Plotting a True Course William P. Head,2003-05-30 Examining wars from the allied victory in World War II to the conflict in Viet Nam, and finally to the operations in the Gulf and Kosovo, this book presents a comprehensive look at the evolution of strategic air attack theory and doctrine over the years.

Night Hunters William P. Head,2012

SHADOW AND STINGER: Developing the AC119G/K Gunships in the Vietnam War William P. Head,2007

Report Transvaal (South Africa). Education Department,1926

Night Hunters William Pace Head,2014-03-18 In *Night Hunters*, air power historian William P. Head provides the first detailed study of the development and deployment of the AC-130 gunship. While other airframes and other types of close air support (CAS) and interdiction weapon systems preceded or flew with the AC-130s, this four-engine cargo airframe proved to be not only the longest serving fixed-wing gunship but also the most effective by far. During the Vietnam War, the US military developed new tactics and weapons systems to counter a diversity of enemy tactics and geographic features, the difficult climate, and the shifting diplomatic context. One of the most important was the development of the AC-130. Its ability to transport heavier payloads at higher altitudes across longer distances made it the logical choice to be the final Vietnam-era fixed-wing gunship and the only one that continues to fly missions in the twenty-first century. In addition, it employed many of the most advanced weapons, sensors, targeting devices, and fire control systems of the 1970s or of any era. By recounting both the technical development and the combat operations of the plane, and by looking at the proposed alternatives for its use in the War on Terror, *Night Hunters* offers a clear view of the role of gunships and of close air support in US wars. In today's never-ending brushfire wars, the AC-130s continue to uphold their reputation for excellence.

Golden Legacy, Boundless Future ,2000

Storms over the Mekong William Pace Head,2020-04-30 From the defeat of the Army of the Republic of Vietnam at Ap Bac to the battles of the Ia Drang Valley, Khe Sanh, and more, *Storms over the Mekong* offers a reassessment of key turning points in the Vietnam War. Award-winning historian William P. Head not only reexamines these pivotal battles but also provides a new interpretation on the course of the war in Southeast Asia. In considering Operation Rolling Thunder, for example—which Head dubs as “too much rolling and not enough thunder”—readers will grasp the full scope of the campaign, from specifically targeted bridges in North Vietnam to the challenges of measuring success or failure, the domestic political situation, and how over time, Head argues, “slowly, but surely, Rolling Thunder dug itself into a hole.” Likewise, Head shows how the battles for Saigon and Hue during the Tet Offensive of 1968 were tactical defeats for the Communist forces with as many as 40,000 killed and no real gains. At the same time, however, Tet made it clear to many in Washington that victory in Vietnam would require a still greater commitment of men and resources, far more than the American people were willing to invest. *Storms over the Mekong* is a blow-by-blow account of the key military events, to be sure. But beyond that, it is also a measured reconsideration of the battles and moments that Americans thought they already knew, adding up to a new history of the Vietnam War.

Selected Research Papers on Personal Reemployment Accounts Elaine L. Chao,2005

Official Gazette of the United States Patent Office United States. Patent Office,1931-11

Biology of the Mouse Histocompatibility-2 Complex J. de Klein,2012-12-06 Somewhere I heard a story of a bridge and a painter.

The bridge was enormous and was made all of metal, and the painter's job was to keep it from rusting. He would start at one end and slowly proceed, day by day, month by month, toward the other end, painting the bridge. But no sooner would he finish with the painting than the bridge would begin to rust again. The rust, too, would start at one end and slowly proceed toward the other end, systematically destroying the painter's endeavor. And so the painter would return to where he had started, and begin painting again, slowly proceeding toward the other end of the bridge, always just one step ahead of the rust. And if the story is true, the painter might still be painting that bridge—a modern Sisyphus! During the writing of this book, the story of the painter and his bridge kept coming to mind. The field the book covers has been developing so rapidly that, like the painter, I too had to return to where I had started and fight the rust of obsolescence. But unlike the painter, I had a deadline to meet, which constituted a point of no return. And so, sending off this manuscript, I have no choice but to watch the fruits of my endeavor be overtaken by the rust.
