**The Strip** Stefan Al, 2017-03-10 The transformations of the Strip—from the fake Wild West to neon signs twenty stories high to “starchitecture”—and how they mirror America itself. The Las Vegas Strip has impersonated the Wild West, with saloon doors and wagon wheels; it has decked itself out in midcentury modern sleekness. It has illuminated itself with twenty-story-high neon signs, then junked them. After that came Disney-like theme parks featuring castles and pirates, followed by replicas of Venetian canals, New York skyscrapers, and the Eiffel Tower. (It might be noted that forty-two million people visited Las Vegas in 2015—ten million more than visited the real Paris.) More recently, the Strip decided to get classy, with casinos designed by famous architects and zillion-dollar collections of art. Las Vegas became the “implosion capital of the world” as developers, driven by competition, got rid of the old to make way for the new—offering a non-metaphorical definition of “creative destruction.” In *The Strip*, Stefan Al examines the many transformations of the Las Vegas Strip, arguing that they mirror transformations in America itself. The Strip is not, as popularly supposed, a display of architectural freaks but representative of architectural trends and a record of social, cultural, and economic change. Al tells two parallel stories. He describes the feverish competition of Las Vegas developers to build the snazziest, most tourist-grabbing casinos and resorts—with a cast of characters including the mobster Bugsy Siegel, the eccentric billionaire Howard Hughes, and the would-be political kingmaker Sheldon Adelson. And he views the Strip in a larger social context, showing that it has not only reflected trends but also magnified them and sometimes even initiated them. Generously illustrated with stunning color images throughout, *The Strip* traces the many metamorphoses of a city that offers a vivid projection of the American dream.

**Neon's Secret Universe** Sibéal Pounder, 2022-07-07 Unicorns are NOT horse creatures with horns. In fact, they are the most powerful magical beings on the planet and they look just like you and me. They live in a secret realm known as the Universe, and the horse with a horn thing was just something a unicorn called Greg made up to distract the humans – and it really worked! But a young human girl called Neon Gallup is about to find the last remaining Universe portal opener (an old, battered green lipstick) and step into a zany world where magic is made with goo and the possibilities are endless! Unfortunately, if there was one person you wouldn't want keeping the greatest magical secret of all time, it would be Neon Gallup ...

**Sign Wars** Robert Goldman, Stephen Papson, 1996-05-21 Television has become so saturated with commercials that it is difficult at times to tell the different images apart, much less remember or care about them. But, on closer look, television commercials can tell us a great deal about the interplay of market forces, contemporary culture, and corporate politics. This book views contemporary ad culture as an ever-accelerating war of meaning. The authors show how corporate symbols or signs vie for attention-span and market share by appropriating and quickly abandoning diverse elements of culture to differentiate products that may be in themselves virtually indistinguishable. The resulting sign wars are both a cause and a consequence of a media culture that is cynical and jaded, but striving for authenticity. Including more than 100 illustrations and numerous examples from recent campaigns, this book provides a critical review of the culture of advertising. It exposes the contradictions that stem from turning culture into a commodity, and illuminates the impact of television commercials on the way we see and understand the world around us.

**Ethics for Adversaries** Arthur Isak Applbaum, 2000-07-10 The adversary professions--law, business, and government, among others--typically claim a moral permission to violate persons in ways that, if not for the professional role, would be morally wrong. Lawyers advance bad ends and deceive, business managers exploit and despoil, public officials enforce unjust laws, and doctors keep confidences that, if disclosed, would prevent harm. Ethics for Adversaries is a philosophical inquiry into arguments that are offered to defend seemingly wrongful actions performed by those who occupy what Montaigne called necessary offices. Applbaum begins by examining the career of Charles-Henri Sanson, who is appointed executioner of Paris by Louis XVI and serves the punitive needs of the ancien régime for decades. Come the French Revolution, the King's Executioner becomes the king's executioner, and he ministers with professional detachment to each defeated political faction throughout the Terror and its aftermath. By exploring one extraordinary role and the arguments that can be offered in its defense, Applbaum raises unsettling doubts about arguments in defense of less sanguinary professions and their practices. To justify harmful acts, adversaries appeal to arguments about the rules of the game, fair play, consent, the social construction of actions and actors, good outcomes in equilibrium, and the legitimate authority of institutions. Applbaum concludes that these arguments are weaker than supposed and do not morally justify much of the violation that professionals and public officials inflict. Institutions and the roles they create ordinarily cannot mint moral permissions to do what otherwise would be morally prohibited.

**Political Accountability** Antonino Palumbo, 2017-03-02 Political accountability forms a cornerstone of modern democracy: it directs the political system towards the public interest and allows the exercise of the principles of autonomy and self-determination that lie at the core of democratic politics. Sadly, existing democracies, with their large, centralized bureaucracies, have evolved in ways that progressively undermine the ability of citizens to keep their representatives accountable and political regimes responsive. Far from reversing this trend, the neoliberal reforms introduced since the 1980s have increased that accountability gap. Globalization and the alleged passage from 'government' to 'governance' have aggravated the problem further. The notion of accountability that survives these changes is a problematic form of auditing carried out by a constellation of quangos, autonomous agencies and NGOs whose own accountability is problematic. This volume collects the main contributions to current debates on political accountability. It explores the challenges traditional conventions of accountability face today at the domestic, trans- and international levels and indicates the distinctive solutions those challenges require.

**Flickering Light** Christoph Ribbat, 2013-07-15 Without neon, Las Vegas might still be a sleepy desert town in Nevada and Times Square merely another busy intersection in New York City. Transformed by the installation of these brightly colored signs, these destinations are now world-famous, representing the vibrant heart of popular culture. But for some, neon lighting represents the worst of commercialism. Energized by the conflicting love and hatred people have for neon, *Flickering Light* explores its technological and intellectual history, from the discovery of the noble gas in late nineteenth-century London to its fading popularity today. Christoph Ribbat follows writers, artists, and musicians—from cultural critic Theodor Adorno, British rock band the Verve, and artist Tracey Emin to Vladimir Nabokov, Langston Hughes, and American country singers—through the neon cities in Europe, America, and Asia, demonstrating how they turned these blinking lights and letters into metaphors of the modern era. He examines how gifted craftsmen carefully sculpted neon advertisements, introducing elegance to modern metropolises during neon's heyday between the wars followed by its subsequent popularity in Las Vegas during the 1950s and '60s. Ribbat ends with a melancholy discussion of neon's decline, describing how these glowing signs and installations came to be seen as dated and characteristic of run-down neighborhoods. From elaborate neon lighting displays to neglected diner signs with unlit letters, *Flickering Light* tells the engrossing story of how a glowing tube of gas took over the world—and faded almost as quickly as it arrived.

**Ghost Wars** Steve Coll, 2004-12-28 Winner of the 2005 Pulitzer Prize "The CIA itself would be hard put to beat his grasp of global events . . . Deeply satisfying." —The New York Review of Books From the award-winning and bestselling author of *Directorate S*, the explosive first-hand account of America's secret history in Afghanistan. To what extent did America's best intelligence analysts grasp the rising thread of Islamist radicalism? Who tried to stop bin Laden and why did they fail? Comprehensively and for the first time, Pulitzer Prize-winning journalist Steve Coll recounts the history of the covert wars in Afghanistan that fueled Islamic militancy and sowed the seeds of the September 11 attacks. Based on scrupulous research and firsthand accounts by key government, intelligence, and military personnel both foreign and American, *Ghost Wars* details the secret history of the CIA's role in Afghanistan (including its covert operations against Soviet troops from 1979 to 1989), the rise of the Taliban, the emergence of bin Laden, and the failed efforts by U.S. forces to find and assassinate bin Laden in Afghanistan.

**Carthage's Other Wars** Dexter Hoyos, 2019-12-19 "A very good read . . . and a reminder that the Romans were hardly the only imperialist warmongers of the ancient world." —StrategyPage Carthage was the western Mediterranean's first superpower, long before Rome, and her military history was powerful, eventful, and checkered even before her "Punic Wars" against Rome. Although characterized in the surviving sources and modern studies as a predominantly mercantile state, Carthage fought many wars, both aggressive and defensive, before and in between the contests with the Roman parvenus. The Greek states of Sicily, above all Syracuse under its tyrants Dionysius the Great and then Agathocles, were her most resolute opponents, but in North Africa itself, in Sardinia, and later on in Spain she won—and sometimes lost—major wars. This is the first full-length study dedicated to these other wars that furthered Carthage's interests for over half a millennium. Based firmly and analytically on ancient sources, it

also offers the insight that Carthage, though usually considered a naval power, did more fighting on land than at sea—and with more success. Includes illustrations
