Night Photography Lance Keimig, 2012-10-02 Night photographers have one big thing in common: a true love of the dark. Rather than looking at night photography as an extension of daytime shooting with added complications, they embrace the unique challenges of nocturnal photography for the tremendous wealth of creative opportunities it offers. That's just what this book does. But if the idea of setting out into the deep, dark night with just your camera (and maybe a cup of coffee) gets your creative juices flowing, dive right in. Lance Keimig, one of the premier experts on night photography, has put together a comprehensive reference that will show you ways to capture images you never thought possible. If you have some experience with photography and have always wanted to try shooting at night, you'll learn the basics for film or digital shooting. If you're already a seasoned pro, you'll learn to use sophisticated techniques such as light painting and drawing, stacking images to create long star trails, and more. A chapter on the history of night photography describes the materials and processes that made night photography possible, and introduces the photographers who have defined night photography as an artistic medium. A chapter on how to use popular software packages such as Lightroom and Photoshop specifically with night time shots shows you how to make the final adjustments to your nocturnal creations. In this book you'll find history, theory, and lots of practical instruction on technique, all illustrated with clear, concise examples, diagrams and charts that reinforce the text, and inspiring color and black and white images from the author and other luminaries in the field, including Scott Martin, Dan Burkholder, Tom Paiva, Troy Paiva, Christian Waeber, Jens Warnecke and Cenci Goepel, with Foreword by Steve Harper.

George Shiras Jean-Christophe Bailly, 2015 Though sometimes dubbed the first wildlife photographer, George Shiras is not a prominent name in the history of photography. While his photos were shown at the Paris World Fair of 1900, Shiras--also a lawyer and politician--did not consider himself an artist; his goal was, above all, to document wildlife from the pre-environmental perspective to which he dedicated his life. In 1893, Shiras perfected the procedure of nocturnal flash photography in various regions of the US and Canada. It was in contact with hunters--and also with Native American guides or trappers--that he became initiated in the ways of wildlife, eventually exchanging the rifle for the camera, as he himself put it. Despite his aesthetic innocence, Shiras succeeded in capturing the first night-time wildlife photos ever created, thanks to both his use of flash photography and camera-trap equipment. This gorgeous hardcover compiles his prescient nocturnal photography. George Shiras III (1859-1942) was born in Allegheny, Pennsylvania. He served as a member of the Pennsylvania State House of Representatives in 1889 and 1890 and was elected to the 58th Congress. After his time in Congress, Shiras became engaged in biological research and wildlife photography; he was a member of the Boone and Crockett Club, a conservation organization founded by Theodore Roosevelt. In 1935, he published a two-volume set of over 960 of his wildlife photographs with the National Geographic Society.

Richard Learoyd, 2015 This deluxe, oversized monograph offers the most comprehensive collection of Richard Learoyd's color studio images to date--mostly portraits, but also including a handful of exquisite still lifes. The color images are made with one of the most antiquarian of photographic processes: the camera obscura, literally translated from Latin as dark room. Learoyd

has created a room-sized camera in which the Cibachrome photographic paper is exposed. The subject is in the adjacent room, separated by a lens. Light falling on the subject is directly focused onto the photographic paper without an interposing film negative. The result is an entirely grainless image. The overall sense of these larger-than-life images redefines the photographic illusion. Learoyds subjects, composed simply and directly, are described with the thinnest plane of focus, recreating and exaggerating the way that the human eye perceives not without a small acknowledgment to the paintings of the Dutch Masters. The 150 images in this volume have been reproduced with utmost care to capture the luminosity of the original materials. Includes an artist statement by Learoyd and curatorial statement by Martin Barnes, who is organizing the first solo exhibition of the artists work at the Victoria and Albert Museum, London.

In the past, landscape photography largely ended when the last light of dusk faded from the sky. Today it's only beginning. The latest digital cameras have made it much easier to create images of the landscape at night that film and early digital photographers could only dream of. Equipped with off-the-shelf cameras, more and more photographers are venturing into the night, far beyond the comforting glow of city lights, and returning with spectacular images of places both familiar and unknown that are unlike anything seen before. *Dusk to Dawn: A Guide to Landscape Photography at Night, 2nd Edition*, is your guide to this new photographic world. In it, photographer Glenn Randall—author of the bestselling *The Art, Science, and Craft of Great Landscape Photography*—teaches you how to plan, shoot, and process professional-quality images of the Milky Way, the aurora, lunar eclipses, meteor showers, comets, star trails, and landscapes lit solely by moonlight. In this fully revised and updated second edition, Randall goes deeper into today's technology that allows for great landscape photography at night: from mirrorless cameras that now truly dominate the market (and require a different approach to focusing) to the apps photographers need to know to best prepare for a successful shoot (Photo Pills, Photo Ephemeris Web). This edition has also been updated with dozens of new photographs from the author, as well as new sections on photographing comets, the zodiacal light, and noctilucent clouds. Throughout the book, Randall emphasizes ways to integrate beautiful depictions of the night sky with equally compelling renditions of the land below it to create complete landscape images that evoke a sense of place—and a sense of wonder. Eren Sarigul ,2021-06 It takes a particular blend of curiosity and courage to dive into a culture foreign to your own. In *Across Japan*, photographer Eren Sarigul takes us on a wide-eyed journey through the beautiful country that has fascinated him since he was a boy in south London. Born into a family with deep roots in Istanbul, Eren grew up bilingual and frequently visited relatives in Turkey. But it was the Japanese exchange students his family hosted that planted a dream of one day travelling much farther east. *Across Japan* documents this young photographer's travels from the streets of Tokyo, to the enchanted forests of Yakushima, to the mountains of Nagano and back again. His lifelong love affair with Japan's geography, its cultures, and its people are evident on every page.

Sex, Celebrities & Spy Cameras Paul Nichols, 2017-05-26
When Paul Nichols took a job as a hotel night manager in a top London hotel, he was hoping to advance his career and meet a few A-list celebrities along the way. He wasn't disappointed, thanks to encounters with Tom Cruise, Nicole Kidman, Rihanna, Puff Daddy, Kanye West, Kimberly Stewart, Noel Gallagher and Peter Kay, among others. He had no idea that he would also have to play detective, deal with cases of theft, cover up several potential sex and drugs scandals, rescue a starlet from the paparazzi and do his frantic best to save the life of a severely-injured guest. He also didn't expect to be finding concealed cameras in celebrities' bedrooms. A shocking, entertaining and sometimes hilarious account of life behind the scenes at a millionaires' hotel - and these are just the stories that can be printed...
