on development and use of modeling techniques to address various sources of uncertainty Emphasis on the impacts of climate change on natural hazard processes and outcomes Recommendations for cross-disciplinary and science transfer across natural hazard sciences This volume will be an excellent resource for those interested in the current work on uncertainty classification/quantification and will document common and emergent research themes to allow all to learn from each other and build a more connected but still diverse and ever growing community of scientists. Modern Techniques for Food Authentication Da-Wen Sun, 2018-07-25 Modern Techniques for Food Authentication, Second Edition presents a comprehensive review of the novel techniques available to authenticate food products, including various spectroscopic technologies, methods based on isotopic analysis and chromatography, and other techniques based on DNA, enzymatic analysis and electrophoresis. This new edition pinpoints research and development trends for those working in research, development and operations in the food industry, giving them readily accessible information on modern food authentication techniques to ensure a safe and authentic food supply. It will also serve as an essential reference source to undergraduate and postgraduate students, and for researchers in universities and research institutions. Presents emerging imaging techniques that have proven to be powerful, non-destructive tools for food authentication Includes applications of hyperspectral imaging to reflect the current trend of developments in food imaging technology for each topic area Provides pixel level visualization techniques needed for fast and effective food sample testing Contains two new chapters on Imaging Spectroscopic Techniques

Measurement Methodologies to Assess the Effectiveness of Global Online Learning Isaias, Pedro, Issa, Tomayess, Kommers, Piet, 2022-02-18 While online learning was an existing practice, the COVID-19 pandemic greatly accelerated its capabilities and forced educational organizations to swiftly introduce online learning for all units. Though schools will not always be faced with forced online learning, it is apparent that there are clear advantages and disadvantages to this teaching method, with its usage in the future cemented. As such, it is imperative that methods for measuring and assessing the effectiveness of online

and blended learning are examined in order to improve outcomes and future practices. *Measurement Methodologies to Assess the Effectiveness of Global Online Learning* aims to assess the effectiveness of online teaching and learning in normal and pandemic situations by addressing challenges and opportunities of adoption of online platforms as well as effective learning strategies, investigating the best pedagogical practices in digital learning, questioning how to improve student motivation and performance, and managing and measuring academic workloads online. Covering a wide range of topics such as the future of education and digital literacy, it is ideal for teachers, instructional designers, curriculum developers, educational software developers, academics, researchers, and students.

Advances in Food and Nutrition Research Fidel Toldra, 2019-01-31 *Advances in Food and Nutrition Research*, Volume 87 provides updated information on nutrients in foods and how to avoid deficiency, especially the essential nutrients that should be present in the diet to reduce disease risk and optimize health. The book provides the latest advances on the identification and characterization of emerging bioactive compounds with putative health benefits. Chapters in this new release include discussions of the function and application of bioactive peptides from corn gluten meal, Dietary fatty acids and metabolic syndrome, the Microbial ecology of plant-based fermented foods and current knowledge on their impact on human health, and much more. Presents contributions and the expertise and reputation of leaders in nutrition Includes updated, in-depth, critical discussions of available information, giving readers a unique opportunity to learn Provides high-quality illustrations (with a high percentage in color) that give additional value

Proceedings of the 2023 International Conference on Advances in Computing Research (ACR'23) Kevin Daimi, Abeer Al Sadoon, 2023-05-26 This book includes recent research on Data Science, IoT, Smart Cities and Smart Energy, Health Informatics, and Network Security. The International Conference on Advances in Computing Research (ACR'23) brings together a diverse group of researchers from all over the world with the intent of fostering collaboration and dissemination of the advances in computing technologies. The conference is aptly segmented into six tracks to promote a birds-of-the-same-feather congregation and maximize participation. The first track covers computational intelligence, which include, among others, research topics on artificial intelligence, knowledge representation and management, application and theory of neural systems, fuzzy and expert systems, and genetic algorithms. The second track focuses on cybersecurity engineering. It includes pertinent topics such as incident response, hardware and network security, digital biometrics and forensics technologies, and cybersecurity metrics and assessment. Further, it features emerging security technologies and high-tech systems security. The third track includes studies on data analytics. It covers topics such as data management, statistical and deep analytics, semantics and time series analytics, and a multitude of important applications of data analytics in areas such as engineering, health care, business, and manufacturing. The fourth track on network and communications covers a wide range of topics in both areas including protocols and operations, ubiquitous networks, ad hoc and sensor networks, cellular systems, virtual and augmented reality streaming, information centric networks, and the emerging areas in connected and autonomous vehicle communications. Lastly, the final track on cloud and mobile computing includes areas of interest in cloud computing such as infrastructure, service, management and operations, architecture, and interoperability

and federation. This track also includes important topics in mobile computing such as services and applications, communication architectures, positioning and tracking technologies, the general applications of mobile computing.

World Directory of Crystallographers Yves Epelboin, 2013-11-11 The 9th edition of the World Directory of Crystallographers and of Other Scientists Employing Crystallographic Methods, which contains 7907 entries embracing 72 countries, differs considerably from the 8th edition, published in 1990. The content has been updated, and the methods used to acquire the information presented and to produce this new edition of the Directory have involved the latest advances in technology. The Directory is now also available as a regularly updated electronic database, accessible via e-mail, Telnet, Gopher, World-Wide Web, and Mosaic. Full details are given in an Appendix to the printed edition.

Culture and Dialogue Vol.3, No. 2 (2013) Issue on "Identity and Dialogue" Gerald Cipriani, 2014-05-02 Volume 3 Number 2 of Culture and Dialogue focuses on the theme of "identity and dialogue." All the essays gathered in this volume address issues of identity with concrete examples and from different perspectives, be they art, philosophy, politics, religion, gender, or ethnic studies. All essays describe and question the relational element at work in identity formation within different cultural contexts, such as Japan, America, Corsica, Mongolia, Norway, Australia, Italy, and Ireland. Hiroshi Yoshioka offers a topical critique of what lays behind the fashionable self-portrait of Japanese cultural identity as Cool Japan in all its uniqueness. Sandra Wawrytko addresses the sensitive issue of gun culture in American identity by resorting to Mahāyāna Buddhist conceptions of failed interconnectedness. Dominique Verdoni discusses cultural identity formation with particular reference to the Corsican language and literature against the background of more dominant or regulating cultures. Angelika Böck shows how art practice can disclose the processes involved in any attempts to represent otherness, including when different groups such as Mongolian herders, Sami singers, and Australian Aboriginal hunters use other cultural codes and perspectives. Francesca Pierini critically reflects upon the culturally biased ways in which Anglo-American literature has traditionally portrayed Italian culture—an orientalist imagined identity. The selection of essays closes with Hannah Hale's study on a very specific aspect of gender identity formation: how eating and drinking habits shape the development of masculinities within a community of students. All essays, in one way or another, disclose how identity formation is conditioned by, or emerges from, relationships between self and otherness, inside and outside, or minor and dominant cultures. As paradoxical as it may seem, the more we relate to each other, the more identity becomes an issue.

Algorithms and Architectures for Parallel Processing Guojun Wang, Albert Zomaya, Gregorio Martinez, Kenli Li, 2015-11-16 This four volume set LNCS 9528, 9529, 9530 and 9531 constitutes the refereed proceedings of the 15th International Conference on Algorithms and Architectures for Parallel Processing, ICA3PP 2015, held in Zhangjiajie, China, in November 2015. The 219 revised full papers presented together with 77 workshop papers in these four volumes were carefully reviewed and selected from 807 submissions (602 full papers and 205 workshop papers). The first volume comprises the following topics: parallel and distributed architectures; distributed and network-based computing and internet of things and cyber-physical-social computing. The second volume comprises topics such as big data and its applications and parallel and distributed algorithms. The topics of the third volume are: applications of parallel and distributed computing and service dependability and security in distributed and parallel systems. The covered topics of the fourth volume are: software systems and programming models and

performance modeling and evaluation.

Algorithms and Architectures for Parallel Processing Guojin Wang,Albert Zomaya,Gregorio Martinez,Kenli Li,2015-11-18 This book constitutes the refereed proceedings of the Workshops and Symposiums of the 15th International Conference on Algorithms and Architectures for Parallel Processing, ICA3PP 2015, held in Zhangjiajie, China, in November 2015. The program of this year consists of 6 symposiums/workshops that cover a wide range of research topics on parallel processing technology: the Sixth International Workshop on Trust, Security and Privacy for Big Data, TrustData 2015; the Fifth International Symposium on Trust, Security and Privacy for Emerging Applications, TSP 2015; the Third International Workshop on Network Optimization and Performance Evaluation, NOPE 2015; the Second International Symposium on Sensor-Cloud Systems, SCS 2015; the Second International Workshop on Security and Privacy Protection in Computer and Network Systems, SPPCN 2015; and the First International Symposium on Dependability in Sensor, Cloud, and Big Data Systems and Applications, DependSys 2015. The aim of these symposiums/workshops is to provide a forum to bring together practitioners and researchers from academia and industry for discussion and presentations on the current research and future directions related to parallel processing technology. The themes and topics of these symposiums/workshops are a valuable complement to the overall scope of ICA3PP 2015 and give additional values and interests.

Computational Intelligence in Data Mining Janmenjoy Nayak,H.S. Behera,Bighnaraj Naik,S. Vimal,Danilo Pelusi,2022-05-06 This book addresses different methods and techniques of integration for enhancing the overall goal of data mining. The book is a collection of high-quality peer-reviewed research papers presented in the Sixth International Conference on Computational Intelligence in Data Mining (ICCIDM 2021) held at Aditya Institute of Technology and Management, Tekkali, Andhra Pradesh, India, during December 11–12, 2021. The book addresses the difficulties and challenges for the seamless integration of two core disciplines of computer science, i.e., computational intelligence and data mining. The book helps to disseminate the knowledge about some innovative, active research directions in the field of data mining, machine and computational intelligence, along with some current issues and applications of related topics.
