Replacement Parts Arthur L. Caplan,James J. McCartney,Daniel P. Reid,2015-09-24 In *Replacement Parts*, internationally recognized bioethicist Arthur L. Caplan and coeditors James J. McCartney and Daniel P. Reid assemble seminal writings from medicine, philosophy, economics, and religion that address the ethical challenges raised by organ transplantation. Caplan's new lead essay explains the shortfalls of present policies. From there, book sections take an interdisciplinary approach to fundamental issues like the determination of death and the dead donor rule; the divisive case of using anencephalic infants as organ donors; the sale of cadaveric or live organs; possible strategies for increasing the number of available organs, including market solutions and the idea of presumed consent; and questions surrounding transplant tourism and gaming the system by using the media to gain access to organs. Timely and balanced, *Replacement Parts* is a first-of-its-kind collection aimed at surgeons, physicians, nurses, and other professionals involved in this essential lifesaving activity that is often fraught with ethical controversy.

ICBBEM 2023 Liu Lin,Zhang Kun,Kannimuthu S.,2023-07-24 The 2nd International Conference on Bigdata Blockchain and Economy Management (ICBBEM 2023) was successfully held on 19-21 May 2023 in Hangzhou, China. The conference aims to present the latest research results in the areas related to Big Data, Blockchain and Economic Management, and provide an opportunity for experts and scholars from various fields to meet face-to-face, exchange new ideas and practical experiences, establish business or research relationships, and seek future international cooperation. This volume contains a collection of excellent papers from the conference, presented on topics such as computer software and computer applications, blockchain in data management, e-commerce and digital commerce, and linear regression analysis. We hope that these papers will serve as a reference for young scholars in their future research.

You'll also find thorough coverage of key issues such as physical security, forensics, and cyberterrorism. Throughout, Easttom blends theory and application, helping you understand both what to do and why. In every chapter, quizzes, exercises, projects, and web resources deepen your understanding and help you use what you've learned-in the classroom and in your career. Learn How To · Evaluate key network risks and dangers · Choose the right network security approach for your organization · Anticipate and counter widespread network attacks, including those based on "social engineering" · Successfully deploy and apply firewalls and intrusion detection systems · Secure network communication with virtual private networks · Protect data with cryptographic public/private key systems, digital signatures, and certificates · Defend against malware, including ransomware, Trojan horses, and spyware · Harden operating systems and keep their security up to date · Define and implement security policies that reduce risk · Explore leading security standards and models, including ISO and NIST standards · Prepare for an investigation if your network has been attacked · Understand the growing risks of espionage and cyberterrorism

Textbook on organ donation Multidisciplinary perspectives Reeta Dar,2022-05-09 It is a multidisciplinary academic book on organ donation for graduate and post-graduate students of philosophy, sociology, psychology, law, medicine, public health, and nursing. The book, written in a simple language, compares India's living and deceased organ donation and transplant activities with that of the globe. Besides, it divulges the complex medical, ethical, legal, social and psychological aspects of living and deceased organ donation and transplantation. This book is helpful for researchers in identifying and selecting topics for further research. Based on the review of literature and PhD research work of the author, this book is one of its kind in India.

Regional Networks in Context Maria Baramova, Plamen Mitev, Ivan Parvev, The 'Balkan space' in the 19th century fell into a zone of limited modernization, which led to an unbalanced economic development. Therefore, the complexity of the circumstances requires research into the process by putting it into a European-wide and Balkan-regional context. International scholars have seen the 19th-century Bulgarian economy as a local phenomenon resulting in very few extensive and detailed works. Accordingly, the editors hope the present study volume will contribute to filling that gap. The case study of the broad and diverse network of people and ventures of the brothers Evlogi and Hristo Georgievi took the æcentral stageÆ of the book as an illustration of the evolution of the Bulgarian society and elite in the 19th century.

Land and Disaster Management Strategies in Asia Huong Ha,2014-09-01 This book focuses on land and disaster governance in Asian countries. The Asian region has become increasingly vulnerable to natural disasters, including floods, cyclones, storms, earthquakes, drought, typhoons and tsunamis. Further, as a result of unsustainable changes being made in patterns of land use, catchment and coastal zones, increasing population density, migration patterns, and the spread of consumer culture across countries, the impact of natural disasters has increased manifold. The book addresses two major concerns in this field. Firstly, it discusses topics intended to raise awareness among all stakeholders of the critical aspects of disaster management in the context of Asia. Secondly, it calls upon policymakers, researchers, academics, practitioners, private enterprises and civil society organizations, as well as all those who have been, are and will be affected by natural disasters to search for innovative and novel approaches to reducing risk and managing disasters.

Proceedings of the 2nd International Academic Conference on Blockchain, Information Technology and Smart Finance (ICBIS 2023) Jerome Yen, Mohammad Zoynul Abedin, Wan Azman Saini Bin Wan Ngah, 2023-07-25 This is an open access book. With the rapid development of modern economy and Internet technology, the traditional financial industry has to develop Internet finance to provide better services and meet the needs of the times. It is against this background that the blockchain, relying on its special advantages (collective maintenance, reliable databases, and decentralization), provides the reliability to solve the credit risk of Internet finance, has an impact on institutions, trust mechanisms, risk control, etc. in the Internet finance industry, and has derived more new application scenarios, thus paving the way for the development of finance in the Internet era. Applying blockchain technology to the financial field can promote data information sharing, improve value transmission efficiency, and enhance database security. The financial market based on the decentralized system of blockchain technology can reduce the operating costs of financial institutions, improve economic efficiency, and solve problems such as information asymmetry. The new financial business model of blockchain+finance is conducive to improving the Internet credit reporting system, preventing and controlling Internet financial risks, and further realizing financial disintermediation. At present, in China's financial field, blockchain technology has been applied and innovated in supply chain finance, cross-border payment, trade finance, asset securitization and other scenarios. To promote the exchange and development of blockchain, information technology and financial experts and scholars. The 2nd International Academic Conference on Blockchain, Information Technology and Smart Finance (ICBIS 2023) will be held in Hangzhou from February 17 to 19, 2023. This conference mainly focuses on the latest research on blockchain, information technology and smart finance. This conference brings together experts, scholars, researchers and relevant practitioners in this field from all over the world to share research results, discuss hot issues, and provide participants with cutting-edge scientific and technological information, so that you can timely understand the development trends of the industry and master the latest technologies, broaden research horizons and promote academic progress.

The Role of Child Life Specialists in Community Settings Lowry, Genevieve, Murphy, Lindsey, Smith, Cara, 2022-10-14 While the genesis of the Certified Child Life Specialists (CCLS) is in the healthcare setting, the theory and practice of child life has been successfully applied to environments outside of the healthcare field. The interest and pursuit of child life roles in non-healthcare settings have increasingly become of interest to students and professionals; however, further study is required to understand the various challenges and opportunities. *The Role of Child Life Specialists in Community Settings* serves as an innovative guide for those interested in pursuing child life in diverse settings with the education and credentials received through their child life certification and addresses issues the field currently faces related to saturation of the field, burn out, and diversity, equity, and inclusion. The book also serves as a catalyst to push the profession as a whole beyond its current healthcare boundaries. Covering topics such as grief, addiction, disaster relief, and family wellbeing, this major reference work is ideal for psychologists, medical professionals, nurses, policymakers, government officials, researchers, scholars, academicians, practitioners, instructors, and students.
