Paradigm Shift in Management Philosophy Bharat S. Thakkar, 2019-12-31 Rapidly growing technology and globalization have put tremendous pressure on management teams. Technological developments with far reaching implications on social, economic, political, and environmental ecosystems cannot be underemphasized. Currently, organizations are trying to be more inclusive and aware of diversity, rapid technology growth, and globalization along with remotely operating businesses for profit motivation. The delegative and individual employee-based management styles of the past have become obsolete. With globalization, virtual offices, and rapid technology growth, management challenges have become an expensive force to reckon with. In this book, the authors address the recent trends in management in global environments. The authors explore issues such as managing virtual teams, gender and management, e-commerce, biased financing, quantum computing, and disruption in the financial services industry. The book will serve as a valuable resource to researchers interested in the future management challenges facing global organizations.

Big Billion Startup: The Untold Flipkart Story Mihir Dalal, 2019-10-06 The definitive account of India's biggest startup that redefined e-commerce, entrepreneurship and the way we shop and live. IIT graduates Sachin Bansal and Binny Bansal founded out of a Bangalore apartment what would become India's biggest e-commerce startup. Established in October 2007, Flipkart began as an online bookstore and soon came to be known for its 'customer obsession'. As the startup's reputation grew, so did its value, with venture capitalists in India and abroad lining up to invest heavily in the company that stood for bold ambition, unabashed consumerism and the virtues of technology. Investigative journalist Mihir Dalal recounts the astounding story of how the Bansals built Flipkart into a multi-billion-dollar powerhouse in the span of a few years and made internet entrepreneurship a desirable occupation. But it is also a story of big money, power and hubris, as both business and interpersonal complexities weakened the founders' control over their creation and forced them to sell out to a retailer whose dominance they had once dreamt of emulating. Flipkart's auction involved some of the corporate world's biggest names, from Jeff Bezos, Satya Nadella, Sundar Pichai to Masayoshi Son and Doug McMillon, an ironic testimony to the strength of what the Bansals had forged. Based on extraordinary research, extensive interviews and deep access to key characters in the Flipkart story, Big Billion Startup is the riveting and revealing account of how Sachin and Binny Bansal built and sold India's largest internet company.

ETourism Dimitrios Buhalis, 2003 This book addresses the digitization of all processes and value chains in the tourism, travel, hospitality and catering industries. By exploring the new technological trends it provides a solid basis for analysing the impacts of the Information Communication Technology (ICT) revolution on the tourism industry. The book adopts a strategic management and marketing perspective for tourism enterprises and destinations. It suggests that ETourism revolutionizes all business processes, the entire value chain as well as the strategic relationships of tourism organizations with all their stakeholders. It additionally focuses on how ICTs are employed in airlines, hotels, travel agencies, tour operators and destinations management organizations. The book demonstrates that tourism ICTs increasingly determine the competitiveness of the organization, and therefore, they are critical for the competitiveness of the industry in the longer term. The book is aimed at advanced undergraduate and postgraduate students in business, tourism and hospitality programmes that need to explore how they can use ICTs in a strategic context. It is also anticipated that researchers and practitioners will find it useful and stimulating. Features and benefits: Strategic perspective demonstrates the contribution of ICTs to the competitiveness of tourism organizations and destinations A wealth of international examples ensure global application and relevance Extensive use of case studies and illustrative examples demonstrate the link between theory and real world tourism situations Discussion topics encourage students to

analyse further the information covered Extensive bibliography and further reading encourage more advanced study Associated website featuring up-to-date FT articles and power point slides create a comprehensive teaching and learning package. Dr Dimitrios Buhalis is Course Leader of the MSc in eTourism and Director of the Centre for eTourism Research (CeTR) at the University of Surrey. He is also Adjunct Professor at the Institut de Management Hotelier International (Cornell University - ESSEC Business School) in Paris. He serves as Vice President of the International Federation of Information Technology and Tourism (IFITT) and has chaired several ENTER conferences. He regularly works as adviser for the World Tourism Organisation, the World Tourism and Travel Council and the European Commission.

Cybercash Robert Guttman,2002-10-22 Cybercash refers to the creation and circulation of online money. The author applies economic analysis to this new form of electronic money to understand how it will enable the internet to re-establish itself as the dynamic centre of the new economy and how this new money form will become the dominant payment mechanism rivalling cash, paper cheques or credit cards. This will be the first book to look at the coming era of electronic money within the broader context of the economy.

Driving the Economy through Innovation and Entrepreneurship Department of Management Studies,2017-05-04 Modern technologies are central to creation of wealth through business expansion leading to economic development. This is visible in the fast-paced technology-induced economic growth experienced by most countries, especially by rapidly growing economies such as India, China, Brazil, South Korea, among others. Increasing individual scientific contribution, nurturing entrepreneurial talent, promoting innovative competence, strategically prioritizing and investing in technologies and enhancing national economic wealth are some of the important Technology Management goals. Technology Management has emerged as a strategic and knowledge domain of interest to academicians, practitioners, and policy makers across the globe. Technology Management has also evolved into an inter-disciplinary concern which requires national and international collaborations and exchange of insights. Keeping this objective in mind the International Conference on Technology Management is organized by the Department of Management Studies, Indian Institute of Science, Bangalore, a leader in research and education in Technology Management for the last several decades. This conference aims at integrating experiences of academicians, industry leaders, Technology Managers and Innovators towards effective knowledge creation and economic development. The contributions of the present volume are presented at the International Conference on Technology Management-2012 during 18-20 July 2012.

E-commerce in India Pralok Gupta,2020 E - commerce is growing at an exponential rate in India. Despite this, it is still at an evolving stage as economic and regulatory frameworks pertaining to various segments of e-commerce are being put into place by the government. This book presents a comprehensive analysis of the economic and regulatory aspects of the e-commerce sector by assessing the trends and characteristics, and addressing the issues and challenges associated with it. It dwells into key issues including FDI regulations, taxation, valuation of e-commerce companies, market structure, competition, payment mechanism, blockchain and cryptocurrencies, and logistics. The issues and challenges addressed in this book frequently appear as discussion points in policy debates, research forums and popular media. However, information on these is scant and often scattered. This book bridges gaps in the available literature on e-commerce.
