Introduction to Public History Cherstin M. Lyon,Elizabeth M. Nix,Rebecca K. Shrum,2017-03-06 Introduction to Public History: Interpreting the Past, Engaging Audiences is a brief foundational textbook for public history. It is organized around the questions and ethical dilemmas that drive public history in a variety of settings, from local community-based projects to international case studies. This book is designed for use in undergraduate and graduate classrooms with future public historians, teachers, and consumers of history in mind. The authors are practicing public historians who teach history and public history to a mix of undergraduate and graduate students at universities across the United States and in international contexts. This book is based on original research and the authors' first-hand experiences, offering a fresh perspective on the dynamic field of public history based on a decade of consultation with public history educators about what they needed in an introductory textbook. Each chapter introduces a concept or common practice to students, highlighting key terms for student review and for instructor assessment of student learning. The body of each chapter introduces theories, and basic conceptual building blocks intermixed with case studies to illustrate these points. Footnotes credit sources but also serve as breadcrumbs for instructors who might like to assign more in-depth reading for more advanced students or for the purposes of lecture development. Each chapter ends with suggestions for activities that the authors have tried with their own students and suggested readings, books, and websites that can deepen student exposure to the topic.

Handbook of Digital Public History Serge Noiret,Mark Tebeau,Gerben Zaagsma,2022-04-04 This handbook provides a systematic overview of the present state of international research in digital public history. Individual studies by internationally renowned public historians, digital humanists, and digital historians elucidate central issues in the field and present a critical account of the major public history accomplishments, research activities, and practices with the public and of their digital context. The handbook applies an international and comparative approach, looks at the historical development of the field, focuses on technical background and the use of specific digital media and tools. Furthermore, the handbook analyzes connections with local communities and different publics worldwide when engaging in digital activities with the past, indicating directions for future research, and teaching activities.

Multicore Processors and Systems Stephen W. Keckler,Kunle Olukotun,H. Peter Hofstee,2009-08-29 Multicore Processors and Systems provides a comprehensive overview of emerging multicore processors and systems. It covers technology trends affecting multicores, multicore architecture innovations, multicore software innovations, and case studies of state-of-the-art commercial multicore systems. A cross-cutting theme of the book is the challenges associated with scaling up multicore systems to hundreds of cores. The book provides an overview of significant developments in the architectures for multicore processors and systems. It includes chapters on fundamental requirements for multicore systems, including processing, memory systems, and interconnect. It also includes several case studies on commercial multicore systems that have recently been developed and deployed across multiple application domains. The architecture chapters focus on innovative multicore execution models as well as infrastructure for multicores, including memory systems and on-chip interconnections. The case studies examine multicore implementations across different application domains, including general purpose, server, media/broadband, network processing, and signal processing. Multicore Processors and Systems is the first book that focuses solely on multicore processors and systems, and in particular on the unique technology implications, architectures, and implementations. The book has contributing authors that are from both the academic and industrial communities.

Next Exit Magic Kingdom Rory MacLean,2008-09-15 Abandoning himself to the winds of chance, MacLean stumbles across an alternative Florida, and spends time in the Psychic Center of the World, meets the Saint of Palatka, chats to Wanda Flip--the head mermaid of Weeki Wachee--and pays \$5 to drink from the Fountain of Youth. His final destination is Disney's Magic Kingdom where Mickey Mouse can be best man at your Fairy Tale Wedding. Next Exit Magic Kingdom shatters every stereotypical image you have ever associated with Florida. Entertaining and warm, this is a story of the places that chance can take you to and a portrait of the many sides of Florida, where dreams can be made as quickly as they are broken.

Exit into History Eva Hoffman,2014-10-16 'A book that takes you on an intimate journey through Eastern Europe at a time when the dust was still settling from the collapse of the Berlin Wall. Eva Hoffman travels from the Baltic to the Black Sea, building a compelling portrait of a region uncertain about its future.' Independent Shortly after the epochal events of 1989 Eva Hoffman spent several months in her native Poland and four other countries: the then-Czechoslovakia, Hungary, Romania and Bulgaria. She visited capital cities, wayside villages and provincial towns; stopped at shipyards, museums, and the coffee-houses of the intelligentsia; and talked to a great variety of people about the tumult they had lived through. Exit into History was the result: a portrait of the mosaic of the new Eastern Europe, a reconstruction of the turbulent post-war decades, and a meditation on the uses and misuses of historical memory.

Making Time on Mars Zara Mirmalek,2020-04-07 An examination of how the daily work of NASA's Mars Exploration Rovers was organized across three sites on two planets using local Mars time. In 2004, mission scientists and engineers working with NASA's Mars Exploration Rovers (MER) remotely operated two robots at different sites on Mars for ninety consecutive days. An unusual feature of this successful mission was that it operated on Mars time—the daily work was organized across three sites on two planets according to two Martian time zones. In Making Time on Mars, Zara Mirmalek shows that this involved more than a resetting of wristwatches; the team's struggle to synchronize with Mars time involved technological and communication breakdowns, informal workarounds, and extra work to support the technology that was intended to support people. Her account of how NASA created an entirely new temporality for the MER mission offers insights about the assumptions behind the organizational relationship between clock time and work. Mirmalek, herself a member of the mission team, offers an insider's view of the MER workplace and community. She describes the discord among MER's multiple temporalities and examines issues of professional identity that helped shape the experience of working according to Mars time. Considering time and work relationships through a multidisciplinary lens, Mirmalek shows how contemporary and historical human-technology relationships inform assumptions about the unalterability of clock time. She argues that the organizational connection between clock time and work, although still operational, is outdated.

Pioneering History on Two Continents Bruce Pauley,2014-07-01 Bruce F. Pauley draws on his family and personal history to tell a story that examines the lives of Volga Germans during the eighteenth century, the pioneering experiences of his family in late-nineteenth-century Nebraska, and the dramatic transformations influencing the history profession during the second half of the twentieth century. An award-winning historian of antisemitism, Nazism, and totalitarianism, Pauley helped shape historical interpretation from the 1970s to the '90s both in the United States and Central Europe. Pioneering History on Two Continents provides an intimate look at the shifting approaches to the historian's craft during a volatile period of world history, with an emphasis on twentieth-century Central European political, social, and diplomatic developments. It also examines the greater sweep of history through the author's firsthand experiences as well as those of his ancestors, who participated in these global currents through their migration from Germany to the steppes of Russia to the Great Plains of the United States.

Driving across Kansas Ted T. Cable,Wayne Maley,2017-04-21 In his introduction to Dan Dancer’s The Four Seasons of Kansas, bestselling author William Least Heat-Moon reflects upon the Great Kansas Passage of those who race their cars westward across Interstate 70 without trying to understand the truth of the place. Ted Cable and Wayne Maley come to the rescue of those travelers with a new guide that will expand and enrich their understanding of a state whose history, in Heat-Moon’s words, is “a tumbling of guns, torches, hatchets, and knives.” Guided by Cable and Maley, the historical landscapes of I-70 come back to life, recalling landmarks and legacies relating to pioneer movements and Indian dispossession, army outposts and great bison hunts, cowboys and cattle trails, the struggles over slavery and women’s rights, and the emergence of major wheat, beef, oil, and water industries. Their guide parcels out information, mile-marker by mile-marker (in boldface), in a way that’s equally accessible to westbound and eastbound users alike. In this second edition the authors have updated the information throughout, including new sites and new stories. Driving across Kansas, 2nd edition will reward the observant traveler with a treasure trove of details sure to increase his or her appreciation for the great Sunflower State.

God, Guts, and Gallantry Dr. Will Joslin,2021-02-05 Major James Lide Coker of Hartsville, South Carolina was a gutsy man of God and an entrepreneurial genius who founded 20 successful businesses. He grew up in the Old South, but became one of the most forward-thinking leaders of the New South. His business odyssey alone makes a fascinating story, but his expansive heart and keen intellect reached well beyond commerce. He was a passionate leader of the Christian faith, a pace-setter in women’s education, and a progressive in race relations. Ahead of his times in every way, he concluded his own book on the Civil War with these words: “There is one great result of the war between the States for which we are truly thankful: slavery is abolished.” Though high-born, he and his family were brought low. In the Civil War, he bravely defended his homeland, fighting with Robert E. Lee and Stonewall Jackson in Virginia, where his brother was killed. In Tennessee, James’s left thigh was shattered at the Battle of Lookout Mountain, and he became a prisoner of war. Delirious with pain, he had several harrowing escapes from death before finally returning home to Sherman-devastated South Carolina. He had lost almost everything, including the use of a leg. But with extraordinary valor, he rose up with a crutch and a hoe to re-establish his farm, and went on to lead the economic, educational, and spiritual rebound of his region in a time of crisis and carpetbaggers. James became the wealthiest man in South Carolina, yet remained humble and down to earth. His war agonies and innate sensitivity to human need enabled him to identify with the harshest realities of the human condition and with the plight of the disenfranchised. When his ingenious and diligent post-war initiatives brought him rivers of prosperity, he let them flow through him to bless countless others in his rural state. A deeply spiritual man, Major Coker also faithfully taught the boys’ Sunday School for thirty-eight years. Today, we have too few leaders of genuine integrity. We need more like the Major – rock solid, gallant, far-sighted, and good to the core! For the benefit of present and future generations, his inspiring story, with fresh perspectives and previously unpublished material, is retold in Dr. Joslin’s unique style, blending biography, daring adventure, courageous faith, and the drama of American history.

Adaptive Data Compression Ross N. Williams,2012-12-06 Following an exchange of correspondence, I met Ross in Adelaide in June 1988. I was approached by the University of Adelaide about being an external examiner for this dissertation and willingly agreed. Upon receiving a copy of this work, what struck me most was the scholarship with which Ross approaches and advances this relatively new field of adaptive data compression. This scholarship, coupled with the ability to express himself clearly using figures, tables, and incisive prose, demanded that Ross's dissertation be given a wider audience. And so this thesis was brought to the attention of Kluwer. The modern data compression paradigm furthered by this work is based upon the separation of adaptive context modelling, adaptive statistics, and arithmetic coding. This work offers the most complete bibliography on this subject I am aware of. It provides an excellent and lucid review of the field, and should be equally as beneficial to newcomers as to those of us already in the field.

Multilingual La La Land Claire Hitchins Chik,2021-09-30 Home to immigrants from more than 140 countries speaking over 180 languages, Los Angeles is a microcosm of the world. While Los Angeles' ethnic enclaves have been the subject of study by researchers from a wide range of fields, these enclaves remain under-researched from a linguistic standpoint. Multilingual La La Land addresses the sociolinguistic landscape of the Greater Los Angeles (GLA) area, providing in-depth accounts of the sixteen most spoken languages other than English in the region. Each chapter introduces the history of the language in the L.A. region, uses census figures and residential densities to examine location-based and network-based speech communities, and discusses the patterns of usage that characterize the language, including motivations to maintain the language. How these patterns and trends bear on the vitality of each language is a central consideration of this book.

Digital Storytelling Joe Lambert,2013 Listen deeply. Tell stories. This is the mantra of the Center for Digital Storytelling (CDS) in Berkeley California, which, since 1998 has worked with nearly 1,000 organizations around the world and trained more than 15,000 people in the art of digital storytelling. In this revised and updated edition of the CDS's popular guide to digital storytelling, co-founder Joe Lambert details the history and methods of digital storytelling practices. Using a 7 Steps approach, Lambert helps storytellers identify the fundamentals of dynamic digital storytelling--from seeing the story, assembling it, and sharing it. As in the last edition, readers of the fourth edition will also find new explorations of the applications of digital storytelling and updated appendices that provide resources for budding digital storytellers, including information about past and present CDS-affiliated projects and place-based storytelling, a narrative-based approach to understanding experience and landscape. A companion website further brings the entire storytelling process to life. Over the years, the CDS's work has transformed the way that community activists, educators, health and human services agencies, business professionals, and artists think about story, media, culture, and the power of personal voice in creating change. For those who yearn to tell multimedia stories, Digital Storytelling is the place to begin.
