Graduate Medical Education (GME) United States. Congress. Senate. The Coordinate-Free Approach to Linear Models Michael J. Wichura, 2006-10-23 This book is about the coordinate-free, or geometric, approach to the theory of linear models; more precisely, Model I ANOVA and linear regression models with non-random predictors in a finite-dimensional setting. This approach is more insightful, more elegant, more direct, and simpler than the more common matrix approach to linear regression, analysis of variance, and analysis of covariance models in statistics. The book discusses the intuition behind and optimal properties of various methods of estimating and testing hypotheses about unknown parameters in the models. Topics covered range from linear algebra, such as inner product spaces, orthogonal projections, book orthogonal spaces, Tjur experimental designs, basic distribution theory, the geometric version of the Gauss-Markov theorem, optimal and non-optimal properties of Gauss-Markov, Bayes, and shrinkage estimators under assumption of normality, the optimal properties of F-test, and the analysis of covariance and missing observations.

Contemporary Topics in Graduate Medical Education Stanislaw P. Stawicki, Michael S. Firstenberg, James P. Orlando, Thomas Papadimos, 2022-10-26 Graduate medical education (GME) continues its decades-long evolution. Evidence-based approaches are increasingly transforming the way we educate, evaluate, and promote GME trainees. Key to this transformation is our ability to recognize that “medical education” constitutes a true lifelong continuum, beginning with pre-medical education, then proceeding to medical school, residency (and potentially subsequent fellowship) training, and then finally the so-called maintenance of certification that continues throughout one’s entire professional

career. This book explores a broad range of important topics, including the novel concept of “coping intelligence,” the important role of “work-life integration,” professional coaching and mentorship, professional development and career-long learning, patient-provider relationship, the impact of the COVID-19 pandemic on medical education, as well as the introduction of modern technologies to ameliorate the effects of social distancing. The book further discusses two important aspects of GME program management: the process of establishing new GME programs as well as the highly intricate process of merging residency programs. Different aspects and perspectives are incorporated, including those of residents, faculty, and program leadership. The book ends with chapters on diversity, equity and inclusion, and the importance of community-based medical education.

Issues Regarding Graduate Medical Education United States. Congress. House. Committee on Ways and Means. Subcommittee on Health, 1995 The Subcommittee met in the first of a series of hearings on graduate medical education aimed at developing a new Medicare health professional education and teaching hospital payment policy. The hearing examined new policies for training future health professionals, future medical manpower needs, and the financing of teaching hospitals. Current Medicare payment mechanisms for graduate medical education and teaching hospitals were also reviewed. Among the witnesses were representatives of the American College of Surgeons advocating continued support for teaching hospitals, the American Dental Association advocating continued funding for hospital-based graduate dental education, the American Medical Association in favor of adding third-party payers' support for graduate medical education, the American Nurses Association advocating increased support for graduate nursing education, the American Osteopathic Association advocating limiting residency funding to 110 percent of total graduates, the American Podiatric Medical Association in favor of all third-party payers sharing in the support of graduate training, the Harvard Community Health Plan advocating different allocation to training sites, and the Association of American Medical Colleges on two specific Medicare payments. Also appearing were Doctor Kenneth Shine, Doctor Robert Heyssel, Professor Ruth S. Hanft, and Nurse Michael A. Carter. Includes the prepared testimony of witnesses and six submissions for the record.
