South Korea's Webtooniverse and the Digital Comic Revolution Brian Yecies,Ae-Gyung

Shim,2021-04-09 This book investigates the meteoric rise of mobile webtoons – also known as webcomics – and the dynamic relationships between serialised content, artists, agencies, platforms and applications, as well as the global readership associated with them. It offers an engaging discussion of webtoons themselves, and what makes this new media form so compelling and attractive to millions upon millions of readers. Why have webtoons taken off, and how do users interact with them? Each of the case studies we explore raises interesting questions for both general readers and scholars of new media about how webtoons have become a modern form of popular culture. The book also addresses larger questions about East Asia's contributions to global popular culture and Asian society in general, as well as South Korea's rapid social and cultural transformation since the 1990s. This is a significant – and understudied – aspect of the new screen ecologies and their role in a new wave of media globalisation as we approach the end of the second decade of the 21st century.

Lee,2019-08-22 This book presents the outcomes of the 20th IEEE/ACIS International Conference on Software Engineering, Artificial Intelligence, Networking and Parallel/Distributed Computing (SNPD 2019), which was held on July 8–10, 2019, in Toyama, Japan. The aim of the conference was to bring together researchers and scientists, businesspeople and entrepreneurs, teachers, engineers, computer users, and students to discuss the various fields of computer science and to share their experiences and exchange new ideas and information in a meaningful way. Further, they presented research results on all aspects (theory, applications and tools) of computer and information science, and discussed the practical challenges encountered in their work and the solutions they adopted to overcome them. The book highlights the best papers from those accepted for presentation at the conference. They were chosen based on review scores submitted by members of the program committee and underwent further rigorous rounds of review. From this second round, 15 of the conference's most promising papers were selected for this Springer (SCI) book and not the conference proceedings. We eagerly await the important contributions that we know these authors will make to the field of computer and information science.

Routledge Handbook of Contemporary South Korea Sojin Lim,Niki J.P. Alsford,2021-08-31 The Routledge Handbook of Contemporary South Korea offers a ground-breaking study of the socio-political development of the Korean peninsula in the contemporary period. Written by an international team of scholars and experts, contributions to this book address key intellectual questions in the development of Korean studies, projecting new ways of thinking about how international systems can be organised and how local societies adapt to global challenges. Academically rigorous, each chapter defines current research and lends the reader greater understanding of the social, cultural, economic, and political developments of South Korea, ranging from chapters on the Korean Wave to relations with North Korea and the Korean language overseas. The volume is divided into eight sections, each representing a focused area of inquiry: socio-political history contemporary politics political economy and development society culture international relations security and diplomacy South Korea in international education This handbook provides an interdisciplinary and comprehensive account of contemporary South Korea. It will be of great interest to students and scholars of Korean history, politics and international relations, culture and society, and will also appeal to policy makers interested in the Indo-Asia Pacific region.

Sociolinguistics of the Korean Wave Nora Samosir,Lionel Wee,2023-12-22 Samosir and Wee examine how the immensely popular Korean Wave (K-wave) also known as Hallyu is wielded as soft power through the use of communication for persuasion and attraction on the global stage. The Korean Wave refers to the global spread and popularity of South Korean culture, particularly its pop music (K-pop), serialised dramas (K-dramas) and films (K-films). Given the South Korean government's involvement in providing funding and publicity, the Korean Wave raises interesting

sociolinguistic questions about the relationship between artistry and citizenship, the use of social media in facilitating the consumption of cultural products, and, ultimately, the nature of soft power itself.

Studies of soft power have tended to come from the field of international relations. This book shows that sociolinguistics actually has a number of tools in its conceptual arsenal – such as indexicality, stance taking, affect, and styling – that can shed light on the Korean Wave as a form of soft power. As the first book-length sociolinguistic analysis of the Korean Wave and soft power, this book demonstrates how K-pop, K-dramas, and K-films have been able to encourage in consumers an anthropological stance towards all things Korean. This volume will be of particular interest to students and scholars in sociolinguistics, political science, cultural studies, and Korean studies.

Artificial Intelligence in Cultural Production Dal Yong Jin, 2021-05-26 This book offers an in-depth academic discourse on the convergence of AI, digital platforms, and popular culture, in order to understand the ways in which the platform and cultural industries have reshaped and developed AI-driven algorithmic cultural production and consumption. At a time of fundamental change for the media and cultural industries, driven by the emergence of big data, algorithms, and AI, the book examines how media ecology and popular culture are evolving to serve the needs of both media and cultural industries and consumers. The analysis documents global governments' rapid development of AI-relevant policies and identifies key policy issues; examines the ways in which cultural industries firms utilize AI and algorithms to advance the new forms of cultural production and distribution; investigates change in cultural consumption by analyzing the ways in which AI, algorithms, and digital platforms reshape people's consumption habits; and examines whether governments and corporations have advanced reliable public and corporate policies and ethical codes to secure socio-economic equality. Offering a unique perspective on this timely and vital issue, this book will be of interest to scholars and students in media studies, communication studies, anthropology, globalization studies, sociology, cultural studies, Asian studies, and science and technology studies (STS).

Made in Korea Hyunjoon Shin, Seung-Ah Lee, 2016-09-13 *Made in Korea: Studies in Popular Music* serves as a comprehensive and thorough introduction to the history, sociology, and musicology of contemporary Korean popular music. Each essay covers the major figures, styles, and social contexts of pop music in Korea, first presenting a general description of the history and background of popular music in Korea, followed by essays, written by leading scholars of Korean music, that are organized into thematic sections: History, Institution, Ideology; Genres and Styles; Artists; and Issues.

Globalization and Popular Music in South Korea Michael Fuhr, 2015-06-12 This book offers an in-depth study of the globalization of contemporary South Korean idol pop music, or K-Pop, visiting K-Pop and its multiple intersections with political, economic, and cultural formations and transformations. It provides detailed insights into the transformative process in and around the field of Korean pop music since the 1990s, which paved the way for the recent international rise of K-Pop and the Korean Wave. Fuhr examines the conditions and effects of transnational flows, asymmetrical power relations, and the role of the imaginary other in K-Pop production and consumption, relating them to the specific aesthetic dimensions and material conditions of K-Pop stars, songs, and videos. Further, the book reveals how K-Pop is deployed for strategies of national identity construction in connection with Korean cultural politics, with transnational music production circuits, and with the transnational mobility of immigrant pop idols. The volume argues that K-Pop is a highly productive cultural arena in which South Korea's globalizing and nationalizing forces and imaginations coincide, intermingle, and counteract with each other and in which the tension between both of these poles is played out musically, visually, and discursively. This book examines a vibrant example of contemporary popular music from the non-Anglophone world and provides deeper insight into the structure of popular music and the dynamics of cultural globalization through a combined set of ethnographic, musicological, and cultural analysis. Widening the regional scope of Western-dominated popular music studies and enhancing new areas of ethnomusicology, anthropology, and cultural studies, this book will also be of interest to those studying East Asian popular culture, music globalization, and popular music.

Understanding Korean Webtoon Culture Dal Yong Jin, 2023-11-20 Webtoons—a form of comic that are typically published digitally in chapter form—are the latest manifestation of the Korean Wave of popular culture that has increasingly caught on across the globe, especially among youth. Originally distributed via the Internet, they are now increasingly distributed through smartphones to ravenous readers in Korea and around the world. The rise of webtoons has fundamentally altered the Korean cultural market due to the growth of transmedia storytelling—the flow of a story from the original text to various other media platforms, such as films, television, and digital games—and the convergence of cultural content and digital technologies. Fans can enjoy this content anytime and anywhere, either purely as webtoons or as webtoon-based big-screen culture. *Understanding Korean Webtoon Culture* analyzes webtoons through the lens of emerging digital cultures and discusses relevant cultural perspectives by combining two different, yet connected approaches, political economy and cultural

studies. The book demonstrates the dynamics between structural forces and textual engagement in global media flows, and it illuminates snack-culture and binge-reading as two new forms of digital culture that webtoon platforms capitalize on to capture people's shifting media consumption.
