**The Evolution of US Army Tactical Doctrine, 1946-76** Robert A. Doughty,1979

Integration of the Armed Forces, 1940-1965 Morris J. MacGregor,2020-06-18 In the quarter century that followed American entry into World War II, the nation's armed forces moved from the reluctant inclusion of a few segregated Negroes to their routine acceptance in a racially integrated military establishment. Nor was this change confined to military installations. By the time it was over, the armed forces had redefined their traditional obligation for the welfare of their members to include a promise of equal treatment for black servicemen wherever they might be. In the name of equality of treatment and opportunity, the Department of Defense began to challenge racial injustices deeply rooted in American society. For all its sweeping implications, equality in the armed forces obviously had its pragmatic aspects. In one sense it was a practical answer to pressing political problems that had plagued several national administrations. In another, it was the services' expression of those liberalizing tendencies that were permeating American society during the era of civil rights activism. But to a considerable extent the policy of racial equality that evolved in this quarter century was also a response to the need for military efficiency. So easy did it become to demonstrate the connection between inefficiency and discrimination that, even when other reasons existed, military efficiency was the one most often evoked by defense officials to justify a change in racial policy.\_x000D\_ Morris J. MacGregor, Jr., received the A.B. and M.A. degrees in history from the Catholic University of America.

He continued his graduate studies at the Johns Hopkins University and the University of Paris on a Fulbright grant. Before joining the staff of the U.S. Army Center of Military History in 1968 he served for ten years in the Historical Division of the Joint Chiefs of Staff.

*A-10s Over Kosovo* Phil M. Haun, Christopher E. Haave, Air University Press, 2011 First published in 2003. The NATO-led Operation Allied Force was fought in 1999 to stop Serb atrocities against ethnic Albanians in Kosovo. This war, as noted by the distinguished military historian John Keegan, marked a real turning point . . . and proved that a war can be won by airpower alone. Colonels Haave and Haun have organized firsthand accounts of some of the people who provided that airpower-the members of the 40th Expeditionary Operations Group. Their descriptions-a new wingman's first combat sortie, a support officer's view of a fighter squadron relocation during combat, and a Sandy's leadership in finding and rescuing a downed F-117 pilot-provide the reader with a legitimate insight into an air war at the tactical level and the airpower that helped convince the Serbian president, Slobodan Milosevic, to capitulate.

Toward Combined Arms Warfare Jonathan Mallory House, 1985

The Army of Excellence John L. Romjue, 1993

Eyes Behind the Lines: US Army Long-Range Reconnaissance and Surveillance Units James F. Gebhardt, 2005 *Eyes Behind the Lines: US Army Long-Range Reconnaissance and Surveillance Units* is the 10th study in the Combat Studies Institute (CSI) Global War on Terrorism (GWOT) Occasional Paper series. This work is an outgrowth of concerns identified by the authors of *On Point: The United States Army in Operation IRAQI FREEDOM*. Specifically, these authors called into question the use of long-range surveillance (LRS) assets by commanders during that campaign and suggested an assessment ought to be made about their continuing utility and means of employment. This revision

contains some important additional information the author received after this book was originally published Major (Retired) James Gebhardt, of CSI, researched and wrote this Occasional Paper with that end in view. In this study, Gebhardt surveys the US Army's historical experience with LRRP and LRS units from the 1960s Cold War and Vietnam War, through their resurgence in the 1980s and use in Operations JUST CAUSE and DESERT STORM, to the advent of the GWOT. The paper's analytical framework examines each era of LRS units in terms of doctrine, organization, training, materiel, leadership, and personnel. In doing so, the author makes a strong case for continuing the LRS capability in the Army's force structure. The variety of environments and enemies likely to be faced by the military in the GWOT continues to demand the unique human intelligence abilities of trained and organized LRS units. As the Army leads the Armed Forces of the United States in combating terrorists where they live, the lessons found in this survey remain timely and relevant.

*The Battle for Khe Sanh* Moyers S. Shore, 2019-11-25 *The Battle for Khe Sanh* is a book by Moyers S. Shore. During the Vietnam War a battle was conducted in the Khe Sanh area of northwestern Vietnam, and this work presents equipment and tactics of US forces and how they fought VC forces.

*Dictionary of American Naval Aviation Squadrons* Roy A. Grossnick, 1995

*The United States Air Force and the Culture of Innovation, 1945-1965* Stephen B. Johnson, 2002

*Basics of Geomatics* Mario A. Gomasasca, 2009-09-18 Geomatics is a neologism, the use of which is becoming increasingly widespread, even if it is not still universally accepted. It includes several disciplines and techniques for the study of the Earth's surface and its environments, and computer science plays a decisive role. A more meaningful and appropriate expression is Geo-spatial Information or GeoInformation. Geo-spatial Information embeds topography in its more modern forms (measurements with electronic instrumentation, sophisticated techniques of data analysis and network compensation, global satellite positioning techniques, laser scanning, etc.), analytical and digital photogrammetry, satellite and airborne remote sensing, numerical cartography, geographical information systems, decision support systems, WebGIS, etc. These specialized fields are intimately interrelated in terms of both the basic science and the results pursued: rigid separation does not allow us to discover several common aspects and the fundamental importance assumed in a search for solutions in the complex survey context. The objective pursued by Mario A. Gomasasca, one that is only apparently modest, is to publish an integrated text on the surveying theme, containing simple and comprehensible concepts relevant to experts in Geo-spatial Information and/or specially in one of the disciplines that compose it. At the same time, the book is rigorous and synthetic, describing with precision the main instruments and methods connected to the multiple techniques available today.

*A History of Innovation: U.S. Army Adaptation in War and Peace* Jon T. Hoffman, 2010-01-15 The U.S. Army has a long record of fielding innovations that not only have enhanced its effectiveness on

the battlefield but also sometimes had an impact far beyond warfare. General Editor Jon T. Hoffman has brought together eleven authors who cover the gamut from the invention of the M1 Garand rifle between the world wars through the development of the National Training Center in the 1980s. While many books lay out theories about the process of innovation or detail the history of a large-scale modernization, the collection of fourteen essays in *A History of Innovation: U.S. Army Adaptation in War and Peace* fills a different niche in the literature. This work is neither a historical account of how the Army has adapted over time nor a theoretical look at models that purport to show how innovation is best achieved. Instead, it captures a representative slice of stories of soldiers and Army civilians who have demonstrated repeatedly that determination and a good idea often carry the day in peace and war. Despite the perception of bureaucratic inertia, the institution's long history of benefiting from the inventiveness of its people indicates that it is an incubator of innovation after all.

*Anti-Intellectualism in American Life* Richard Hofstadter, 2012-01-04 Winner of the 1964 Pulitzer Prize in Nonfiction *Anti-Intellectualism in American Life* is a book which throws light on many features of the American character. Its concern is not merely to portray the scorers of intellect in American life, but to say something about what the intellectual is, and can be, as a force in a democratic society. As Mr. Hofstadter unfolds the fascinating story, it is no crude battle of eggheads and fatheads. It is a rich, complex, shifting picture of the life of the mind in a society dominated by the ideal of practical success. —Robert Peel in the *Christian Science Monitor*

**Sicily and the Surrender of Italy** Lieutenant Albert Garland, Howard Smyth, 2015-07-16 (Includes maps) This volume, the second to be published in the Mediterranean Theater of Operations subseries, takes up where George F. Howe's *Northwest Africa: Seizing the Initiative in the West* left off. It integrates the Sicilian Campaign with the complicated negotiations involved in the surrender of

Italy. The Sicilian Campaign was as complex as the negotiations, and is equally instructive. On the Allied side it included American, British, and Canadian soldiers as well as some Tabors of Goums; major segments of the U.S. Army Air Forces and of the Royal Air Force; and substantial contingents of the U.S. Navy and the Royal Navy. Opposing the Allies were ground troops and air forces of Italy and Germany, and the Italian Navy. The fighting included a wide variety of operations: the largest amphibious assault of World War II; parachute jumps and air landings; extended overland marches; tank battles; precise and remarkably successful naval gunfire support of troops on shore; agonizing struggles for ridge tops; and extensive and skillful artillery support. Sicily was a testing ground for the U.S. soldier, fighting beside the more experienced troops of the British Eighth Army, and there the American soldier showed what he could do. The negotiations involved in Italy's surrender were rivaled in complexity and delicacy only by those leading up to the Korean armistice. The relationship of tactical to diplomatic activity is one of the most instructive and interesting features of this volume. Military men were required to double as diplomats and to play both roles with skill.
