Tiran, Simon Koblar, Tatiana Bajuk Senčar, Marko Polič, Mikhail Sysoev, Jože Guna, Luka Mladenovič, Saša Babič, Matevž Pogačnik, Alenka Bezjak Mlakar, Emilija Stojmenova Duh, How do people drive on roads and behave in traffic? How can we change driving habits and encourage more environmentally responsible modes of transportation? These are the two main questions to which the volume tries to answer. It tackles the problems of driving, traffic, transportation, and mobility fully, rather than from a single perspective, which has tended to be the norm so far. The authors describe how we can weave together qualitative and quantitative approaches, how useful interviews are for understanding driving comfort, the power ethnography has to help us understand the lifestyle of drivers, which technological tools and approaches are the most useful for analyzing styles of driving, how to explore vehicles and traffic by analyzing language, how traffic might improve or worsen our way of life from a psychological point of view, and how we can encourage environmentally friendly behavior and practices on both the road and in life in general. / Kako se prevažamo po cestah in vedemo v prometu? Kako lahko spremenjamo vozniske navade in spodbujamo bolj okoljsko odgovorne načine prevoza? To sta dve izhodiščni vprašanji, na kateri odgovarja zbornik, v katerem se avtorice in avtorji problematike vožnje, prometa, transporta in mobilnosti lotevajo celotno, namesto z enega zornega kota, kot je bilo to doslej bolj pogosto. Avtorice in avtorji predstavijo, kako lahko pri raziskovanju prepletamo kvalitativne in kvantitativne pristope, kako uporabni so intervjuji pri razumevanju udobja med vožnjo, kakšno moč ima etnografija pri spoznavanju načina življenja voznikov, kateri tehnološki pripomočki in pristopi so najbolj uporabni za analizo načinov vožnje z avtomobilom, kako lahko raziskujemo vozila in promet z analizo jezika, kako promet s psihološkega vidika izboljša in poslabša naš način življenja ter kako lahko spodbujamo okolju prijazne navade in prakse, in to tako na cesti kot tudi nasploh v življenju.

Shock Wave-Boundary-Layer Interactions Holger Babinsky,John K. Harvey,2011-09-12 Shock wave-boundary-layer interaction (SBLI) is a fundamental phenomenon in gas dynamics that is observed in many practical situations, ranging from transonic aircraft wings to hypersonic vehicles and engines. SBLIs have the potential to pose serious problems in a flowfield; hence they often prove to be a critical - or even design limiting - issue for many aerospace applications. This is the first book devoted solely to a comprehensive, state-of-the-art explanation of this phenomenon. It includes a description of the basic fluid mechanics of SBLIs plus contributions from leading international experts who share their insight into their physics and

the impact they have in practical flow situations. This book is for practitioners and graduate students in aerodynamics who wish to familiarize themselves with all aspects of SBLI flows. It is a valuable resource for specialists because it compiles experimental, computational and theoretical knowledge in one place.
