Epic Lives and Monasticism in the Middle Ages, 800–1050 Anna Lisa

Taylor, 2013-09-02 This is the first book to focus on Latin epic verse saints' lives in their medieval historical contexts. Anna Taylor examines how these works promoted bonds of friendship and expressed rivalries among writers, monasteries, saints, earthly patrons, teachers and students in Western Europe in the central Middle Ages. Using philological, codicological and microhistorical approaches, Professor Taylor reveals new insights that will reshape our understanding of monasticism, patronage and education. These texts give historians an unprecedented glimpse inside the early medieval classroom, provide a nuanced view of the complicated synthesis of the Christian and Classical heritages, and show the cultural importance and varied functions of poetic composition in the ninth, tenth and eleventh centuries.

Math Without Numbers Milo Beckman, 2022-01-11 An illustrated tour of the structures and patterns we call math The only numbers in this book are the page numbers. Math Without Numbers is a vivid, conversational, and wholly original guide to the three main branches of abstract math—topology, analysis, and algebra—which turn out to be surprisingly easy to grasp. This book upends the conventional approach to math, inviting you to think creatively about shape and dimension, the infinite and infinitesimal, symmetries, proofs, and how these concepts all fit together. What awaits readers is a freewheeling tour of the inimitable joys and unsolved mysteries of this curiously powerful subject. Like the classic math allegory Flatland, first published over a century ago, or Douglas Hofstadter's Godel, Escher, Bach forty years ago, there has never been a math book quite like Math Without Numbers. So many popularizations of math have dwelt on numbers like pi or zero or infinity. This book goes well beyond to questions such as: How many shapes are there? Is anything bigger than infinity? And is math even true? Milo Beckman shows why math is mostly just pattern recognition and how it keeps on surprising us with unexpected, useful connections to the real world. The ambitions of this book take a special kind of author. An inventive, original thinker pursuing his calling with jubilant passion. A prodigy. Milo Beckman completed the graduate-level course sequence in mathematics at age sixteen, when he was a sophomore at Harvard; while writing this book, he was studying the philosophical foundations of physics at Columbia under Brian Greene, among others.

The Optimist's Telescope Bina Venkataraman, 2020-08-25 Named a Best Book of 2019 by NPR "How might we mitigate losses caused by shortsightedness? Bina Venkataraman, a former climate adviser to the Obama administration, brings a storyteller's eye to this question. . . . She is also deeply informed about the relevant science." —The New York Times Book Review A trailblazing exploration of how we can plan better for the future: our own, our families', and our society's. Instant gratification is the norm today—in our lives, our culture, our economy, and our politics. Many of us have forgotten (if we ever learned) how to make smart decisions for the long run. Whether it comes to our finances, our health, our communities, or our planet, it's easy to avoid

thinking ahead. The consequences of this immediacy are stark: Deadly outbreaks spread because leaders failed to act on early warning signs. Companies that fail to invest stagnate and fall behind. Hurricanes and wildfires turn deadly for communities that could have taken more precaution. Today more than ever, all of us need to know how we can make better long-term decisions in our lives, businesses, and society. Bina Venkataraman sees the way forward. A journalist and former adviser in the Obama White House, she helped communities and businesses prepare for climate change, and she learned firsthand why people don't think ahead—and what can be done to change that. In *The Optimist's Telescope*, she draws from stories she has reported around the world and new research in biology, psychology, and economics to explain how we can make decisions that benefit us over time. With examples from ancient Pompeii to modern-day Fukushima, she dispels the myth that human nature is impossibly reckless and highlights the surprising practices each of us can adopt in our own lives—and the ones we must fight for as a society. The result is a book brimming with the ideas and insights all of us need in order to forge a better future.

Bones Jonathan Kellerman, 2009-02-24 When it comes to writing deftly layered, tightly coiled novels of suspense, #1 New York Times bestselling author Jonathan Kellerman reigns supreme as “master of the psychological thriller” (People). Kellerman has worked his magic again in this chilling

masterpiece. The anonymous caller has an ominous tone and an unnerving message about something "real dead . . . buried in your marsh." The eco-volunteer on the other end of the phone thinks it's a prank, but when a young woman's body turns up in L.A.'s Bird Marsh preserve no one's laughing. And when the bones of more victims surface, homicide detective Milo Sturgis realizes the city's under siege to an insidious killer. Milo's first move: calling in psychologist Alex Delaware. The murdered women are prostitutes—except the most recent victim; a brilliant young musician from the East Coast, employed by a wealthy family to tutor a musical prodigy, Selena Bass seems out of place in the marsh's grim tableau. Conveniently—perhaps ominously—Selena's blueblood employers are nowhere to be found, and their estate's jittery caretaker raises hackles. But Milo's instincts and Alex's insight are too well-honed to settle for easy answers, even given the dark secrets in this troubled man's past. Their investigation unearths disturbing layers—about victims, potential victims, and suspects alike—plunging even deeper into the murky marsh's enigmatic depths. Bizarre details of the crimes suggest a devilish serial killer prowling L.A.'s gritty streets. But when a new murder deviates from the pattern, derailing a possible profile, Alex and Milo must look beyond the suspicion of madness and consider an even more sinister mind at work. Answers don't come easy, but the darkest of drives and desires may fuel the most devious of foes. *Bones* is classic Kellerman—relentlessly peeling back the skin and psyches of its characters and revealing the shadows and sins of the souls beneath. With jolt after jolt of galvanizing suspense, it drives the reader through its twists and turns toward a climax as satisfying as it is shattering.

The Guardian of the Spectacle Krister Bladh, 2010-08-01 How can the graphic design of a popular, contemporary daily newspaper be 'détourned' to reveal its ideological function? This question is addressed in a new undergraduate thesis at Malmö University, Sweden, based on an ideological analysis of *The Guardian*. Using Guy Debord and the Situationists method of détournement, five of its front pages have been redesign and printed as an implementation of the conclusions drawn. The prints were sent back to the editors as a reversed subscription.
