Marijuana Law, Policy, and Authority Robert A.

Mikos, 2017-05-18 Marijuana Law, Policy, and Authority is a first-of-its-kind law school casebook in a rapidly-emerging and exciting new field. The accessible, comprehensive, and engaging material guides students through the competing approaches to regulating marijuana, the purposes and effects of those approaches, and the legal authorities for choosing among them. The helpful organization intersperses these issues of substantive law, policy, and authority throughout the discussion of users, suppliers, and third parties. Substantive law materials cover either prohibitions or regulations targeting users, suppliers, or third parties. Policy materials cover the goals of marijuana law and policy as well as the research on the impact of different marijuana policies. Authority materials address the different levels of government—federal, state, and local. Notes, questions, and numerous problems in each chapter provide additional thought-provoking material and help to reinforce student learning. Current, news-headlining cases keep the discussion interesting and lively. Key Features: Internationally renowned author Robert Mikos is the premier authority on marijuana law. He draws upon nearly a decade of professional experience teaching, lecturing, consulting, and writing about marijuana law and policy. Three distinct but inter-woven topics are covered: the substantive law governing marijuana; the policy rationales behind and outcomes produced by different approaches to regulating the drug; and the legal authority to regulate the drug. Students are guided through the multi-faceted legal and policy issues now confronting lawyers, lawmakers, judges, and policy analysts working in this emerging field. Written in a style that is familiar to law students, but also accessible to a much broader audience, including graduate and upper level undergraduate students in courses in policy studies, political science, and criminology. Cutting-edge issues are included that are intellectually engaging for students and

professors alike—e.g., how are conflicts between state/ federal law resolved? What are the roles of courts and executive officers in terms of policy? Dives deeply into classic legal issues: contract enforceability and powers of court, Congress, and the state. Notes and Questions following cases offer stimulating fodder for discussion.

Marijuana As Medicine? Institute of Medicine, Janet Joy, Alison Mack, 2000-12-30 Some people suffer from chronic, debilitating disorders for which no conventional treatment brings relief. Can marijuana ease their symptoms? Would it be breaking the law to turn to marijuana as a medication? There are few sources of objective, scientifically sound advice for people in this situation. Most books about marijuana and medicine attempt to promote the views of advocates or opponents. To fill the gap between these extremes, authors Alison Mack and Janet Joy have extracted critical findings from a recent Institute of Medicine study on this important issue, interpreting them for a general audience. *Marijuana As Medicine?* provides patients—as well as the people who care for them—with a foundation for making decisions about their own health care. This empowering volume examines several key points, including: Whether marijuana can relieve a variety of symptoms, including pain, muscle spasticity, nausea, and appetite loss. The dangers of smoking marijuana, as well as the effects of its active chemical components on the immune system and on psychological health. The potential use of marijuana-based medications on symptoms of AIDS, cancer, multiple sclerosis, and several other specific disorders, in comparison with existing treatments. *Marijuana As Medicine?* introduces readers to the active compounds in marijuana. These include the principal ingredient in Marinol, a legal medication. The authors also discuss the prospects for developing other drugs derived from marijuana's active ingredients. In addition to providing an up-to-date review of the science behind the medical marijuana debate, Mack and Joy also answer common questions about the legal

status of marijuana, explaining the conflict between state and federal law regarding its medical use. Intended primarily as an aid to patients and caregivers, this book objectively presents critical information so that it can be used to make responsible health care decisions. Marijuana As Medicine? will also be a valuable resource for policymakers, health care providers, patient counselors, medical faculty and students—in short, anyone who wants to learn more about this important issue.

The Health Effects of Cannabis and Cannabinoids National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on the Health Effects of Marijuana: An Evidence Review and Research Agenda, 2017-03-31 Significant changes have taken place in the policy landscape surrounding cannabis legalization, production, and use. During the past 20 years, 25 states and the District of Columbia have legalized cannabis and/or cannabidiol (a component of cannabis) for medical conditions or retail sales at the state level and 4 states have legalized both the medical and recreational use of cannabis. These landmark changes in policy have impacted cannabis use

patterns and perceived levels of risk. However, despite this changing landscape, evidence regarding the short- and long-term health effects of cannabis use remains elusive. While a myriad of studies have examined cannabis use in all its various forms, often these research conclusions are not appropriately synthesized, translated for, or communicated to policy makers, health care providers, state health officials, or other stakeholders who have been charged with influencing and enacting policies, procedures, and laws related to cannabis use. Unlike other controlled substances such as alcohol or tobacco, no accepted standards for safe use or appropriate dose are available to help guide individuals as they make choices regarding the issues of if, when, where, and how to use cannabis safely and, in regard to therapeutic uses, effectively. Shifting public sentiment, conflicting and impeded scientific research, and legislative battles have fueled the debate about what, if any, harms or benefits can be attributed to the use of cannabis or its derivatives, and this lack of aggregated knowledge has broad public health implications. The Health Effects of Cannabis and Cannabinoids provides a comprehensive review of scientific evidence related to the health effects and potential therapeutic benefits of cannabis. This report provides a research agenda—outlining gaps in current knowledge and opportunities for providing additional insight into these issues—that summarizes and prioritizes pressing research needs.

Therapeutic Uses of Cannabis British Medical Association, 1997-11-18 At the last Annual Representative Meeting of the British Medical Association a motion was passed that "certain additional cannabinoids should be legalized for wider medicinal use." This report supports this landmark statement by reviewing the scientific evidence for the therapeutic use of cannabinoids and sets the agenda for change. It will be welcomed by those who believe that cannabinoids can be used in medical treatment. The report discusses in a clear and readable

form the use and adverse effects of the drug for nausea, multiple sclerosis, pain, epilepsy, glaucoma, and asthma.

Paul McCartney Barry Miles, 1998-10-15 A definitive, authorized portrait of Paul McCartney draws on hundreds of hours of exclusive interviews and access to personal archives to chronicle the private life and successful career of one of the world's most famous musicians, the world of the Beatles, his partnership with John Lennon, and more.

Stoned David Casarett M.D., 2015-07-14 A doctor discovers the surprising truth about marijuana No substance on earth is as hotly debated as marijuana. Opponents claim it's dangerous, addictive, carcinogenic, and a gateway to serious drug abuse. Fans claim it as a wonder drug, treating cancer, anorexia, AIDS, chronic pain, glaucoma, arthritis, migraines, PTSD, and insomnia. Patients suffering from these conditions need—and deserve—hard facts based on medical evidence, not hysteria and superstition. In *Stoned*, palliative care physician Dr. David Casarett sets out to do anything—including experimenting on himself—to find evidence of marijuana's medical potential. He smears mysterious marijuana paste on his legs and samples pot wine. He poses as a patient at a seedy California clinic and takes lessons from an artisanal hash maker. In conversations with researchers, doctors, and patients around the world he learns how marijuana works—and doesn't—in the real world. Dr. Casarett unearths tales of near-miraculous success, such as a child with chronic seizures who finally found relief in cannabidiol oil. In Tel Aviv, he learns of a nursing home that's found success giving marijuana to dementia patients. On the other hand, one patient who believed marijuana cured her lung cancer has clearly been misled. As Casarett sifts the myth and misinformation from the scientific evidence, he explains, among other things:

- Why marijuana might be the best treatment option for some types of pain
- Why there's no significant risk of lung damage from smoking pot
- Why most marijuana-infused beer or wine won't get you high

Often

humorous, occasionally heartbreaking, and full of counterintuitive conclusions, *Stoned* offers a compassionate and much-needed medical practitioner's perspective on the potential of this misunderstood plant.

Higher Etiquette Lizzie Post, 2019-03-26 Emily Post has gone to pot. As we enter the dawn of a new post-prohibition era, the stigma surrounding cannabis use is fading, and the conversation about what it means to get high is changing. When it comes to being a respectful, thoughtful, and responsible consumer of pot, there is a lot you need to know. Combining cannabis culture's long-established norms with the Emily Post Institute's tried-and-true principles, this book covers the social issues surrounding pot today, such as: How to bring it to a dinner party or give it as a gift Why eating it is different from inhaling it How to respectfully use it as a guest Why different strains affect you in different ways How to behave at a dispensary How to tackle pot faux pas such as canoed joints and lawn-mowed bowls This handy guide also provides a primer on the diverse array of cannabis products and methods of use, illuminating the many convenient and accessible options available to everyone from experienced users to newbies and the canna-curious. Informative, charming, and stylishly illustrated, this buzzworthy book will make the ultimate lit addition to your stash.

Vinyl Junkies Brett Milano, 2003-11-10 Not too far away from the flea markets, dusty attics, cluttered used record stores and Ebay is the world of the vinyl junkies. Brett Milano dives deep into the piles of old vinyl to uncover the subculture of record collecting. A vinyl junkie is not the person who has a few old 45s shoved in the cuboard from their days in high school. Vinyl Junkies are the people who will travel over 3,000 miles to hear a rare b-side by a German band that has only recorded two songs

since 1962, vinyl junkies are the people who own every copy of every record produced by the favorite artist from every pressing and printing in existence, vinyl junkies are the people who may just love that black plastic more than anything else in their lives. Brett Milano traveled the U.S. seeking out the most die-hard and fanatical collectors to capture all that it means to be a vinyl junkie. Includes interviews with Thurston Moore of Sonic Youth, Peter Dinklage from R.E.M and Robert Crumb, creator of Fritz the cat and many more underground comics.

Stories of Changes from Open Diaries: The Joint Effects of Radio Messaging and Group Discussions to Fight Child Marriage
Getnet Eshetu, 2014-09-01 Many studies have underlined the high prevalence of child marriage in Ethiopia, particularly in the Amhara region, and their devastating effects on the mental and physical health of the girls involved. This qualitative research aims to investigate the effectiveness of multimedia messaging - including radio and print messaging, face-to-face group discussions as well as interactions with a radio station - in altering people's perception of child marriage. By analysing reflection statements in group diaries, the study identifies changes in the Knowledge, Attitude and Practices (KAPs) concerning child marriage of a multimedia audience in three districts of the North Gondar Zone in the Amhara region. The study contains a comprehensive literature review, comprising several findings regarding the magnitude of child marriage practices. Using the hybrid qualitative method of thematic analysis, it highlights important features and drawbacks of potential approaches to mobilising the community against child marriage. Moreover, a detailed description of multimedia intervention procedures is included, which can serve as a guideline for media practitioners and social development initiatives.

Clearing the smokescreen: The current evidence on cannabis use
Elizabeth C. Temple, Richard Hammersley, Margriet van

Laar,Rhonda F. Brown,2015-05-08 Cannabis remains the most commonly used illicit substance world-wide, with international estimates indicating that 2.8%-4.5% of the global population use cannabis each year. This prevalence rate has not changed substantially in the past decade and there is no indication that it will do so in the next decade. In line with this, many prominent organizations and individuals have acknowledged that the “war on drugs” has failed and are now calling for a rethink on drug-related policy and legal frameworks. With a growing number of jurisdictions across the world heeding this call and introducing legislation to decriminalize or legalize cannabis use, it is essential that any changes to legal frameworks and public health policies are based on the best available scientific evidence. To facilitate the adoption of an evidence-based approach to cannabis policy, the aim of this Research Topic was to gather a comprehensive body of research to clarify the current state of evidence relating to cannabis use. Of interest were articles addressing the following questions: • How do we study cannabis use? (e.g., recruitment; measuring dose/use; assessing dependence/problematic use; confounding; translation of findings from animal studies) • What do we know about cannabis use? (e.g., patterns, contexts, methods of use) • What do we know about people who use cannabis? (e.g., who uses cannabis and why) • What are the social settings, norms and cultural values that go along with cannabis use? • How is problematic cannabis use, as opposed to mere use, defined, judged and constructed in different societies? • What do we know about the effects/outcomes of cannabis use? (e.g., acute, short- and long-term; harms/ benefits) • What do we know about the factors associated with the initiation, continuance and cessation of cannabis use? • What do we know about the medicinal use of cannabis? (e.g., who uses medicinally and why; efficacy/effectiveness in different clinical populations; comparison with other medications) • What do we know about treatment for people who engage in problematic cannabis use? (e.g., who

seeks/is referred to treatment and why; efficacy and effectiveness) • What do we know about cannabis? (e.g., pharmacodynamics/pharmacokinetics of different strains, cultivation, preparation and consumption methods) • How do policy and legal frameworks impact on the people who use cannabis? • What is the future for cannabis research? (e.g., potential avenues for future research; aspects needing more attention; innovative approaches; political/funding issues affecting cannabis research)

To Err Is Human Institute of Medicine, Committee on Quality of Health Care in America, 2000-03-01 Experts estimate that as many as 98,000 people die in any given year from medical errors that occur in hospitals. That's more than die from motor vehicle accidents, breast cancer, or AIDS—three causes that receive far more public attention. Indeed, more people die annually from medication errors than from workplace injuries. Add the financial cost to the human tragedy, and medical error easily rises to the top ranks of urgent, widespread public problems. *To Err Is Human* breaks the silence that has surrounded medical errors and their consequence—but not by pointing fingers at caring health care professionals who make honest mistakes. After all, to err is human. Instead, this book sets forth a national agenda—with state and local implications—for reducing medical errors and improving patient safety through the design of a safer health system. This volume reveals the often startling statistics of medical error and the disparity between the incidence of error and public perception of it, given many patients' expectations that the medical profession always performs perfectly. A careful examination is made of how the surrounding forces of legislation, regulation, and market activity influence the quality of care provided by health care organizations and then looks at their handling of medical mistakes. Using a detailed case study, the book reviews the current understanding of why these mistakes happen. A key theme is that legitimate liability concerns

discourage reporting of errors—which begs the question, How can we learn from our mistakes? Balancing regulatory versus market-based initiatives and public versus private efforts, the Institute of Medicine presents wide-ranging recommendations for improving patient safety, in the areas of leadership, improved data collection and analysis, and development of effective systems at the level of direct patient care. *To Err Is Human* asserts that the problem is not bad people in health care—it is that good people are working in bad systems that need to be made safer. Comprehensive and straightforward, this book offers a clear prescription for raising the level of patient safety in American health care. It also explains how patients themselves can influence the quality of care that they receive once they check into the hospital. This book will be vitally important to federal, state, and local health policy makers and regulators, health professional licensing officials, hospital administrators, medical educators and students, health caregivers, health journalists, patient advocates—as well as patients themselves. First in a series of publications from the Quality of Health Care in America, a project initiated by the Institute of Medicine

World Wide Weed Tom Decorte,2016-02-11 For the majority of its history, the cultivation of cannabis did not stand out, at least compared to the cultivation of other illegal plants. Cannabis plantations, like coca bush or opium poppy plantations, were typically large in size, grown by local farmers in a handful of developing (producing) countries, processed and then exported to industrial (consuming) nations. While cocaine and heroin are still produced in a handful of developing countries, cannabis cultivation is increasingly universal. From Europe to the Americas and Oceania, import substitution in cannabis markets has been noticed in almost every developed country around the world, with a notable aversion for discrimination. Geographical, technological, cultural and economic factors help to explain why (indoor and outdoor) domestic cultivation is well established, and why the nature and extent of cultivation varies so dramatically across the western, developed nations. As we start the second decade of the 21st century, the new cannabis industry continues to fascinate both casual and academic observers of the drug scene. Researchers around the world have become increasingly interested in the phenomenon, aiming to describe, and potentially explain, the rapid switch from importation to domestic production in their own countries. In bringing together some of the world's

leading experts on cannabis cultivation this book contains sixteen chapters that take an interdisciplinary look at global trends in cannabis cultivation. It will serve as an exemplar for wider discussions of key theories and concepts relating to the spread not just of cannabis cultivation, but also of illegal markets more generally, the actors that operate within these markets and the policies and practices that are employed in response to developments within these markets.
