Governance of Near-Urban Conservation Areas Michael Lait, 2021-03-22 This book comprehensively describes the history of Gatineau Park, from the first proposals for a “national park” in the early 1900s to the governance issues in the present period, and it highlights the issues concerning the planning and governance of this unique near-urban ecological area. The 34,500-hectare Gatineau Park is an ecologically diverse wilderness area near the cities of Ottawa (Canada’s national capital) and Gatineau. Gatineau Park is planned and managed as the “Capital’s Conservation Park” by the federal government, specifically the National Capital Commission (NCC). This monograph examines numerous governmental and non-governmental actors that are engaged in the governance of a near-urban wilderness area. Unlike Canada’s national parks, Gatineau Park’s administration involves all three levels of government (federal, provincial, and four municipalities). This book is the first to document the relations among the public and private entities, and is one of only a handful of studies concerning the governance of Canada’s National Capital Region (NCR), which is relatively unique in the literature on federal capitals. Of particular interest to students of governance will be the examination of federal-provincial relations, as the Governments of Canada and Quebec have had a notoriously strained relationship. As the first governance study of Gatineau Park, the monograph will provide readers with insight into the significance of non-state actors, showing the range of competencies that public and private groups deploy in their negotiations with NCC planners, policymakers,

park managers, local and federal politicians.

A Criminology of Policing and Security Frontiers Lippert, Randy, Walby, Kevin, 2020-08-12 Policing and security provision are subjects central to criminology. Yet there are newer and neglected forms that are currently unscrutinised. By examining the work of community safety officers, ambassador patrols, conservation officers, and private police foundations, who operate on and are animated by a frontier, this book reveals why criminological inquiry must reach beyond traditional conceptual and methodological boundaries in the 21st century. Including novel case studies, this multi-disciplinary and international book assembles a rich collection of policing and security frontiers both geographical (e.g. the margins of cities) and conceptual (dispersion and credentialism) not seen or acknowledged previously.

Community Economic Development in Social Work Steven D. Soifer, Joseph B. McNeely, Cathy Costa, Nancy Pickering-Bernheim, 2014-11-18 Community economic development (CED) is an increasingly essential factor in the revitalization of low- to

moderate-income communities. This cutting-edge text explores the intersection of CED and social work practice, which both focus on the well-being of indigent communities and the empowerment of individuals and the communities in which they live. This unique textbook emphasizes a holistic approach to community building that combines business and real-estate development with a focus on stimulating family self-reliance and community empowerment. The result is an innovative approach to rehabilitating communities in decline while preserving resident demographics. The authors delve deep into the social, political, human, and financial capital involved in effecting change and how race and regional issues can complicate approaches and outcomes. Throughout, they integrate case examples to illustrate their strategies and conclude with a consideration of the critical role social workers can play in developing CED's next phase.

Warranties and Disclaimers: Limitations of Liability in Consumer-Related Transactions
Martin Kurer, Stefano Codoni, Klaus Günther, 2002-06-13 As the volume of international business transactions continues to grow dramatically, and as trade relations develop between an ever-increasing number of countries, it is inevitable that many questions of comparative business risk and liability should arise. What common elements underlie the various methods of limiting product liability applied in different national jurisdictions? How do different legal regimes protect the legitimate rights of consumers? These were the fundamental questions addressed by a well-attended seminar on warranties and disclaimers held within the framework of the 2000 Annual Conference of the International Bar Association in Amsterdam. The seminar--jointly sponsored by IBA Committees S (Products, Liability, Advertising, Unfair Competition and Consumer Affairs), M (International Sales and Related Commercial Transactions) and CC (Corporate Counsel)--consisted of four introductory summaries and 33 country reports by local practitioners.

The presentations focused on many important issues, including the following: legal and contractual warranties in contracts for the supply of goods or services between manufacturers, distributors and end-users; methods of communicating disclaimers and limitations of liability; strategies for securing limitations of liability downstream; and variations in the legal effectiveness of disclaimers and limitations. This wealth of material has been compiled and reproduced in this remarkably useful book. Business lawyers will find its insights immensely valuable, whether they are drafting contracts or dealing with potential or actual liabilities virtually anywhere in the world.

New Civil Codes in Hungary and Romania Attila Menyhárd,Emőd Veress,2017-08-12 This edited volume examines two recent Central European recodifications of civil law. The contributors present and discuss the regulation and the fundamental changes related to the new Civil Codes in each country. They also highlight the novelties and some of the issues of great debate of the new regulation. The papers investigate specific parts of the two Civil Codes. Coverage reviews default rules of legal persons and companies, key issues of the new regulations of property law, and the topic of intellectual property. The contributors also consider the law of obligation, unforeseeable

changes in circumstances in contracts, family law and law of succession, and more. Hungary and Romania connect to each other by their special historical and cultural background, which serves as a solid basis of great cooperation. This volume shows how the two countries view civil law. It offers readers straightforward and practice-oriented knowledge on the subject.

Managing County Assets and Liabilities in Kenya Mihaly Kopanyi, Abdu Muwonge, 2022-10-07 Public entities around the world possess an enormous volume of assets and wealth, which includes land, buildings, historic sites, parks, and infrastructure networks, among many others. Good management of such assets is a catalyst for accelerating development and expanding services; poor asset management generates enormous losses, including lost opportunities to build wealth. Private enterprises increasingly use computerized systems to manage assets such as fleets and buildings. Many city leaders in developing countries, however, are unaware of asset management or feel they lack the time or money to undertake it. *Managing County Assets and Liabilities in Kenya: Postdevolution Challenges and Responses* can help them begin or maintain their efforts to manage assets sustainably. This book helps readers understand the basic concept of asset management; explains systems, tools, and procedures; and provides models and guidance. Kenya has achieved much since its 2013 devolution of governance and management to new counties. However, counties, which are the local governments in Kenya, are still working toward establishing systems and procedures, creating asset and liability registers, verifying and valuing assets, using assets strategically, and resolving disputes surrounding inherited assets and liabilities. This book provides glimpses into the

Kenyan devolution process and asset transfer challenges, draws lessons, and explores options relevant to both Kenya and other nations. Ample studies discuss various aspects of municipal asset management, such as managing infrastructure, fixed assets, water services, building properties, roads, or fleets. This book is unique among asset management studies in three ways: it discusses all sorts of assets and liabilities and their interlinkages, exemplifies the close connection between financial results and asset management of municipalities, and reveals the political economy challenges in transferring assets and liabilities across public entities.

Mechanical and Dynamic Properties of Biocomposites Senthilkumar Krishnasamy,Rajini Nagarajan,Senthil Muthu Kumar Thiagamani,Suchart Siengchin,2021-06-21 *Mechanical and Dynamic Properties of Biocomposites* A comprehensive review of the properties of biocomposites and their applications *Mechanical and Dynamic Properties of Biocomposites* offers a comprehensive overview of the mechanical and dynamic properties of biocomposites and natural fiber-reinforced polymer composites. This essential resource helps with materials selection in the development of products in the fields of automotive and aerospace engineering as well as the construction of structures in civil engineering. With contributions from a panel of

experts in the field, the book reviews the mechanical and damping properties of lingo-cellulosic fibers and their composites. The authors highlight the factors that contribute to the improved properties and their advancements in modern industrialization. Besides, the book is designed to (a) introduce the mechanical and damping properties of lingo-cellulosic fibers and their composites, (b) factors that contribute to improvement in properties such as hybridization, chemical treatment of natural fibers, additive or fillers, etc. and (c) the real-time applications with case studies and future prospects. Key features: Presents viable alternatives to conventional composites Examines the environmentally friendly and favorable mechanical properties of biocomposites Reviews the potential applications of biocomposites in the fields of automotive, mechanical and civil engineering Brings together in one comprehensive resource information found scattered across the professional literature Written for materials scientists, polymer chemists, chemists in industry, civil engineers, construction engineers, and engineering scientists in industry, Mechanical and Dynamic Properties of Biocomposites offers a comprehensive review of the properties and applications of biocomposites.

The Natural Problem of Consciousness Pietro Snider, 2017-06-12 The “Natural Problem of Consciousness” is the problem of understanding why there are presently conscious beings at all. Given a non-reductive naturalist framework taking consciousness as an ontologically subjective biological phenomenon, how can we rationally explain the fact that the actual world has turned out to be one where there are presently living beings that can feel, rather than having developed as a zombie-world in which there would be no conscious experiences of any kind? This book introduces the Natural Problem by relating

it to central problems in the philosophy of mind (metaphysical mind-body problem, Hard Problem of consciousness) and emphasizing the distinctive interest of its diachronic dimension. Ranging from philosophy to biology and neuroscience, it offers a thorough analysis aimed at better understanding what could explain why phenomenal consciousness has been preserved throughout evolution by natural selection. This is an original, engaging, and thought provoking philosophical study of a neglected but fundamental question regarding the nature and origin of consciousness.
