Beyond the Barrier Eugene Rodgers,2012-04-15 When this book originally appeared in 1990, it was hailed as an important new work because of the author's access to Adm. Richard E. Byrd's just-released private papers. Previous books on the legendary polar explorer had to rely on sources subject to the admiral's vigilant censorship or the control of his heirs and friends. With this study Eugene Rodgers provides a scrupulously honest and objective account of Byrd's 1929 expedition to Antarctica. Without discrediting the expedition's success or Byrd's leadership, Rodgers shows that the admiral was not the saintly hero he and the press depicted. Nor was the expedition without its problems. Interviews with surviving members of the expedition together with a wealth of other new material indicate that Byrd, contrary to his claims, was not a good navigator--his pilots usually had to find their way by dead reckoning--and that he was not on the actual flight that discovered Marie Byrd Land. The book further reveals a crisis over drunkenness among the men (including Byrd), the admiral's fear of mutiny, and his rewriting of news stories from the pole to embellish his own image.

The End of Ice Dahr Jamail, 2020-03-10 Finalist for the 2020 PEN / E.O. Wilson Literary Science Writing Award Acclaimed on its hardcover publication, a global journey that reminds us of how magical the planet we're about to lose really is (Bill McKibben) With a new epilogue by the author After nearly a decade overseas as a war reporter, the acclaimed journalist Dahr Jamail returned to America to renew his passion for mountaineering, only to find that the slopes he had once climbed have been irrevocably changed by climate disruption. In response, Jamail embarks on a journey to the geographical front lines of this crisis—from Alaska to Australia's Great Barrier Reef, via the Amazon rainforest—in order to discover the consequences to nature and to humans of the loss of ice. In *The End of Ice*, we follow Jamail as he scales Denali, the highest peak in North America, dives in the warm crystal waters of the Pacific only to find ghostly coral reefs, and explores the tundra of St. Paul Island where he meets the last subsistence seal hunters of the Bering Sea and witnesses its melting glaciers. Accompanied by climate scientists and people whose families have fished, farmed, and lived in the areas he visits for centuries, Jamail begins to accept the fact that Earth, most likely, is in a hospice situation. Ironically, this allows him to renew his passion for the planet's wild places, cherishing Earth in a way he has never been able to before. Like no other book, *The End of Ice* offers a firsthand chronicle—including photographs throughout of Jamail on his journey across the world—of the catastrophic reality of our situation and the incalculable necessity of relishing this vulnerable, fragile planet while we still can.

Owls of the Eastern Ice Jonathan C. Slaght, 2020-08-04 A New York Times Notable Book of 2020 Longlisted for the National Book Award Winner of the PEN/E.O. Wilson Literary

Science Writing Award and the Minnesota Book Award for General Nonfiction A Finalist for the Stanford Dolman Travel Book of the Year Award Winner of the Peace Corps Worldwide Special Book Award A Best Book of the Year: NPR, The Wall Street Journal, Smithsonian, Minneapolis Star-Tribune, The Globe and Mail, The BirdBooker Report, Geographical, Open Letter Review Best Nature Book of the Year: The Times (London) A terrifically exciting account of [Slaght's] time in the Russian Far East studying Blakiston's fish owls, huge, shaggy-feathered, yellow-eyed, and elusive birds that hunt fish by wading in icy water . . . Even on the hottest summer days this book will transport you." —Helen Macdonald, author of *H is for Hawk*, in *Kirkus* I saw my first Blakiston's fish owl in the Russian province of Primorye, a coastal talon of land hooking south into the belly of Northeast Asia . . . No scientist had seen a Blakiston's fish owl so far south in a hundred years . . . When he was just a fledgling birdwatcher, Jonathan C. Slaght had a chance encounter with one of the most mysterious birds on Earth. Bigger than any owl he knew, it looked like a small bear with decorative feathers. He snapped a quick photo and shared it with experts. Soon he was on a five-year journey, searching for this enormous, enigmatic creature in the lush, remote forests of eastern Russia. That first sighting set his calling as a scientist. Despite a wingspan of six feet and a height of over two feet, the Blakiston's fish owl is highly elusive. They are easiest to find in winter, when their tracks mark the snowy banks of the rivers where they feed. They are also endangered. And so, as Slaght and his devoted team set out to locate the owls, they aim to craft a conservation plan that helps ensure the species' survival. This quest sends them on all-night monitoring missions in freezing tents, mad dashes across thawing rivers, and free-climbs up rotting trees to check nests for precious

eggs. They use cutting-edge tracking technology and improvise ingenious traps. And all along, they must keep watch against a run-in with a bear or an Amur tiger. At the heart of Slaght's story are the fish owls themselves: cunning hunters, devoted parents, singers of eerie duets, and survivors in a harsh and shrinking habitat. Through this rare glimpse into the everyday life of a field scientist and conservationist, *Owls of the Eastern Ice* testifies to the determination and creativity essential to scientific advancement and serves as a powerful reminder of the beauty, strength, and vulnerability of the natural world.

Live from Medicine Park Constance Squires, 2017-10-05 Documentary filmmaker Ray Wheeler is down on his luck. Embroiled in a lawsuit, he is reeling from the consequences of a near-fatal shooting on his last film, and has just lost his teaching gig. Broke and beleaguered, he can't afford to be particular about his next project. So when a former student invites him to film the comeback of Lena Wells, an iconic rock-and-roll singer who hit it big in the seventies, more than two decades earlier, he reluctantly agrees—even though he doesn't like her music. When Ray arrives at Lena's hometown of Medicine Park, Oklahoma, a defunct resort community, he is determined to approach his topic with the professional detachment that has guided his career. His work ethic is modeled on the prime directive of *Star Trek*: never interfere with an alien civilization. But with only five days left before Lena's comeback concert, Ray quickly runs afoul of his subject, who places him on a one-week probation. The terms: impress her or else. It doesn't take long before Ray violates his own ethical standards. Drawn romantically toward Lena, he also fails to prevent himself from interfering with the lives of the people closest to her, including her only son, Gram, whose paternity is a mystery even to himself; her daughter-in-law, Jettie; and the enigmatic

guitar player Cyril Dodge. When disaster strikes Ray's set again, this time in Medicine Park, he must face truths he has avoided for too long—about love, relationships, and responsibility. An ode to both southwestern Oklahoma and rock music, *Live from Medicine Park* is a bittersweet reflection on the search for identity and purpose amid tragedy. As the novel reaches its climax, Ray sets out on one last adventure to set things right. Redemption may be possible—but only on its own terms.

Birkbeck Word Association Norms Helen Moss, Lianne Older, 1996 This is a reference work containing free association norms for over 2000 words in the English language collected over the last eight years from groups of 40-50 British English speakers aged between 17 and 45. These norms provide the information that, for example, 67% of people give dog as the first word they think of in response to the word cat, that 24% give the word society in response to the word pillar, and given the name Michael, 65% say Jackson, whereas less than 5% say Heseltine or Caine. These norms will be of use to researchers and students in many fields of psychology, especially language and memory, where the degree of association between pairs of words is often an important experimental variable. The main part of the book contains an alphabetical list of all associative responses and their frequency for each of the 2464 stimulus words. In addition, there is an index of stimulus words organised according to semantic category to aid selection of experimental materials. Full methodological details of the collection and compilation of the data are also provided in the introduction.
