**Mobile News** Andrew Duffy, Rich Ling, Nuri Kim, Edson Tandoc, Jr., Oscar Westlund, 2020-12-17 The rise of the smartphone has shifted news from fixed publication to a flow of updateable information. The chapters in this book investigate the implications for audiences, industry and society as news becomes mobile. Wherever we go, news from anywhere can reach us on our smartphones. And wherever we are, we can search up information specific to that place. News is produced by mobile journalists (MoJos) as well as by citizens armed with smartphones, reporting breaking news from crisis zones where information is uncertain, or hyperlocal news from neighbourhoods where little happens. Mobile technology allows citizens to engage deeply with a cause or to skim headlines so they know a little about a lot of things. News is distributed on mobile networks and consumed by mobile audiences as they make their daily way through time and space coloured by their mobile devices. It is consumed in the niches of life. It intersects with place in new ways as geolocated news. It pursues us wherever we are through push notifications. And news has moved from fixed to fluid, a flow of updateable information rather than a regularly issued product. In this book, the contributors take varied viewpoints on mobility and news, its impact on what news is, how journalists produce it and how it fits into everybody's everyday life. The chapters in this book were originally published as a special issue of Digital Journalism.

**News, Public Affairs, and the Public Sphere in a Digital Nation** Edgar Simpson, 2014-08-14 Reporting makes a significant difference not just in the amount of public affairs information available to a community, but also in the amount and type of conversations about self-governance that take place in the digital world. Simpson argues that without daily professional journalism, the audience is forced to craft their own news feeds, often resulting in conversations without foundation.

**The SAGE Encyclopedia of Journalism** Gregory A. Borchard, 2022-01-28 Journalism permeates our lives and shapes our thoughts in ways that we have long taken for granted. Whether it is National Public Radio in the morning or the lead story on the Today show, the morning newspaper headlines, up-to-the-minute Internet news, grocery store tabloids, Time magazine in our mailbox, or the nightly news on television, journalism pervades our lives. The Encyclopedia of Journalism covers all significant dimensions of journalism, such as print, broadcast, and Internet journalism; U.S. and international perspectives; and history, technology, legal issues and court cases, ownership, and economics. The encyclopedia will consist of approximately 500 signed entries from scholars, experts, and journalists, under the direction of lead editor Gregory Borchard of University of Nevada, Las Vegas.

*News for a Mobile-first Consumer* Paula Maurie Poindexter, 2016 The rapid adoption of mobile devices has created a new type of consumer, one who chooses smartphones and tablets over laptops and desktops, TV and radio, print newspapers, magazines, books, and landline phones. This new mobile consumer has not just forced businesses, institutions, governments, and organizations to innovate with mobile solutions; this new mobile consumer has upended the news media landscape, challenging news organizations and journalists to produce news for consumers who have little resemblance to yesterday's newspaper readers, TV news viewers, and online news consumers. Based on two national surveys, *News for a Mobile-First Consumer* introduces a mobile consumer taxonomy comprised of three types of mobile consumers: mobile-first, mobile specialists, and mobile laggards. The demographics of these mobile consumers as well as their relationship to news and social media are explored in depth. Social media as a competitor to and platform for mobile news are also examined, and special attention is devoted to news apps from the perspective of consumers. *News for a Mobile-First Consumer* also provides insight about millennials, racial and ethnic minorities, and women, who are at the forefront of the

mobile revolution but less engaged with news. To improve mobile journalism and increase news engagement, «Essentials of Mobile Journalism» are proposed. As the first book to explore news and consumers in the mobile sphere, this book is required reading for scholars and professionals as well as undergraduate and graduate students enrolled in journalism, communication, strategic communications, advertising, media and society, marketing, and technology courses.

**Justice for All** Charles E 'Chuck' MacLean, Adam Lamparello, 2022-03-30 Justice for All identifies ten central flaws in the criminal justice system and offers an array of solutions – from status quo to evolution to revolution – to address the inequities and injustices that far too often result in courtrooms across the United States. From the investigatory stage to the sentencing and appellate stages, many criminal defendants, particularly those from marginalized communities, often face procedural and structural barriers that taint the criminal justice system with the stain of unfairness, prejudice, and arbitrariness. Systematic flaws in the criminal justice system underscore the inequitable processes by which courts deprive citizens of liberty and, in some instances, their lives. Comprehensive in its scope and applicability, the book focuses upon the procedural and substantive barriers that often prohibit defendants from receiving fair treatment within the United States criminal justice system. Each chapter is devoted to a particular flaw in the criminal justice system and is divided into two parts. First, the authors discuss in depth the underlying causes and effects of the flaw at issue. Second, the authors present a wide range of possible solutions to address this flaw and to lead to greater equality in the administration of criminal justice. The reader is encouraged throughout to consider and assess all possible options, then defend their choices and preferences. Confronting these issues is critical to reducing racial disparities and guaranteeing Justice for all. Describing the problems and assessing the solutions, Justice for All does not identify all problems or all solutions, but will be of immeasurable value to criminal justice students and scholars, as well as attorneys, judges, and legislators, who strive to address the pervasive flaws in the criminal justice system.

**Wireless Technology** Steven Powell, J.P. Shim, 2009-08-11 Wireless technology and handheld devices are dramatically changing the degrees of interaction throughout the world, further creating a ubiquitous network society. The emergence of advanced wireless telecommunication technologies and devices in today's society has increased accuracy and access rate, all of which are increasingly essential as the volume of information handled by users expands at an accelerated pace. The requirement for mobility leads to increasing pressure for applications and wireless systems to revolve around the concept of continuous communication with anyone, anywhere, and anytime. With the wireless technology and devices come flexibility in network design and quicker deployment time. Over the past decades, numerous wireless telecommunication topics have received increasing attention from industry professionals, academics, and government agencies. Among these topics are the wireless Internet; multimedia; 3G/4G wireless networks and systems; mobile and wireless network security; wireless network modeling, algorithms, and simulation; satellite based systems; 802.11x; RFID; and broadband wireless access.

**Frank Batten** Connie Sage, 2011 Frank Batten Sr. (1927-2009) created the Weather Channel in 1982, despite mocking by colleagues in the media that around-the-clock weather broadcasts would be as exciting as watching paint dry. The network, and later its companion website, Weather.com, became the largest private weather company in the world and an American cultural icon. Yet few have heard of Batten, a media pioneer whose Virginia newspaper was the only major daily to back school integration. At a time when American corporate greed was making headlines, without fanfare and limelight Batten built a media empire centered on honesty, integrity, and ethics. Starting out in his uncle's newspaper

business in Norfolk, Virginia, as a reporter and advertising salesman, he assumed leadership of the Virginian-Pilot and Ledger-Star at the age of twenty-seven and grew Landmark Communications into a media powerhouse. He championed racial equality, a position not often taken in Virginia during the 1950s. His flagship newspaper, the Pilot, was the only daily paper in Virginia to back court-ordered school desegregation. He created two billion-dollar businesses and gave away more than \$400 million to charity, nearly all of it to education. As chairman of the Associated Press from 1982 to 1987, he helped guide the news agency back on a sound financial footing. Batten also faced a tremendous personal challenge that would have sidelined many: he lost his vocal cords to cancer two years before starting the Weather Channel. This is the untold story of a man whose name few recognize, yet who helped change the face of the media in the twentieth century.

**Political Communication and Mobilisation** Taberez Ahmed Neyazi,2018-03-09 This book provides a fresh perspective on the importance of the Hindi media in India's political, social and economic transformation with evidence from the countryside and the cities. Accessed by more than forty percent of the public, it continues to play an important role in building political awareness and mobilising public opinion. Instead of viewing the media as a singular entity, this book highlights its diversity and complexity to understand the changing dynamics of political communication that is shaped by the interactions between the news media, political parties and the public, and how various media forms are being used in a rapidly transforming environment. The book offers insights into how print, television, and digital media work together with, rather than in isolation from, each another to grasp the complexities of the emerging hybrid media environment and the future of mobilisation.

The Television Handbook Jeremy Orlebar,2013-03 The Television Handbook is a critical introduction to the practice and theory of television. The book examines the state of television today, explains how television is made and how production is organised, and discusses how critical thinking about programmes and genres can illuminate their meanings. This book also explores how developments in technology and the changing structure of the television industry will lead the medium in new directions. The Television Handbook gives practical advice on many aspects of programme making, from an initial programme idea through to shooting and the post-production process. The book includes profiles giving insight into how personnel in the television industry - from recent graduates to television executives - think about their work. The Television Handbook offers chapters on the vigorous debates about what is meant by quality television, how news and factual programmes are responding to interactive technologies, and how formats such as Reality/Talent TV have risen in prominence. It also considers how drama, sport and music television can be discussed and interpreted. The Television Handbook includes: Profiles of TV news and drama producers, editors and TV studio personnel Case histories of important TV genres and series Practical programme making advice Explanations of key theoretical perspectives in television studies

Media Ethics Clifford G. Christians,Mark Fackler,Kathy Brittain Richardson,Peggy Kreshel,2016-10-04 Media Ethics: Cases and Moral Reasoning challenges readers to think analytically about ethical situations in mass communication through original case studies and commentaries about real-life media experiences. This text provides a comprehensive introduction to the theoretical principles of ethical philosophies, facilitating ethical awareness. It introduces the Potter Box, with its four dimensions of moral analysis, to provide a framework for exploring the steps in moral reasoning and analyzing the cases. Focusing on a wide spectrum of ethical issues faced by media practitioners, the cases in this Tenth Edition include the most recent issues in journalism, broadcasting, advertising, public relations, and entertainment. *Muslims and American Popular Culture* Anne R. Richards,Iraj Omidvar,2014-02-10 Offering readers an engaging, accessible, and balanced

account of the contributions of American Muslims to the contemporary United States, this important book serves to clarify misrepresentations and misunderstandings regarding Muslim Americans and Islam. Unfortunately, American mass media representations of Muslims—whether in news or entertainment—are typically negative and one-dimensional. As a result, Muslims are frequently viewed negatively by those with minimal knowledge of Islam in America. This accessible two-volume work will help readers to construct an accurate framework for understanding the presence and depictions of Muslims in American society. These volumes discuss a uniquely broad array of key topics in American popular culture, including jihad and jihadis; the hejab, veil, and burka; Islamophobia; Oriental despots; Arabs; Muslims in the media; and mosque burnings. Muslims and American Popular Culture offers more than 40 chapters that serve to debunk the overwhelmingly negative associations of Islam in American popular culture and illustrate the tremendous contributions of Muslims to the United States across an extended historical period.

The Governor of Goat Hill Eddie Curran, 2009-12-31 I think this will make Watergate look like childs play. Former Alabama Gov. Don Siegelman, on Karl Roves alleged involvement in his prosecution Was Don Siegelman the victim of a Republican conspiracy led by Karl Rove, or was he perhaps the most corrupt governor in Alabama history? On February 24, 2008, 60 Minutes delivered a bombshell claims that President Bushs political advisor Karl Rove had assigned an Alabama woman to tail Governor Don Siegelman and take photos of him having extramarital sex. The piece also presented an open and shut case that powerful Republicans including Rove and Bob Riley, Siegelmans successor as Alabamas governor had somehow ordered the Justice Department to prosecute Siegelman. In this book, Eddie Curran the investigative reporter whose stories initiated the criminal investigation delivers a far different portrait of the one-time golden boy of Alabama Democratic politics. Curran leads readers on a first-person account of his discoveries, including Siegelmans use of his office to collect more than \$1.3 million in legal fees while governor; the sale of his home through a straw man for twice its value; and a host of scandals involving the likes of Waste Management Inc., and Richard Scrushy, the deeply corrupt HealthSouth Corp. chairman prosecuted along with Siegelman. The Governor of Goat Hill is both a scathing portrayal of a New South governor gone bad and an indictment of some of the top names in American journalism, who bought into a bogus conspiracy for no reason other than it led to Karl Rove. This is a book you will either love or hate. One thing you definitely wont find it to be is boring. If you believe Don Siegelman got shafted by over-zealous, intensely partisan prosecutors you will find the case presented against him in great detail, making it easier for you to contradict with opposing evidence. I consider Don Siegelman a personal friend and this book has not changed my mind. He is a man of great ability and it will be up to the reader to decide if he abused the trust that was placed in him or was the victim of a witch hunt orchestrated at the highest levels of American government. Bill Stewart, Professor Emeritus of Political Science, University of Alabama
