**The Routledge Handbook of Environment and Communication** Anders Hansen,Robert Cox,2015-03-05 This Handbook provides a comprehensive statement and reference point for theory, research and practice with regard to environment and communication, and it does this from a perspective which is both international and multi-disciplinary in scope. Offering comprehensive critical reviews of the history and state of the art of research into the key dimensions of environmental communication, the chapters of this handbook together demonstrate the strengths of multi-disciplinary and cross-disciplinary approaches to understanding the centrality of communication to how the environment is constructed, and indeed contested, socially, politically and culturally. Organised in five thematic sections, The Routledge Handbook of Environment and Communication includes contributions from internationally recognised leaders in the field. The first section looks at the history and development of the discipline from a range of theoretical perspectives. Section two considers the sources, communicators and media professionals involved in producing environmental communication. Section three examines research on news, entertainment media and cultural representations of the environment. The fourth section looks at the social and political implications of environmental communication, with the final section discussing likely future trajectories for the field. The first reference Handbook to offer a state of the art comprehensive overview of the emerging field of environmental communication research, this authoritative text is a must for scholars of environmental communication across a range of disciplines, including environmental studies, media and communication studies, cultural studies and related disciplines.

Rescuing the Light Martín Prechtel,2021-06-08 A collection of quotes and sayings from the oral teachings of a leading thinker, writer and teacher of Indigenous spirituality. Martín Prechtel is widely recognized as a profound

and beloved teacher for our times. Raised in the Tzutujil Maya shamanic tradition, he has dedicated his life to the preservation and promulgation of indigenous spirituality. *Rescuing the Light* is a collection of Prechtel's quotes and sayings spanning the course of fifteen years, and recorded at Bolad's Kitchen, a four-year course in New Mexico where students from all walks of life gather to receive hands-on training in language, history, cooking, farming, and crafts. An artist, musician, and storyteller, Prechtel teaches and initiates with passion and eloquence, awakening his students to the sacred realities present everywhere and at all times. The quotes of wisdom and inspiration collected in these pages are earth-centric and animist. Divided into thematic sections, they range from the poetic and witty to the serious and direct. Sharing his deep shamanic wisdom within a grand overview of human history, Prechtel shows us how we can reconnect with the unique and unsuspected manifestations of our own sacred selves.

**The Laws of Human Nature** Robert Greene, 2018-10-23 From the #1 New York Times-bestselling author of *The 48 Laws of Power* comes the definitive new book on decoding the behavior of the people around you Robert Greene is a master guide for millions of readers, distilling ancient wisdom and philosophy into essential texts for seekers of power, understanding and mastery. Now he turns to the most important subject of all - understanding people's drives and motivations, even when they are unconscious of them themselves. We are social animals. Our very lives depend on our relationships with people. Knowing why people do what they do is the most important tool we can possess, without which our other talents can only take us so far. Drawing from the ideas and examples of Pericles, Queen Elizabeth I, Martin Luther King Jr, and many others, Greene teaches us how to detach ourselves from our own emotions and master self-control, how to develop the empathy that leads to insight, how to look behind people's masks, and how to resist conformity to develop your singular sense of purpose. Whether at work, in relationships, or in shaping the world around you, *The Laws of Human Nature* offers brilliant tactics for success, self-improvement, and self-defense.

*Technobiophilia* Sue Thomas, 2013-09-26 Why are there so many nature metaphors - clouds, rivers, streams, viruses, and bugs - in the language of the internet? Why do we adorn our screens with exotic images of forests, waterfalls, animals and beaches? In *Technobiophilia: Nature and Cyberspace*, Sue Thomas interrogates the prevalence online of nature-derived metaphors and imagery and comes to a surprising conclusion. The root of this trend, she believes, lies in biophilia, defined by biologist E.O. Wilson as 'the innate attraction to life and lifelike processes'. In this wide-ranging transdisciplinary study she explores the strong thread of biophilia which runs through our online lives, a phenomenon she calls 'technobiophilia', or, the 'innate attraction to life and lifelike processes as they appear in technology'. The restorative qualities of biophilia can alleviate mental fatigue and enhance our capacity for directed attention, soothing our connected minds and easing our relationship with computers. *Technobiophilia: Nature and Cyberspace* offers new insights on what is commonly known as 'work-life balance'. It

explores ways to make our peace with technology-induced anxiety and achieve a 'tech-nature balance' through practical experiments designed to enhance our digital lives indoors, outdoors, and online. The book draws on a long history of literature on nature and technology and breaks new ground as the first to link the two. Its accessible style will attract the general reader, whilst the clear definition of key terms and concepts throughout should appeal to undergraduates and postgraduates of new media and communication studies, internet studies, environmental psychology, and human-computer interaction. **Regenesis** David Stowe, 2002-08 This book contains the fruits of a Scripture study that took the author on a journey from the position of Fundamentalist Christianity into the mental realms of Freethinking. Far from representing the Good Book, the author concludes that the Bible is actually a terrorist manifesto from the ancient Near East, containing graphic descriptions of cold blooded murder, beheadings, child sacrifice, and cultural genocide committed by early Hebrews under the command of a militaristic totem god named YHWH, whose priesthood sought world domination and the extermination of all Pagan religions. Within the pages of Outgrowing the Bible, readers will discover that: The actual character of the Biblical God is that of an abusive husband and Black Magician. The story of Jesus is but the latest version of the oldest religious motif in the history of the world. Many prior savior stories from around the world parallel the myths of the New Testament. Many Hebrew patriarchs, such as Moses and Joshua, were murderous pirates by today's standards. Early Judaism included the use of many varieties of psychedelic and narcotic plants. Judaic prophecy and eschatology was often plagiarized from other religions, and refer to events long buried in the sands of the Near East. The Ten Commandments were derived from a pre-existing moral code that developed over time, were entirely human in origin, and are outdated. Many liturgical elements and artifacts of early Judaism (i.e. the Ark of the Covenant) were copied from the Sun-worshipping cults

of ancient Egypt. Outgrowing the Bible contains hundreds of Scriptural quotes, along with a feast of information to challenge those who insist that the Bible is the absolute, infallible Word of God. This book also debunks philosophical positions that are commonly based on the Bible, such as: recent Creationism; the Fall of Man; male supremacy; repressive sexuality; the Right to Life movement; the War on Drugs; homophobia; and the insidious notion that the world is currently headed toward an inevitable, global holocaust. Outgrowing the Bible provides a fresh look at the actual content of the books that compose the modern Bible, most of which are of unknown authorship. This book also investigates the psychological processes involved with a major change in personal philosophical outlook, and offers words of encouragement to those who are trapped within the bondage of biblical doctrines.
