Hot Art, Cold War – Southern and Eastern European Writing on American Art 1945-1990 Claudia Hopkins, Iain Boyd Whyte, 2020-12-21 Hot Art, Cold War – Southern and Eastern European Writing on American Art 1945-1990 is one of two text anthologies that trace the reception of American art in Europe during the Cold War era through primary sources. Translated into English for the first time from sixteen languages and introduced by scholarly essays, the texts in this volume offer a representative selection of the diverse responses to American art in Portugal, Italy, Spain, Greece, Yugoslavia, Romania, Bulgaria, Soviet Union (including the Baltic States), Czechoslovakia, Poland, Hungary, and East Germany (GDR). There was no single European discourse, as attitudes to American art were determined by a wide range of ideological, political, social, cultural and artistic positions that varied considerably across the European nations. This volume and its companion, Hot Art, Cold War – Northern and Western European Writing on American Art 1945-1990, offer the reader a unique opportunity to compare how European art writers introduced and explained contemporary American art to their many and varied audiences. Whilst many are fluent in one or two foreign languages, few are able to read all twenty-five languages represented in the two volumes. These ground-breaking publications significantly enrich the fields of American art studies and European art criticism.

In Defiance of Painting Christine Poggi, 1992-01-01 The invention of collage by Picasso and Braque in 1912 proved to be a dramatic turning point in the development of Cubism and Futurism and ultimately one of the most significant innovations in twentieth-century art. Collage has traditionally been viewed as a new expression of modernism, one allied with modernism's search for purity of means, anti-illusionism, unity, and autonomy of form. This book - the first comprehensive study of collage and its relation to modernism - challenges this view. Christine Poggi argues that collage did not become a new language of modernism but a new language with which to critique modernism. She focuses on the ways Cubist collage - and the Futurist multimedia work that was inspired by it - undermined prevailing notions of material and stylistic unity, subverted the role of the frame and pictorial ground, and brought the languages of high and low culture into a new relationship of exchange.

Ithaca Susan Fish, 2014-10-01 Ithaca is the story of how sudden change comes into a slow life. For 39 years, Daisy Turner has been a professor's wife, typing his notes and helping out. The centerpiece

of her life is a weekly open house-a dinner party that always features soup. And then, one day, her husband drops dead. Daisy has nothing to hold onto-except, perhaps, the soup. Then, suddenly, Daisy finds herself entangled with a man whose wife is disabled, mothering a young environmental activist farmer, and swept into the controversy about fracking that has begun to concern their small Ivy League town. What happens when a quiet, almost sedimentary life meets the high-pressure forces of a small town? How does one rebuild after life as you know it is suddenly turned upside down-or is fracked?
