Broadcasting Politics in Japan Ellis S. Krauss, 2018-09-05 The aftermath of Japan's 1945 military defeat left its public institutions in a state of deep crisis; virtually every major source of state legitimacy was seriously damaged or wholly remade by the postwar occupation. Between 1960 and 1990, however, these institutions renewed their strength, taking on legitimacy that erased virtually all traces of their postwar instability. How did this transformation come about? This is the question Ellis S. Krauss ponders in *Broadcasting Politics in Japan*; his answer focuses on the role played by the Japanese mass media and in particular by Japan's national broadcaster, NHK. Since the 1960s, television has been a fixture of the Japanese household, and NHK's TV news has until very recently been the dominant, and most trusted, source of political information for the Japanese citizen. NHK's news style is distinctive among the broadcasting systems of industrialized countries; it emphasizes facts over interpretation and gives unusual priority to coverage of the national bureaucracy. Krauss argues that this approach is not simply a reflection of Japanese culture, but a result of the organization and processes of NHK and their relationship with the state. These factors had profound consequences for the state's postwar re-legitimization, while the commercial networks' recent challenge to NHK has helped engender the wave of cynicism currently faced by the state. Krauss guides the reader through the complex interactions among politics, media organizations, and Japanese journalism to demonstrate how NHK television news became a shaper of Japan's political world, rather than simply a lens through which to view it.

Broadcasting in Japan Hitoshi Mitomo, Mikio Kimura, 2022-11-14 This book provides an analysis of the various challenges and opportunities facing the Japanese broadcasting industry. It is the first book in English that explores how Japanese broadcasting, especially commercial broadcasting, fulfills its social mission under the threat of the increased popularity of Internet-based media services as it reexamines the role and nature of broadcasting. During a series of disasters and the spread of the new coronavirus in Japan, while varied media connected people and supported socio-economic activities, broadcasting continued to be the most trusted. However, as Internet media attract increasing attention, the trend in broadcast viewership is downward. Commercial broadcasting, in particular, will be strongly affected by that trend and the impact of the shrinking population. Recognizing that such dramatic technological and environmental changes are under way, in addition to the eleven researchers participating in the visiting researcher committee at the Research Institute of the Japan Commercial Broadcasters Association (JBA), four research collaborators and the secretariat (director of the JBA) have contributed to this book. They have taken up issues related to challenges and opportunities for the broadcasting industry based on their respective areas of awareness of the problems, including policies for broadcasting, fake news, disaster responses, viewer trust in television programs, competition with Internet-based services, and the business model for broadcasting.

Decision-making Analysis and Optimization Modeling of Emergency Warnings for Major Accidents Wenmei Gai,Yan Du,Yunfeng Deng,2018-11-03 This book highlights cutting-edge research into emergency early warning management and decision-making for severe accidents. Using toxic gas leakages as examples, it puts forward new design methods for emergency early warning systems, as well as a systematic description of emergency early warning information communication mechanisms and characteristics of regional evacuation, based on a wide range of theories, including safety engineering, information engineering, communication, behaviorology and others. The book applies a range of methods, such as case analysis, questionnaire interviews, and multi-objective optimization modeling. Drawing on this basis, it subsequently proposes a multi-objective optimization modeling and algorithm for emergency path selection, together with an evacuation risk assessment method. Divided into six chapters prepared by an international team of researchers, the book addresses the design of early warning systems, communication and dissemination mechanisms of early warning information, characteristics of regional evacuation, multi-objective optimization of emergency paths, and evacuation risk assessment. The book offers an essential reference guide for engineering technicians and researchers in a wide range of fields, including emergency management, safety science and engineering, disaster relief engineering, and transportation optimization, as well as graduate students in related majors at colleges and universities.

The SAGE Encyclopedia of Journalism Gregory A. Borchard,2022-02-22 Journalism permeates our lives and shapes our thoughts in ways that we have long taken for granted. Whether it is National Public Radio in the morning or the lead story on the Today show, the morning newspaper headlines, up-to-the-minute Internet news, grocery store tabloids, Time magazine in our mailbox, or the nightly news on television, journalism pervades our lives. The Encyclopedia of Journalism covers all significant dimensions of journalism, such as print, broadcast, and Internet journalism; U.S. and international perspectives; and history, technology, legal issues and court cases, ownership, and economics. The encyclopedia will consist of approximately 500 signed entries from scholars, experts, and journalists, under the direction of lead editor Gregory Borchard of University of Nevada, Las Vegas.

Making Way in Corpus-based Interpreting Studies Mariachiara Russo,Claudio Bendazzoli,Bart Defrancq,2017-10-24 This book presents a collection of state-of-the-art work in corpus-based interpreting studies, highlighting international research on the properties of interpreted speech, based on naturalistic interpreting data. Interpreting research has long been hampered by the lack of naturalistic data that would allow researchers to make empirically valid generalizations about interpreting. The researchers who present their work here have played a pioneering role in the compilation of interpreting data and in the exploitation of that data. The collection focuses on both of these aspects, including a detailed overview of interpreting corpora, a collective paper on the way forward in corpus compilation and several studies on interpreted speech in diverse language pairs and interpreter-mediated settings, based on existing corpora.

50 Years of Japanese Broadcasting NHK Sōgō Hōsō Bunka Kenkyūjo, 1977

The Politics of Public Broadcasting in Britain and Japan Henry Laurence, 2022-07-29 The BBC and NHK have dominated their national media systems since the 1920s and still play a central role in shaping political, social and cultural life. Both are highly trusted news organizations, and vitally influence national identity. Yet despite remarkably similar organizational and funding structures, they differ in their editorial autonomy, relationship to the state, and in the social and cultural roles they play. While the BBC, proud of its independence, acts as a watchdog on the powerful, NHK prefers a guide dog role cooperating with rather than confronting political elites. The BBC is also more willing to challenge prevailing social norms, often serving as an agent of social change. NHK prefers to avoid controversy, serving as an agent of social stability. The book argues that these differences were shaped by decades of conflict and cooperation between broadcasters, governments, commercial media, interest groups and audiences. The broadcasters adopted distinctive editorial strategies to retain public support and elite approval in the face of technological upheaval, hostility from commercial rivals, and continuous political interference. Both, however, continue to uphold the belief that democratic and social goals are better served by public rather than commercial media.

Encyclopedia of Radio 3-Volume Set Christopher H. Sterling, 2004-03-01 Produced in association with the Museum of Broadcast Communications in Chicago, the Encyclopedia of Radio includes more than 600 entries covering major countries and regions of the world as well as specific programs and people, networks and organizations, regulation and policies, audience research, and radio's technology. This encyclopedic work will be the first broadly conceived reference source on a medium that is now nearly eighty years old, with essays that provide essential information on the subject as well as comment on the significance of the particular person, organization, or topic being examined.

Technology, Television, and Competition Jeffrey A. Hart, 2004-02-05 In the late 1980s and 1990s, the advanced industrial countries considered replacing the existing analogue television infrastructure with a new digital one. A key common feature to the debates over digital TV (DTV) in the United States, Western Europe and Japan was the eventual victory of the ideas of digitalism (the superiority of everything digital over everything analogue) and of digital convergence (the merging of computing, telecommunications and broadcasting infrastructures made possible by digitalization) in public debates over standards. Jeffrey Hart's book shows how nationalism and regionalism combined with digitalism to produce three different and incompatible DTV standards in the three regions, an outcome which has led to missed opportunities in developing the new technologies. Hart's book contributes to our understanding of relations between business and government, and of competition between the world's great economic powers.

The Nanking Atrocity, 1937-1938 Bob Tadashi Wakabayashi, 2017-08-01 First published in 2007, *The Nanking Atrocity* remains an essential resource for understanding the massacre committed by Japanese soldiers in Nanking, China during the winter of 1937-38. Through a series of deeply considered and empirically rigorous essays, it provides a far more complex and nuanced perspective than that found in works like Iris Chang's bestselling *The Rape of Nanking*. It systematically reveals the flaws and exaggerations in Chang's book while deflating the self-exculpatory narratives that persist in Japan even today. This second edition includes an extensive new introduction by the editor reflecting on the historiographical developments of the last decade, in advance of the 80th anniversary of the massacre.

Japan and Natural Disasters Jean-Francois Heimbürger, 2018-10-08 Japan is one of those countries most often

affected by powerful natural hazards: earthquakes, tsunamis, volcanic eruptions, typhoons, heavy rains, heavy snowfall, tornadoes, etc. The Archipelago is considered a very advanced country in terms of forecasting, prevention and management of natural disasters. A detailed analysis of the reality of recent years is however necessary. In the run-up to the 2020 Olympic Games in Tokyo, among others, a publication on the subject will inform a large number of people wanting to know more about the risks of natural disasters in Japan.

Keep It Moving Twyla Tharp, 2019-10-29 A NEW YORK TIMES BESTSELLER One of the world's legendary artists and bestselling author of *The Creative Habit* shares her secrets—from insight to action—for harnessing vitality, finding purpose as you age, and expanding one's possibilities over the course of a lifetime in her newest New York Times bestseller *Keep It Moving*. At seventy-eight, Twyla Tharp is revered not only for the dances she makes—but for her astounding regime of exercise and nonstop engagement. She is famed for religiously hitting the gym each morning at daybreak, and utilizing that energy to propel her breakneck schedule as a teacher, writer, creator, and lecturer. This book grew out of the question she was asked most frequently: “How do you keep working?” *Keep It Moving* is a series of no-nonsense meditations on how to live with purpose as time passes. From the details of how she stays motivated to the stages of her evolving fitness routine, Tharp models how fulfillment depends not on fortune—but on attitude, possible for anyone willing to try and keep trying. Culling anecdotes from Twyla's life and the lives of other luminaries, each chapter is accompanied by a small exercise that will help anyone develop a more hopeful and energetic approach to the everyday. Twyla will tell you what the beauty-fitness-wellness industry won't: chasing youth is a losing proposition. Instead, *Keep It Moving* focuses you on what's here and where you're going—the book for anyone who wishes to maintain their prime for life.
