Horse Trading in the Age of Cars Steven M. Gelber,2008-10 Gelber's highly readable and lively prose makes clear how this unique economic ritual survived into the industrial twentieth century, in the process adding a colorful and interesting chapter to the history of the automobile.

Extreme You Sarah Robb O'Hagan,2017-04-04 As a child, Sarah Robb O'Hagan dreamed she could be a champion. Her early efforts failed to reveal a natural superstar, but she refused to settle for average. Through dramatic successes and epic fails, she studied how extraordinary people in sports, entertainment and business set and achieve extremely personal goals. Sarah became an executive at Virgin Atlantic and Nike, and despite being fired twice in her twenties, she went on to become the global president of Gatorade and of Equinox—as well as a wife, mother, and endurance athlete. In every challenging situation, personal or professional, individuals face the pressure to play it safe and conform to the accepted norms. But doing so comes with heavy costs: passions stifled, talents ignored, and opportunities squelched. The bolder choice is to embrace what Sarah calls Extreme You: to confidently bring all that is distinctive and relevant about yourself to everything you do. Inspiring, surprising, and practical, Extreme You is her training program for becoming the best version of yourself.

The Loom of Language Frederick Bodmer,1985 Here is an informative introduction to language: its origins in the past, its growth through history, and its present use for communication between peoples. It is at the same time a history of language, a guide to foreign tongues, and a method for learning them. It shows, through basic vocabularies, family resemblances of languages -- Teutonic, Romance, Greek -- helpful tricks of translation, key combinations of roots and phonetic patterns. It presents by common-sense methods the most helpful approach to the mastery of many languages; it condenses vocabulary to a minimum of essential words; it simplifies grammar in an entirely new way; and it teaches a language as it is actually used in everyday life.

Car Business 101 Max Zanan,2018-12-24 Automotive retail is at crossroads--either it gets better or becomes extinct. Consumers are dissatisfied with the sales process in brick and mortar dealerships and that is the driving force behind the rise of Carvana and other industry disrupters. However, it is not too late to fix the way car dealerships operate and improve their reputation. Car Business 101 highlights irrational and counterproductive behavior that car dealers engage in on a daily basis. If you own or work in a car dealership it will be easy to recognize insanity that goes on in Sales, F&I, BDC, HR, and Parts & Service departments. This book offers a fresh perspective and plenty of practical solutions that should be implemented as soon as possible. It is informative and entertaining at the same time. It is a must read for dealer principals, dealership employees, and vendors that service car dealers.

A Guide to Grand-Jury Men Richard Bernard,2017-01-21 During the mid 16th century, England was plagued by an overwhelming number of deaths and strange sicknesses that affected both men and their cattle. Instances of the demonically possessed caused fear as sightings of spiritual apparitions affected local villages. People tried many methods to cure themselves, some by prayer, by treatments of superstitious rituals or with the help of good witches, healers, and divination. Accusations of witchcraft were increasingly common and a reformation of witch-trial procedure was underway. This volume was advisement on how Grand-Jury Men should conduct themselves in cases of witchcraft, along with details on their responsibilities and expected conduct in criminal witch-trials as they examined suspected witches and analyzed instances of bewitchment and maladies that surrounded them. It was first published in 1627 and was influenced by many works and witch-trials from antiquity. The work cites a variety of dissertations and provides a grand historical perspective on the subjects of poison, disease, murders and death believed to have been the cause of witchcraft in the minds of the most learned men of that era but also warns against the punishment of the innocent as many could negligently be falsely accused of witchcraft while explaining how one might know if a suspected witch is truly in league with the devil or just plain trickery. Outlined in this treatise are several topics on magic, witchcraft and demonology: The difference between real magic by use of demons and counterfeit magic or trickery; Medical evaluations of various diseases with methods on determining whether certain diseases could truly be caused by witchcraft; the signs of bewitchment versus the sufferings of natural disease; the power of Satan, the analysis of the witch's mark and how an individual may come to league with a demonic entity; the differences between bad and good witches; the methods a witch or demons is able to bewitch and curse others; the methods used by those who think themselves bewitched; discussion on the trials, persecution, conviction and

punishment of bad witches. It also discusses demonology and the history of magic, necromancy and various forms of witchcraft.
